editorial

This is a very special Editorial . . . Because it is so special, we ask that you read it in its entirety . . . We believe that what we are going to tell you will mark the greatest advance in knitting machine operation and function since the introduction of hand knitting machines by KNITKING over twenty-five years ago.

The last twenty-five years has seen many tremendous improvements in design and mechanisms of hand knitting machines. They have gone from hand operated basic stockinette machines that required great skill, cast on combs and weights plus tremendous patience on the part of the operator, through the multiple push-button phase with up to forty controls on a machine, a combination of four to six of which had to be moved in the correct sequence every time a pattern stitch was made, up to some modern machines that function entirely with "punch cards" and the fantastic new AM 3 KNITKING, the only Cam operated hand knitting machine in the world . . . !!

An absolutely unlimited number of fancy stitches and designs can be made on the AM 3 and you do not need punch cards, cast-on combs, weights or innumerable controls . . . Insert a Cam and then with one Central Control Knob (set it once, it automatically resets itself) you produce the Pattern Stitch needed . . . With one Button Control, you never have to memorize what button you pushed last and KNITKING machines knit with any weight of yarn from fine crochet cotton to heavy thick and thin or loopy yarns . . . The KNITKING P3 Ribber is inserted with one movement of the hands and it too, is controlled by the one Central Control on the Main Machine . . . KNITKING Ribbers never need complicated cast-on combs or weights and yet they knit many thousands of fancy ribbed stitches easily and automatically.

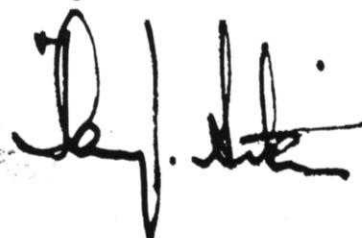

Throughout this entire period of time, KNITKING through its parent company in West Germany has been the trend setter, the company that designs knitting machines entirely with the operator in mind and provides complete service to the machine knitter in the form of Patterns and Pattern Magazines . . . instruction and practical knitting hints . . . plus yarns, etc. . . Buy any brand of knitting machine other than KNITKING in North America and you invariably design your own garments, chart your own garments or you alter KNITKING patterns or hand knit patterns in order to satisfy your needs . . . There are many talented machine knitters that do this happily and efficiently, but they are in the minority . . . It is the aim of KNITKING to satisfy the demands of all machine owners and

to provide a Pattern Service that will make and keep them happy irrespective of the brand of machine they own . . . Which brings us to our new innovation . . . A Pattern Reader (sometimes called a Charting Machine) that can be adapted to practically any type of machine . . . PLUS . . . and it is a VERY BIG PLUS . . . a continuing Pattern Chart Service.

Many readers will say that Charting Machines have been on the market for two or three years now and we will, of course, agree with them, but again, if you bought a Charting Machine, it was necessary to draw your own charts before you could use your machine and again, few people have sufficient engineering skill and talent to prepare their own charts with the result that most Charting Machines are unused.

We have been developing our Pattern Reader for several years now. We could have introduced the device itself sometime ago but we deliberately refrained from doing so until we were able to launch a complete Pattern Service for our Pattern Reader . . . Well, we have done it . . . and the time is NOW . . . The WHIZ KING PATTERN READER is here and ready to solve the biggest problem in regard to the operation of knitting machines .!! KNITKING will supply Charts from KNITKING MAGAZINE garments in the size of your choice . . . You insert a Chart in your WHIZ KING PATTERN READER (just as you would a piece of paper in a typewriter) and your knitting follows the lines of the Chart . . . You no longer need worry about rows or row numbers . . . You increase or decrease whenever your WHIZ KING tells you to without referring to written instructions at all . . . Read your Chart and by following the lines on it, you will produce knitting without errors . . . evenly and speedily . . . Even the complete newcomer to machine knitting (after learning the basic operation of her machine) can confidently go immediately into the production of garments . . . Nothing quite like this has ever been done before and KNITKING is proud to be the company that is doing it . . . With the WHIZ KING PATTERN READER, the knitting of complete garments has been simplified beyond belief and we forecast that with its introduction, many thousands of heretofore unused knitting machines will be removed from storage and put into operation . . . There will be renewed zest and enthusiasm for knitting machines.

One of the many remarkable features of the WHIZ KING is its relatively low price . . . Lower than any other charting machine on the U.S. market and with the only complete charting service available . . . The price is \$49.50 . . . You get some practice charts with your WHIZ KING, plus an Instruction Book and a book illustrating fifty garments for all members of the family and for which Charts in a variety of sizes are immediately available . . . There will be a nominal charge for each set of Charts and it will vary according to the number of pieces to a garment . . . A simple sleeveless Sheath, for example, will only need two Charts (one for each of the pieces). A complete outfit will need several Charts and will cost a little more . . . If, however, you knit your garments with the beautiful KNITKING YARNS that the original KNITKING MAGAZINE garments were made with, we will furnish Charts FREE OF CHARGE . . . !! Please go ahead . . . order your WHIZ KING PATTERN READER now and be one of the first to acknowledge it as the greatest innovation since KNITKING'S original Hand Knitting Machine.

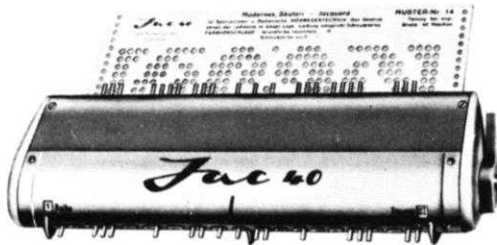

HP 3681 and HP 3682 — For his leisure time, your Sportsman will be delighted to wear a striped Pullover (HP 3681) with a high turtle neck Collar . . . The sharp looking Jacket (HP 3682) boasts the very new fuller Sleeve treatment with snug Cuffs. Large pockets have buttons on the flaps. Both garments are made with the same yarn. Size 40 and 42 with KNITKING Allegro; Size 46 with Dolly Dralon.

DP 8106 — Uneven stripes on a Pullover are flattering . . . especially when the stripes are separated with a solid color Yoke to frame a pretty face. Tiny buttons go two-by-two at the neck opening. Size 8 is knitted with KNITKING Beatrice; Size 12 and 14 with Regia.

The instructions are the same for all sizes. PATTERN: PULLOVER: Knit 1, Purl 3, Ribbing (1 st. on the ribber and 3 sts. on the main machine) according to Line Drawing 1. EDGES: K1, P1, Ribbing. BOLERO: Holding Position Design according to Line Drawing 2. Use Wheel No. W3 and push in the right Needle Retractor Button. INCREASES: Place the end st. from the row below onto the next empty needle. DECREASES: Hang the 1st st. onto the 2nd st. When working the Pullover, transfer the ribber sts. to the main machine before putting the appropriate needles into hold. Bind off all bands the crochet method for ribbing.

FINISHING: Block all sections. (Dampen only, do not iron). PULLOVER: Join front and back section at sides and shoulders. Sew the sleeves together and set in. Join short ends of the collar, then sew 1 edge of collar to inside and 1 edge to outside of neckline. BOLERO: Join back and front sections at sides and shoulders. Join the proper band sections, then bind the armhole edges and all edges of bolero.

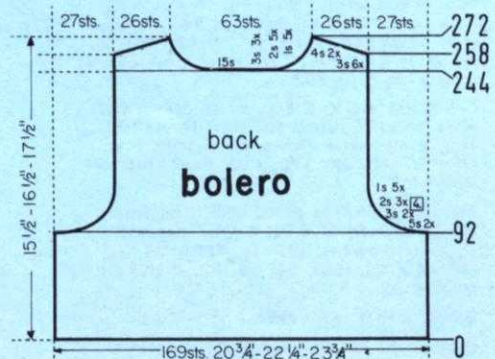

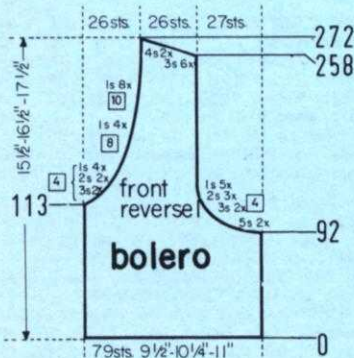

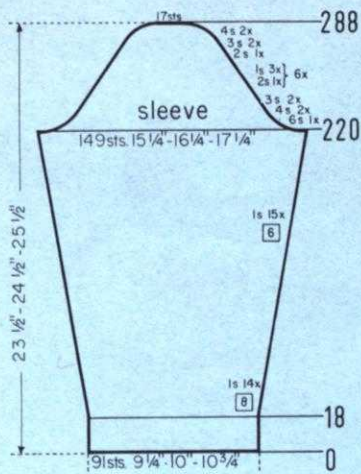

Work the second front section with reverse shapings. Cast on the regular way, then knit 1 row in PATTERN to the left side, turn the Row Counter back to 0 and follow the instructions as written. (Cam Box will be on the LEFT side at even numbered rows).

ON CAM BOX SIDE, bind off 5 sts. after Rows 92, 96 (EVEN ROWS = ARMHOLE SHAPING); 3 sts. after Rows 100, 104; 2 sts. after Rows 108, 112; 3 sts. after Row 113 (ODD ROWS = NECK SHAPING); 2 sts. after Row 116; 3 sts. after Row 117; 1 st. after Row 120; 2 sts. after Row 121; 1 st. after Row 124; 2 sts. after Row 125; 1 st. after Rows 128, 129, 132, 133, 136, 137, 141, 145, 153, 161, 169, 177, 187, 197, 207, 217, 227, 237, 247. For SHOULDER bind off 3 sts. after Rows 258, 260, 262, 264, 266, 268; 4 sts. after Rows 270, 272.

ROWS 0 to 92: Knit even.

Cast on 79 sts. with color 2 and work the Holding Position Design.

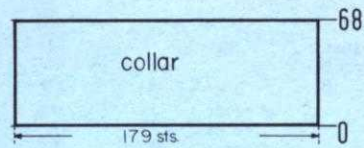

ON CAM BOX SIDE, bind off 6 sts. after Rows 220, 221; 4 sts. after Rows 222, 223, 224, 225; 3 sts. after Rows 226, 227, 228, 229; 2 sts. after Rows 230, 231; 1 st. after Rows 232, 233, 234, 235, 236, 237; 2 sts. after Rows 238, 239; 1 st. after Rows 240, 241, 242, 243, 244, 245; 2 sts. after Rows 246, 247; 1 st. after Rows 248, 249, 250, 251, 252, 253; 2 sts. after Rows 254, 255; 1 st. after Rows 256, 257, 258, 259, 260, 261; 2 sts. after Rows 262, 263; 1 st. after Rows 264, 265, 266, 267, 268, 269; 2 sts. after Rows 270, 271; 1 st. after Rows 272, 273, 274, 275, 276, 277; 2 sts. after Rows 278, 279; 3 sts. after Rows 280, 281, 282, 283; 4 sts. after Rows 284, 285, 286, 287; 17 sts. after Row 288.

ON EACH SIDE, increase 1 st. after Rows 18, 26, 34, 42, 50, 58, 66, 74, 82, 90, 98, 106, 114, 122, 130, 136, 142, 148, 154, 160, 166, 172, 178, 184, 190, 196, 202, 208, 214, then knit to Row 220.

WHIZ KING PATTERN READER

Did you notice the Advertisement on the inside Front Cover of this issue... and did you read the Editorial on the first page...? We want to be sure that you know about the remarkable new accessory KNITKING is introducing and that you understand the complete Charting Service we are offering with it.

The WHIZ KING PATTERN READER is designed to enable you to knit the garment of your choice in the size you desire... All the preliminary work... the designing of the garments and the drawing

of the Charts in various sizes is done by KNITKING... all you have to do (once you own a WHIZ KING PATTERN READER) is to feed a Chart into the Reader and knit...! You read the Chart as it automatically revolves by following the outline of your garment sections... You make your increases and decreases, darts and shapings, etc., on the correct rows with complete accuracy and without reference to written instructions and without even using your Row Counter.

Knitting with a WHIZ KING PATTERN READER is so incredibly simple that once you use it, you will never want to return to the old methods... Your WHIZ KING will speed the completion of garments tremendously because once you start, you will not have to repeatedly refer to written instructions... You will not need to take your eyes off your knitting machine until the completion of each garment section... and you can be confident that all garment sections will fit together when completed.

The designing of a simple uncomplicated, yet versatile Pattern Reading Device (like the designing of a KNITKING, fully versatile, easy to operate one button knitting machine) was a project that challenged the skill and ingenuity of our top notch development staff working in collaboration with our garment Designers and expert Knitters... Several prototype machines were made and rejected before tooling up to proceed with WHIZ KING and technical experts from the world wide distribution

center of KNITKING machines were involved in its development... It was even necessary to design a completely new graph paper on which to draw original Charts... Traditional geometric squares are not satisfactory because a stitch is almost always greater in width than in height (for example, a yarn may produce 8 stitches and 11 rows to an inch) so, we designed a special graph paper with rectangles instead of squares with each rectangle representing a stitch... It took a Computer to decide the perfect shape and size of each rectangle... and the Pattern Reader had to be synchronized so that every time you push your Cam Box across your machine, your Pattern Chart revolves exactly one row, not a fraction more or a fraction less

We could get carried away and elaborate more on the skill and know how that has gone into the development of the WHIZ KING PATTERN READER, but we believe that most knitting machine owners will be interested mainly in its efficiency and simplicity of operation... As we said in our Editorial, we believe that the WHIZ KING PATTERN READER will mark the greatest advance in home knitting machine operation since the introduction of the first KNITKING over 25 years ago.

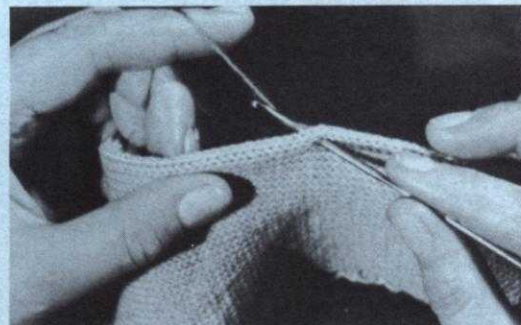

Order your WHIZ KING today and if you intend to use it on a knitting machine of a brand other than KNITKING, be sure to tell us the brand and Model Number.

PRACTICAL KNITTING HINT

The Skirt for Pattern No. DK 8107 in this issue, is made in sections that are woven together, then a slip stitch crochet is worked over the center stitch of each panel so that pleats will fall into place. We have taken copy from our "Practical Knitting Hints Book" to show you exactly how this is accomplished.

Slip Stitch Crochet for Creases and Pleats

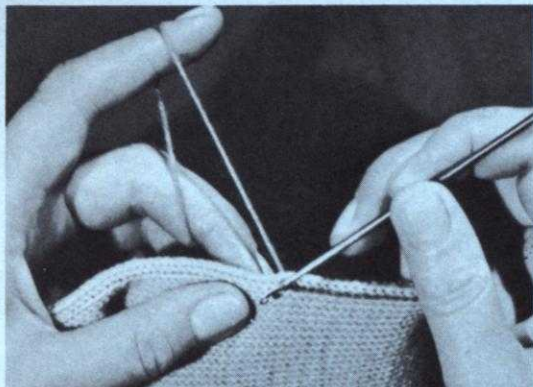

Oftentimes instructions for patterns tell you to slip stitch crochet up or down on knit stitches to create a definite fold line. In order to do this, fold your knitting with the stitches that are to be crocheted off as your fold line. First form a loop on your crochet hook. Now insert the crochet hook through your knitting as shown in Illustration 1. Catch the yarn and pull this loop through

Illus. 1

your knitting and through the loop on the crochet hook. Continue inserting the hook through each row of the knitting, catching the yarn and pulling the loop through the knitting and through the loop on the hook. Crochet stitches formed in this manner will conform to the knitted stitches as shown in Illustration 2. We recommend using a crochet hook that is not too large,

and is of suitable size according to the yarn you are using. Pull the yarn firmly each time a stitch has been formed, otherwise the fold or crease line will expand and will be longer than the rest of your garment. Depending on how pronounced you want the fold line to be, a width of 1, 2 or 3 stitches can be crocheted off. The width most suitable can be determined when the stitch gauge is made.

Illus. 2

Stitches that are to be crocheted off will obviously make a difference by that number of stitches in the width of the garment, especially if many fold lines are to be made as in a pleated skirt. These stitches have to be considered when figuring the pattern. Crocheted fold lines are also very attractive on trouser creases and give a very nice accent to skirts.

CORRECTION TO COPY in NOV/DEC KNITTING MAGAZINE

An error occurred in the setting of the Captions to the pictures on pages 6 and 7 of the November, December 1972 KNITTING MAGAZINE and the Pattern Numbers were over the wrong pictures. The Pattern Numbers and instructions on page 16 are correct however... Sorry if we confused you and thanks to the readers who pointed out the error...

OUR READERS WRITE

We still receive letters asking about SHORT ROWS and how to knit them on a machine... There are different methods for knitting Short Rows... and the method you use should depend on where the Short Rows are to be placed... and on WHAT....

METHOD No. 1: This is the first and BASIC type of Short Rows... the one you will use for Bust Darts; to shape the lower section of an "A" line Skirt; for shaping Armholes and Necklines... in fact, it can be used for ALL Short Rowing... using any number of stitches... anyplace... on anything... for it barely shows in your knitting... leaves no holes and is the best all around method. It takes a bit more time because you must wrap the INSIDE NEEDLE in holding position on every row. It is ALWAYS worked by placing a specified number of needles OPPOSITE CAM BOX into holding position for a specified number of rows and then bringing a specified number of needles OPPOSITE CAM BOX back into working position. If you are not familiar with Short Rows, and their variations... make some practice samples of each type and keep them for future reference. Use 3-ply sport weight yarn for all samples and Tension 5 or 6.

1. BUST DARTS: Cast on 50 sts. Knit 20 rows. Work Short Rows: ON OPPOSITE SIDE OF CAM BOX, put 5 needles into holding position, knit across, then bring the yarn UNDER the inside needle in holding position so that the yarn will go over the shank of the needle when you knit the next row. ON OPPOSITE SIDE OF CAM BOX, put 5 needles into holding position, knit across, bring the yarn under the INSIDE NEEDLE as you did before and continue to bring 5 needles OPPOSITE CAM BOX into holding position, knit across, wrap yarn...until you have 20 needles ON EACH SIDE in holding po-

sition. Now bring ALL the needles back into working position before knitting the next 2 rows. Knit 20 rows, bind off. Pull your knitting into shape so that you can see the sample BUST DART. You will note that there are MORE ROWS in the CENTER part of the knitting - which is exactly what you need for the bust shaping of a garment. If your garment is to be worn on the PURL SIDE, when wrapping the inside needle in holding position, lift the stitch with a transfer tool from that inside needle and wrap the yarn around the shank of the needle, then put the stitch back on to needle - be sure to leave it in holding position. This places the wrapping in BACK on the knit side so it will not show on the Purl side.

In the November/December issue of KNITTING MAGAZINE, we told you about using Short Rows for the shaping of armholes and necklines.... so get out your copy and refresh your mind.

2. SHAPING A HEEL or TOE: Cast on 35 sts. Knit 20 rows. If you made the sample swatch above, you already know about wrapping the yarn around the inside needle, so we won't repeat the instructions for doing it here... just remember to wrap the yarn each time. ON OPPOSITE SIDE OF CAM BOX, put 1 needle into holding position before knitting the next 24 rows (11 sts. left in work) - wrap yarn each time. Now ON OPPOSITE SIDE OF CAM BOX, bring back into working position, 1 needle before knitting the next 24 rows (remember to wrap the yarn)... All needles are now in work. Knit 20 rows, bind off. Pull the knitting into shape, and look at the heel (or toe) you have just knitted.

When you want HOLES as part of a Design, such as in an Afghan, or Pillow... this same method for knitting Short Rows is used but without wrapping yarn around the inside needle... just bring the specified number of needles OPPOSITE CAM BOX into holding position before knitting each row, then return them as specified...no wrapping of any kind.

3. SHAPING THE BOTTOM OF AN "A" LINE SKIRT OR DRESS.

When knitting an "A" line Skirt, always knit the under side of HEM, then the specified ROWS for hem before shaping the sides. If you like, you can knit the UNDERSIDE of a hem at one tension lower than the garment tension. Cast on 50 sts. Knit 30 rows. Hang the hem by picking up each cast on stitch and place the sts. onto the needles behind the latches. Knit 1 row using 1 or 2 tensions higher than garment tension, turn the tension back to garment tension and knit 1 row. ON OPPOSITE SIDE OF CAM BOX, put 16 needles into holding position before knitting the next 2 rows (wrap yarn each time). ON OPPOSITE SIDE OF CAM BOX, bring back into working position 4 needles before knitting the next 8 rows (wrap yarn). Knit 20 rows, bind off. Remember this is only a sample swatch... your Skirt or Dress will have far more stitches and the number of stitches and rows used for shaping the sides will be more. Pull sample into shape and you will see the "A" line is SHORTER on the sides than in the middle and the shaping goes from the center OUT and UP which is a different shaping than the Bust Dart. If you do not want a hung hem... cast on, then start the Short Rows immediately, and hem up later.

There are many variations of spacing of stitches. The number of needles you put into holding position and the number you will bring back into working position depend on what you are knitting, and the shaping you wish.

Watch for the next issue of KNITTING MAGAZINE Practical Knitting Hint... In it we will tell you two alternate methods.

NOTES TO KNIT BY . . .

STITCH AND ROW GAUGE

KNIT A SAMPLE SWATCH . . . before you begin to knit any garment . . . for this is the MOST IMPORTANT STEP toward the correct size and the proper fit of any garment you wish to make. You MUST use the SAME YARN for your sample swatch that you will use to knit your garment and your sample swatch must be knitted large enough and using several different tension numbers on your machine. When you have done this, then you can determine the number of stitches and the number of rows in a two-inch measure. KNITTING MAGAZINE PATTERNS give you 3 tensions to try and one of them should give you the correct stitch and row gauge if you are using the yarn we recommend or a similar weight yarn. Here is the way to make your sample swatch.

Cast on over a sufficient number of needles to produce a swatch at least 4 inches wide. (If the pattern calls for 16 stitches to 2", then $16 \times 2 = 32$ stitches to cast on). Now knit 4 inches of rows at the first suggested tension number. (If the pattern calls for 22 rows to 2", $22 \times 2 = 44$ rows to knit). Knit 2 rows using a contrast color, change to the next higher tension and with garment yarn knit another 4", knit 2 rows with contrast color, change to the 3rd higher tension and knit another 4" and then bind off.

Roll the swatch into a cylinder over its length and pull on both ends, unroll it and stretch it diagonally by pulling on the four corners. Allow the swatch to rest and settle (preferably overnight) and then using a stitch gauge or a ruler, count the number of stitches over a 2" width, then the number of rows over a 2" length in EACH of the 3 tensions. Select the tension number that produces the stitches and rows called for in the pattern. If none of them are correct, you are most likely using the wrong weight of yarn.

READING OF CHARTS

You will notice the instructions start at the bottom of the Chart and work UP. Follow the charts exactly as written and providing your sample stitch and row gauge is correct, your garment will come out the right size. Please remember that the section of garment as it is knitted on the machine, faces the same way as the Charts are in this magazine. Where two front pieces are needed, (or any other part of a garment that needs two sections) only one section is normally shown and the second section is usually made with reverse shaping. Set in sleeves are usually identical, but raglan sleeves have to be knitted with reverse shaping for the second sleeve.

READING OF SYMBOLS

To simplify Pattern Knitting, we use Symbols in the Line Drawings and the Chart Diagrams. In the Line Drawings the symbols are shown and are to be read as you look at them while knitting a garment. For instance, if

a Purl stitch faces you, the Purl stitch Symbol  is shown; if a knit stitch faces you (as when using the Ribber) then this Symbol  is shown. The Symbol  at the top of the Line Drawing is the center of the garment section and you use this as a guide for setting up the needles.

The following Symbols    are used for Eyelet Designs in the Line Drawings and also for Full Fashion shaping on the Charts. The Line Drawings have row numbers on the right side. Missing Row numbers are always knitted straight or plain.

In Holding Position Designs  selected needles are pushed into holding position for the stated number of rows. The numbers of rows appear at the right of the Line Drawings; Example: 1-4 means knit Rows 1 to 4; 5 to 7 means knit Rows 5 to 7, etc. This same Symbol is also shown on the Charts and is used for putting needles into holding position for Short Rows. The

Symbol  on the Charts is used to put needles back into working position when knitting Short Rows.

A number in a box stands for the number of rows to be knitted between shapings. Make shaping first, then knit the necessary number of rows. If for instance it reads:

1 st. 8 x

 1 st. 10 x

As you will be reading the instructions from the bottom up, here is the way you will follow them: . . . Decrease or increase (depending on the direction of the garment outline) 1 st. at the row where the shaping begins, then knit 8 rows, make the next decrease, then knit 8 rows, until you have decreased (or increased) 1 st. 10 x and you have knitted 8 rows after each decrease (or increase) (1 st. 10 x +8 rows 10 x). Now begin the first decrease (or increase) for the shaping (which has to be made 8 x) in every 6th row. Decrease (or increase) 1 st. first, then knit 6 rows until you have decreased 1 st. 6 x and after each decrease (or increase) have knitted 6 rows (1 st. 8 x + 6 rows 8 x).

Where shapings are given without a boxed number as on most armholes, necklines, etc., make the shapings on every second row (on each side of course).

PATTERN STITCH SYMBOLS

 = knit stitch

 = purl stitch

 = empty needle (leave in working position)

 = needle not used (in the out of work position)

 = needle in the holding position

 = Needles back into working position.

 = 2 stitches on 1 needle — either transferred from the right side or the left side, then put the needle into holding position

 = needle holding 2 stitches. Stitch has been transferred from the LEFT

 = needle holding 2 stitches. Stitch has been transferred from the RIGHT

 = 3 stitches on 1 needle. The 1st and 3rd stitch in a group of 3 needles has been hung on the 2nd or center needle.

 = Center of Garment Section.

 = Number of rows to be knitted between shapings.

The diagrams (Line Drawings) for pattern work are followed just as they are shown and are to be read as you look at them while knitting the garment.
