### broadly speaking

Our first 'knitting only' Stitchin' time was a resounding success, and we have many ideas to increase the total number of patterns during the coming year. For those of you who have been asked to renew their subscription recently, you will notice that we are sending a reply paid envelope. This is to speed up the subscription department and make it more efficient. Please help us by sending your subscription immediately and do not allow it to lapse a number of weeks. Though it may seem we are always mentioning this, it is really for your own convenience to avoid your missing any of the issues of the magazine.

There is an advert on page 35 for our postal course and this is for customers who have had their machines some considerable time or have bought them second hand and require lessons. This course is working successfully with our new customers and the final garments we have been seeing which have been designed by the customers, after completing the course, have been of the very highest standard. We are delighted with the success of the course and I am sure any customers purchasing the course will also be delighted. Please, if you decide to order this course, emphasise the model number of your machine as this will save confusion at a later date.

You will note that your subscription and renewal form is now no longer for club membership, but merely a subscription to a magazine.

(This is due to the new V.A.T. regulations—the cost of the magazine would have to go up unless it was treated merely as a magazine.)

In this issue, as a result of numerous requests from subscribers, we have included far more fashionable garments and a special section by Neville Rayner of the Leicester Polytechnic. In future issues we will be including designs as an experiment based on the continental method of writing patterns, where it is practically all diagramatic. This will be done with complete explanations and with a follow-up questionnaire to find out whether it is successful or not. This will give us a distinct advantage in terms of space and we will be able to increase the number of patterns per issue, thus giving you even greater value for money.

We would like to re-open the 'you write' page, but in fact have had very few letters in the nature of a 'chat' letter which we could print. So, here is an open invitation—if you have any interesting stories regarding knitting machines or about work you have produced from a knitting machine, drop us a line and we will publish the best.

N.B. CHARTS SUBMITTED BY DESIGNERS VARY DEPENDING ON WHICH MACHINE THE DESIGNER HAS USED. MOST PATTERNS USING EIGHT BUTTONS CAN BE DONE ON EITHER THE 588 OR THE 585. THE DIFFERENCES ARE

### FASHION FOR/MAT

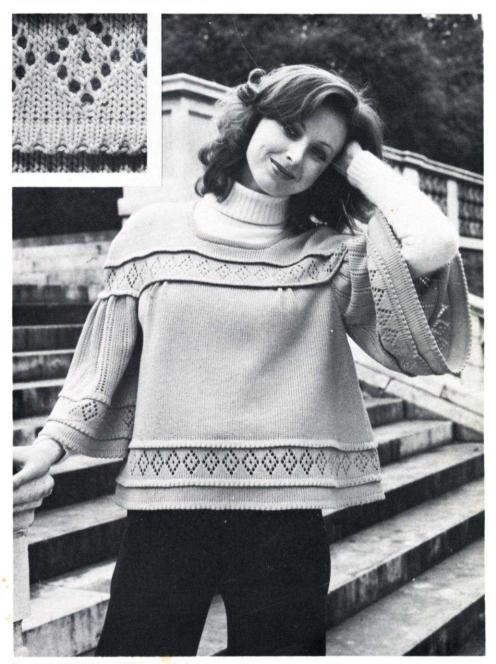

OUR NEW HIGH FASHION **SECTION** 

### by Neville Rayner

Neville Rayner is the Senior Lecturer in knitwear design at the City of Leicester Polytechnic in the School of Fashion and Textile Design. Leicester is the centre of the world of knitting and houses the finest school of knitwear in the country—the Leicester Polytechnic. Here, Mr. Rayner trains designers for industry and fashion and over the past 12 years has built up a tremendous department from nothing. He has, in the past, given us designs for the magazine and has had his designs published in leading magazines and also had them featured in The Times. He originally studied at the St. Martins School of Art in London and after leaving there spent some time in an Editorial Agency where designs for hand knitting and crochet were prepared for magazines and newspapers. He has a wealth of experience in design and we are sure you will appreciate his lovely designs. Most of his designs are extremely fashionable and we will try to grade them up for as many sizes as possible.

We will be printing articles written by Mr. Rayner in making-up and completion of garments which is a topic about which he feels very strongly. Machine knitting enables even a beginner to achieve good quality knitted pieces for a garment, and this is usually spoilt by very poor assembly. The professional finishes he obtains and demands from his students convince us that a little time spent on the sewing together of a garment is well worth the effort. We look forward to hearing from you regarding these designs and are eager for any suggestions for future designs which you may wish to make.
