editorial

We are carrying a full page advertisement in this issue for a new LINKING MACHINE... Its introduction will undoubtedly cause a sigh of relief among the thousands of machine knitters whose biggest and most tedious problem is the assembling of garments... Time and time again we are told by customers 'I love knitting on my machine but I hate putting the pieces together'... Take heart friends, relief is on the way. Get yourself one of our new Linkers and as soon as you do, your assembly problems will be over.

YOUR KNITTER NEEDS A LINKER LIKE YOUR WASHER NEEDS A DRYER....

All types of assembling can be done with the BELLINKY LINKER... You can join your side seams accurately and speedily and with the same yarn used in your knitting... You can turn an invisible hem... You can fit a neckline... sleeves... join squares or odd shapes together... insert horizontal or vertical panels... join suede, fur and other materials to your knitwear... neatly and accurately.

Every BELLINKY LINKER is precision made with a die cast aluminum body plus stainless steel, copper and heavy duty working parts... KNITTING worked with BELLINKY for almost a year in preparing English Instructions and in the testing of their excellent product in order to insure satisfaction among our customers... When KNITTING guarantees a product, you can depend on it 100%. Everybody at KNITTING is excited about the new BELLINKY LINKER - we just know that you will be too...

As this Editorial is being written, I have the layout of the next edition on my desk and it promises to be truly outstanding with emphasis on style and femininity... The photography is fantastic, the garments gorgeous and the instructions easy to follow. Watch out for it...

General Instructions

HOW TO READ THE CHARTS AND INSTRUCTIONS

There are 3 sizes given for each Pattern in KNITTING MAGAZINE. Above each Chart for the different sizes, you will see that the first and smaller sizes might be shown as 8/10, the second size as (12/14) and the third as [16/18]. Check the measurements at the bustline and hips on the Charts to be certain that you will knit the correct size, remembering these are ACTUAL measurements of the completed section and that there must be a bigger allowance at the bustline and hipline for a Jacket or a Coat than there would be for a fitted dress or a fitted blouse or pullover. The question in your mind should be "How do I want this garment to fit...?"

When you have chosen the size you need, you can follow the Charts as shown. You will notice that where the shapings are the same FOR ALL SIZES, only 1 set of shapings will be shown on the first Chart and if you are knitting the 2nd or 3rd size, you simply follow the shapings as given for the first size. If the shapings are different, this will be shown on the Charts and you should follow them as given.

On the Charts, increases and decreases will be shown as follows

5x1

6 The number in the box means number of ROWS between the shapings, while the 5x1 above the box means - 1 st. 5x... so you will increase or decrease 1 st. every 6th row 5x.

ARMHOLE SHAPINGS - NECK SHAPINGS - SHOULDER SHAPINGS - are made on every 2nd row UNLESS there is a number in a box along side or below the shapings. The rule is... where there is no box with a number, the shaping is made on every 2nd row.

THE PRINTED INSTRUCTIONS

You can follow the printed instructions or use them in combination with the Charts. Where there is any question in the printed instructions, you have the Charts to show you how the section will look.

The 3 sizes, with the different amounts of cast on stitches and the different shapings will look like this...

Cast on 124 (136) [148] sts. You will
Cast on 124 sts. for the first size.
Cast on 136 sts. for the 2nd size.
Cast on 148 sts. for the 3rd size.

The important thing to remember is that you MUST READ AHEAD so that you KNOW what to do for the size you are knitting. Sometimes where the number of stitches are the same but the number of times different, you will find shapings like this...
3 sts. 1x (2x) [3x], 2 sts. 1x (2x) [3x], 1 st. 3x (4x) [5x].
As you see, you MUST read ahead in order to follow the instructions as given for YOUR SIZE. The rows will be different for the different sizes in some cases... Shoulder and Neck shapings usually are worked at the SAME TIME for the back section - so watch for the words AT THE SAME TIME.

HOLDING STITCHES ON THE LEFT SIDE WHILE SHAPING THE RIGHT SIDE

When knitting a section of garment in stockinette stitch, it is easy to hold the stitches on the left side while knitting the right half, but when knitting a Pattern Stitch such as a Norwegian Design, a Holding Position Design, Weaving, etc., you should use the following method. For the NECK SHAPING, we tell you to bind off the center sts., put the needles on the left into holding position and complete the right half first... so with a strand of contrast yarn, knit ALL of the left side stitches manually by hand, pulling each stitch back against the needle bed to the OUT OF WORK position. When the right side is completed, carefully pull the stitches held on contrast, forward into working position and as you do so, undo the contrast yarn, line up the needles (KNITTING AM 3 machine owners, put the stitches under the sinkers) and complete the left half.

If you own a Japanese machine, you may find that when knitting the right half with the left side held in this way, the sinker plate will mark the left side while you are knitting the right half. To prevent this marking, you can tape a piece of paper over the knitting, underneath the sinkers, or if you own a Reversing Bar, you can hang this onto the Sinkers while you are knitting the right half. When hanging the Reversing Bar, be sure the eyes of the bar go BETWEEN the Sinker Posts on the upper part of the bar so that the tips of the bar only - show above the needle bed.

FULL FASHION DECREASING OR INCREASING

For Stockinette stitch, always use the Full Fashion method for increasing or decreasing.

TO DECREASE: Hang the 3rd stitch onto the 2nd stitch then move the stitches in to fill the empty needle.

TO INCREASE: Move the 2 end stitches 1 needle outward, then pick up the 3rd stitch from the row below and hang it onto the empty needle.

FINISHING: Block all sections. For PULLOVERS, JACKETS, and DRESSES: Join front to back at sides and shoulders. Sew sleeves together and set in. Hem lower edge and sleeve edges if needed. For a double neckband or armhole band, sew 1 edge to the inside and 1 to the outside of neck or armhole. For a single ribbed band, sew 1 edge to the outside of neck or armhole edge. For a cardigan or jacket with buttonholes, finish buttonholes and sew on buttons.

PANTS: Join front to back at sides. Sew inside leg seams, then join center front and back. Make hem at waistline and insert elastic. Hem lower edge of pants legs.

THE SAMPLE SWATCH

Before you begin to knit any garment, you will need to knit a sample piece using the yarn you have chosen for your garment, so that you can check the stitch and row gauge which must measure the correct number of stitches and rows in 5 cm (2 inches).

For each Pattern in KNITTING MAGAZINE, we give you 3 tension numbers to work from and if you use the specified yarn for the garment, you should be able to get the correct stitch and row gauge using one of these numbers. Here is a very easy way to make your sample swatch and count the stitches and rows without actually counting, by using our KNITTING Converta Tape.

Supposing the Tension Numbers for the Stitch and Row Gauge are given as 5 to 7. Set the Tension Dial to the first number which is 5. With contrast waste yarn, and using the quick cast on method, cast on 60 stitches and knit 10 rows. Change to garment yarn and turn the Row Counter to 0. Knit 30 rows. Counting from each end, knit the 10th stitch on each side by hand with a small piece of contrast yarn. Leave the needles in working position and knit 30 rows (Row 60), then knit 4 rows with contrast waste yarn. Turn the Row Counter to 0 and the Tension Dial to 6 and with garment yarn, knit 30 rows. Mark the 10th stitch on each side as you did before, knit 30 rows, then 4 rows with contrast waste yarn. Turn the Row Counter to 0 and with Tension 7, repeat the above once more, ending with 10 rows of contrast waste yarn. Remove the work from the machine by passing the Slide across the needles without yarn (sometimes called 'dropping').

Pull and stretch the sample piece both lengthwise and diagonally from corner to corner, then lengthwise again. Do not count the stitches and rows immediately, but allow the sample to rest for several hours or even over night. This will allow the stitches and rows to return to their basic form.

When your sample has rested and you are ready to count the stitches and rows, the KNITTING CONVERTA TAPE will do the counting for you without any counting on your part. Use the Tape as follows:

Measure the stitches with the TAPE, BETWEEN the 40 stitches marked with contrast waste yarn. Push the SLIDE so that the LEFT EDGE lines up to this exact measurement. Now look down along side the SLIDE and find the number 40 on the TAPE. The number directly opposite on the SLIDE will be your Stitch Gauge to 5 cm (2"). To find the number of rows in 5 cm (2"), place the TAPE to measure over the 60 rows, push the SLIDE to this number with the left edge lined up, the look for the number 60 on the TAPE and directly opposite this will be the number of rows to 5 cm (2")

If you do not own a KNITTING CONVERTA TAPE, you must mark a 5 cm (2 inch) square in the center of the knitting, then count the number of stitches and rows within the square.

PRACTICAL KNITTING HINTS

EVERY OTHER NEEDLE PUNCH CARDS

When you have a Pattern for EVERY OTHER NEEDLE, it is very important for you to TRY THE PUNCH CARD before beginning a garment. Bring up EVERY OTHER NEEDLE - set your Punch Card. If the Pattern is incorrect - or you do not get a pattern, put the working needles OUT OF WORK and try the ALTERNATE NEEDLES.

TO MAKE A TWISTED CORD

Cut yarn at least 6 times the length you need for a cord. When it is folded in half and looped over a doorknob, it will be 3 times the length you need. You can use as many strands of yarn you wish for the thickness you want. Loop center of folded yarn around a doorknob and tie the other ends to the center of a pencil. Stand across the room, pulling the yarn strands taut. Twist the pencil round and round and as you twist, the yarn will also twist. Keep turning the pencil until the yarn begins to kink. Slide scissors handle down to center of cord and remove the yarn from the doorknob. Hold yarn end UP so that the two parts of cord will twist around each other. Tie each end and cut. If you are making a long cord, it is best for two people to work together - each twisting an end on a pencil. Bring the pencils together and one person hold them while the other grasps center of yarn and slides hand down, releasing at short intervals and allowing yarn to twist evenly to form the cord.

You can also use a small hand drill for twisting the cord. Simply insert the ends in place of a bit, tighten and turn the hand drill - quick too..

KNITKING FIGHTS INFLATION...

We are certain that most of our readers are aware of what is happening to the American Dollar in comparison with foreign currencies and how it is affecting the price of knitting machines and accessories... It seems just a few short years ago that there were 4 German Marks to the Dollar, currently there are approximately 2... This means that even if the price of German made products remained the same, (they of course have not) they would still cost us twice as much. Additionally custom duty is double, insurance and freight rates are more than double, the cost of living increases every year and as a consequence wages continue in an upward spiral, advertising costs seem to increase with every insertion...etc.

It does not seem very long ago that a first class letter was 3¢ for the first ounce... and in less than 5 years, the cost of mailing this magazine to you has tripled... A little over one year ago, it was possible to buy over 300 Japanese Yen for \$1.00. Now a dollar gets you around 240 Yen and it is still going down... Small wonder indeed that your knitting machines and accessories are costing you more and more... but... read on dear friends and discover that by doing business with KNITKING, you will save dollars with every purchase you make.

KNITKING FIGHTS INFLATION...

For several months now, much time has been taken up by KNITKING'S Board of Directors meetings analyzing operating costs, profit and loss statements, etc. etc... In order to determine how KNITKING can fight inflation as it applies to the Home Knitting Machine industry with special considerations for our substantial number of loyal, and regular customers. (U.S. readers will receive an additional 4 pages of advertising in this issue of KNITKING MAGAZINE that will reflect our determination to fight inflation... KNITKING MAGAZINE goes out to 14 different countries and as our prices are for the U.S. market only, it would be a waste of time and money to include these 4 extra pages in all copies that go abroad).

It is customary in the U.S. for knitting machine importers to appoint distributors around the country. The distributors in turn are supposed to stock machines and products for sale to their own appointed dealers who sell direct to the public and insure that personal and individual instruction is available for every knitting machine purchaser.

It is unlikely that any knitting machine importer has ever made the Distributor division of their business function satisfactorily and KNITKING has tried harder than most... We have therefore decided that we will no longer use Distributors as intermediaries, we will sell direct to the consumers through our competent dealers and we will make new dealer appointments wherever possible. By doing this we eliminate distributor profits which can be turned over to the consumer in the form of reduced prices... All KNITKING dealers are expected to have the ability and the facility to teach customers how to operate their knitting machines.

KNITKING already has a network of teachers (who do not sell machines) throughout the U.S. but we need more. If you would like to earn extra money just teaching knitting machine owners how to operate their machines, write to us... It could be the start of a whole new career for you.

For over 20 years, KNITKING has arranged financing (throughout the U.S.) for the purchase of knitting machines and every year we write off thousands of dollars of bad debts caused by skips, bankrupts, and people who just won't pay their bills. These bad debts increase our operating costs and as a consequence the price of merchandise to the consumer... We will continue to accept Visa and Mastercharge Cards but no more 12 or 24 month contracts. If a customer's credit is good, he or she will experience no problem in obtaining credit in the form of a loan from a local bank or finance company... Again, savings will be passed on to our customers in the form of reduced prices.

We cannot however prevent the continuation of inflation, so if you live in this wonderful U.S.A., check our Special Sale Brochure in this issue and order as much merchandise as you can afford NOW...
