## Editorial

Another KNITKING Seminar has come and gone, and there is no doubt that this was the most interesting and educational ever... All of our Seminar Teachers had full knowledge of their subjects and the rare ability to pass that knowledge on in easy to understand fashion.

Yukiko Mitsumata, the charming and most knowledgeable expert from Brother Industries in Japan, demonstrated with fascinating skill and dexterity, the incomparable COMPUKNIT 910 and the all new KH 881 Punch Card Knitter with and without Ribbing Attachments and with Knitleaders and Color Changers.

Our hundreds of visitors consumed over 2,000 doughnuts and more than 45 gallons of coffee... We all had a wonderful educational fun filled week and we look forward to doing it again next year.

We believe that one of the reasons for more interesting Seminars are the fantastic strides made over the just few years in product design and improvement... So much versatility is built into the modern home knitting machine... Not planned obsolescence, just competition and a desire on the part of manufacturers (especially our suppliers) to produce the finest knitting machines possible.

There are so many design improvements in the new KNITKING KH 881 that machines 3 and 4 years old are obsolete in comparison... Just looking at previous models does not convey the great improvements built into the 881... Isolation of parts of Lace Punch Cards... Automatic retraction of end needles when knitting lace or other fancy stitch designs... Isolation of one, two, or three Motifs... Intarsia and Plating Feeders... Built in Knitleader that accepts both full and half size Charts and has a new easier operating technique...

When we first tested the KH 881, everything seemed to operate smoother and easier than any other Punch Card knitter we have ever tested... Our observations have since been echoed by a number of customers who traded older machines and other brands in for the KH 881... There is no doubt in our minds... the KNITKING KH 881 is the finest Punch Card Machine ever made.

The State of the Art in knitting machines is obviously the COMPUKNIT KH 910 Electronic. It is in a class of its own... It does everything the Punch Card machines do and so much, much more... The major difference of course is the size of the Motif you can produce in your knitting... On a Punch Card machine you can knit a single motif 24 stitches wide... The Compuknit has no limitation... you can knit a single motif over the full 200 needles of the machine... It is also possible to make a single Lace Design covering the full width of the needle bed... and, most of all the Compuknit is so simple to program, a child can do it.

Who would have thought just a few short years ago that so much versatility could be built into one knitting machine... and considering the incredible amount of engineering skill and electronic wizardry plus 6 years of building and testing, the price we ask for a Compuknit KH 910 is very moderate.

It took a skilled operator 4 hours to test one Compuknit machine when production started... Since then the brains that built the Compuknit have built a computerized robot that checks out the full functions of the 910 Computer in a fraction of the time taken by a human being... Amazing...and you the machine knitter are the beneficiary of all this great technology... Automatic knitting machines are indeed a far cry from the basic stockinette machines of a few years ago.

# General Instructions

## HOW TO READ THE CHARTS AND INSTRUCTIONS

There are 3 sizes given for each Pattern in KNITTING MAGAZINE. Above each Chart for the different sizes, you will see that the first and smaller sizes might be shown as 8/10, the second size as [12/14] and the third as [16/18]. Check the measurements at the bustline and hips on the Charts to be certain that you will knit the correct size, remembering these are ACTUAL measurements of the completed section and that there must be a bigger allowance at the bustline and hipline for a Jacket or a Coat than there would be for a fitted dress or a fitted blouse or pullover. The question in your mind should be "How do I want this garment to fit...?"

When you have chosen the size you need, you can follow the Charts as shown. You will notice that where the shapings are the same FOR ALL SIZES, only 1 set of shapings will be shown on the first Chart and if you are knitting the 2nd or 3rd size, you simply follow the shapings as given for the first size. If the shapings are different, this will be shown on the Charts and you should follow them as given.

On the Charts, increases and decreases will be shown as follows

5x1  
[6] The number in the box means number of ROWS between the shapings, while the 5x1 above the box means - 1 st. 5x... so you will increase or decrease 1 st. every 6th row 5x.

ARMHOLE SHAPINGS - NECK SHAPINGS - SHOULDER SHAPINGS - are made on every 2nd row UNLESS there is a number in a box along side or below the shapings. The rule is... where there is no box with a number, the shaping is made on every 2nd row.

## THE PRINTED INSTRUCTIONS

You can follow the printed instructions or use them in combination with the Charts. Where there is any question in the printed instructions, you have the Charts to show you how the section will look.

The 3 sizes, with the different amounts of cast on stitches and the different shapings will look like this...

Cast on 124 (136) [148] sts. You will  
Cast on 124 sts. for the first size.  
Cast on 136 sts. for the 2nd size.  
Cast on 148 sts. for the 3rd size.

The important thing to remember is that you MUST READ AHEAD so that you KNOW what to do for the size you are knitting. Sometimes where the number of stitches are the same but the number of times different, you will find shapings like this...  
3 sts. 1x (2x) [3x], 2 sts. 1x (2x) [3x], 1 st. 3x (4x) [5x].  
As you see, you MUST read ahead in order to follow the instructions as given for YOUR SIZE. The rows will be different for the different sizes in some cases... Shoulder and Neck shapings usually are worked at the SAME TIME for the back section - so watch for the words AT THE SAME TIME.

## HOLDING STITCHES ON THE LEFT SIDE WHILE SHAPING THE RIGHT SIDE

When knitting a section of garment in stockinette stitch, it is easy to hold the stitches on the left side while knitting the right half, but when knitting a Pattern Stitch such as a Norwegian Design, a Holding Position Design, Weaving, etc., you should use the following method. For the NECK SHAPING, we tell you to bind off the center sts.; put the needles on the left into holding position and complete the right half first... so with a strand of contrast yarn, knit ALL of the left side stitches manually by hand, pulling each stitch back against the needle bed to the OUT OF WORK position. When the right side is completed, carefully pull the stitches held on contrast, forward into working position and as you do so, undo the contrast yarn, line up the needles (KNITTING AM 3 machine owners, put the stitches under the sinkers) and complete the left half.

If you own a Japanese machine, you may find that when knitting the right half with the left side held in this way, the sinker plate will mark the left side while you are knitting the right half. To prevent this marking, you can tape a piece of paper over the knitting, underneath the sinkers, or if you own a Reversing Bar, you can hang this onto the Sinkers while you are knitting the right half. When hanging the Reversing Bar, be sure the eyes of the bar go BETWEEN the Sinker Posts on the upper part of the bar so that the tips of the bar only - show above the needle bed.

## FULL FASHION DECREASING OR INCREASING

For Stockinette stitch, always use the Full Fashion method for increasing or decreasing.

TO DECREASE: Hang the 3rd stitch onto the 2nd stitch then move the stitches in to fill the empty needle.

TO INCREASE: Move the 2 end stitches 1 needle outward, then pick up the 3rd stitch from the row below and hang it onto the empty needle.

FINISHING: Block all sections. For PULLOVERS, JACKETS, and DRESSES: Join front to back at sides and shoulders. Sew sleeves together and set in. Hem lower edge and sleeve edges if needed. For a double neckband or armhole band, sew 1 edge to the inside and 1 to the outside of neck or armhole. For a single ribbed band, sew 1 edge to the outside of neck or armhole edge. For a cardigan or jacket with buttonholes, finish buttonholes and sew on buttons.

PANTS: Join front to back at sides. Sew inside leg seams, then join center front and back. Make hem at waistline and insert elastic. Hem lower edge of pants legs.

## THE SAMPLE SWATCH

Before you begin to knit any garment, you will need to knit a sample piece using the yarn you have chosen for your garment, so that you can check the stitch and row gauge which must measure the correct number of stitches and rows in 5 cm (2 inches).

For each Pattern in KNITTING MAGAZINE, we give you 3 tension numbers to work from and if you use the specified yarn for the garment, you should be able to get the correct stitch and row gauge using one of these numbers. Here is a very easy way to make your sample swatch and count the stitches and rows without actually counting, by using our KNITTING CONVERTA TAPE.

Supposing the Tension Numbers for the Stitch and Row Gauge are given as 5 to 7. Set the Tension Dial to the first number which is 5. With contrast waste yarn, and using the quick cast on method, cast on 60 stitches and knit 10 rows. Change to garment yarn and turn the Row Counter to 0. Knit 30 rows. Counting from each end, knit the 10th stitch on each side by hand with a small piece of contrast yarn. Leave the needles in working position and knit 30 rows (Row 60), then knit 4 rows with contrast waste yarn. Turn the Row Counter to 0 and the Tension Dial to 6 and with garment yarn, knit 30 rows. Mark the 10th stitch on each side as you did before, knit 30 rows, then 4 rows with contrast waste yarn. Turn the Row Counter to 0 and with Tension 7, repeat the above once more, ending with 10 rows of contrast waste yarn. Remove the work from the machine by passing the Slide across the needles without yarn (sometimes called 'dropping'). Pull and stretch the sample piece both lengthwise and diagonally from corner to corner, then lengthwise again. Do not count the stitches and rows immediately, but allow the sample to rest for several hours or even over night. This will allow the stitches and rows to return to their basic form.

When your sample has rested and you are ready to count the stitches and rows, the KNITTING CONVERTA TAPE will do the counting for you without any counting on your part. Use the Tape as follows:

Measure the stitches with the TAPE, BETWEEN the 40 stitches marked with contrast waste yarn. Push the SLIDE so that the LEFT EDGE lines up to this exact measurement. Now look down along side the SLIDE and find the number 40 on the TAPE. The number directly opposite on the SLIDE will be your Stitch Gauge to 5 cm (2"). To find the number of rows in 5 cm (2"), place the TAPE to measure over the 60 rows, push the SLIDE to this number with the left edge lined up, the look for the number 60 on the TAPE and directly opposite this will be the number of rows to 5 cm (2")

If you do not own a KNITTING CONVERTA TAPE, you must mark a 5 cm (2 inch) square in the center of the knitting, then count the number of stitches and rows within the square.
