## Abkürzungen

|      |                                    |   |   |
|------|------------------------------------|---|---|
| I    | = Rücken                           | A | = mm 40 R   |
| IIa  | = Vorderteil mit rundem Ausschnitt | B | = mm 40 M   |
| IIb  | = Vorderteil mit V-Ausschnitt      | C | = mm 40 R Bund  |
| IIIa | = langer Ärmel                     | 1 | = cm Hüftumfang beim Anschlag<br>cm Ärmelweite beim Anschlag  |
| IIIb | = kurzer Ärmel                     | 2 | = cm Oberweite<br>cm Ärmelweite (Achtung, darf nur verändert werden, wenn auch Oberweite verändert wird.) |
|      |                                    | 3 | = cm Totallänge   |

## Mindestmass der Maschenprobe

Bei manchen Programmen finden Sie eine Angabe, die wie folgt aussieht:  
**«mm 40 M > = 144»**, das heisst, dass die Maschenprobe von 40 Maschen für dieses Modell mindestens 144 mm messen muss.

Wenn Sie jedoch die Oberweite vergrössern wollen, muss natürlich auch die Maschenprobe entsprechend grösser sein.

## Blinkzahlen

Für die Bedeutung der Blinkzahlen 1–5 siehe Bedienungsanleitung FORM COMPUTER Seite 13 und 14.

**Blinkzahl 7:** Abnäher stricken mit verkürzten Reihen oder mit Abnehmen, je nach Muster.

**Blinkzahl 8:** Abnäher zu Ende, d.h. wieder mit allen Nadeln arbeiten oder wieder soviel Maschen anschlagen, wie sie für den Abnäher abgekettet haben.

Abnäher kommen bei den Damenpullovers ab Grösse 50 vor.

## Bündchen für Halsausschnitte und Jackenkanten

### Beispiel 1

Man kann ein Bündchen quer oder längs stricken, d.h. man schlägt entweder viele Maschen an und strickt wenig Reihen (Beispiel 1) oder man schlägt wenig Maschen an und strickt viele Reihen (Beispiel 2). Für beide verwenden Sie das nebenstehende Programm und setzen immer dort, wo «x» steht, **das Mass in cm** ein, das Ihr Bündchen an dieser Stelle haben soll. Bei «y» setzen Sie **das Mass in cm** ein, das Ihr Bündchen dort haben soll.

|     |
|-----|
| 80  |

| 6   |
| 6   |
| y   |
| 0   |

### Beispiel 2

## Was geschieht, wenn Masse verändert werden?

**Achtung:** das Mass für die Oberweite im FORM-COMPUTER-Programm ist ein Körpermass, auf dem Schnittmuster können Sie sehen, welchem Mass im Gestrick das entspricht.

## Vergrösserung des Hüftumfangs beim Anschlag:

Der Pullover wird unten soviel cm weiter, wie Sie zum vorgegebenen Mass hinzugefügt haben. Wenn Sie die Oberweite nicht vergrössern, werden die hinzugefügten Maschen bis zum Armloch wieder abgenommen.

## Vergrösserung der Oberweite:

Der Pullover wird oben soviel cm weiter, wie Sie zum vorgegebenen Mass hinzugefügt haben. Die hinzugefügten Maschen werden im Armloch wieder abgenommen, die Schultern bleiben immer gleich breit.

## Vergrösserung oder Verkleinerung der Totallänge

Der Pullover wird zwischen Bund und Armloch um die cm verlängert oder verkürzt, um die Sie das vorgegebene Mass verändert haben. Die Höhe des Armloches bleibt immer gleich.

## Veränderung des V-Ausschnittes

Das Kreuz beim Programm IIb bezeichnet die Zahl, mit der Sie die Tiefe eines V-Ausschnittes verändern können. Wenn Sie 1 dazuzählen, wird der Ausschnitt  $\frac{1}{2}$  cm tiefer, wenn Sie 1 abzählen, wird der Ausschnitt  $\frac{1}{2}$  cm weniger tief.

**Achtung:** diese Zahl darf nur in dem angegebenen Bereich verändert werden, z.B.  $x = 1-35$

## Wie macht man aus einem Pullover eine Jacke?

Zählen Sie zu der zweitobersten Zahl des Programmes für das Vorderteil 256 hinzu und tippen Sie das Ergebnis anstelle der ursprünglichen Zahl ein (z.B. 417 statt 161). Denken Sie daran, dass es je nach dem, wie Sie Ihre Jacke tragen wollen, günstig sein kann, die Jacke eine Nummer grösser zu stricken als den Pullover.

## Abbréviations:

|      |                                   |   |                                 |
|------|-----------------------------------|---|---------------------------------|
| I    | = dos                             | A   | = mm 40 rgs                     |
| IIa  | = devant avec encolure<br>en rond | B   | = mm 40 m.                      |
| IIb  | = devant avec décolleté<br>en V   | C   | = mm 40 rgs bord                |
| IIIa | = manche longue                   | 1   | = cm tour de hanches au montage |
| IIIb | = manche courte                   | cm largeur de manches au montage                                |                                 |
|      |                                   | 2   | = cm tour de poitrine           |
|      |                                   | cm ampleur de manches (attention, ne                            |                                 |
|      |                                   | peut être changé que si le tour de poitrine<br>ne l'est aussi). |                                 |
|      |                                   | 3   | = cm longueur totale            |

## Echantillon minimum

Pour de nombreux programmes, vous trouvez une indication de ce genre:  
**«mm 40 m > = 144»**, c'est-à-dire que l'échantillon correspondant à ce modèle doit mesurer au minimum 144 mm pour 40 mailles.

Cependant, si vous désirez agrandir le tour de poitrine, il faudra évidemment que votre échantillon soit plus grand.

## Chiffres clignotants

Vous trouverez l'explication des chiffres clignotants 1 à 5 dans le mode d'emploi du FORM COMPUTER aux pages 13 et 14.

Chiffre clignotant 7: tricoter les pinces soit en dégradés soit en diminuant selon point utilisé.

Chiffre clignotant 8: fin des pinces, c.-à.-d. qu'on travaille de nouveau avec toutes les aiguilles ou qu'il faut monter le nombre de mailles qui ont été diminuées pour la pince.

Des pinces sont prévues pour les pullovers de dame à partir de la taille 50.

## Bordures pour tour de cou et lisières de jaquettes

### Exemple 1

Les bordures peuvent être tricotées soit en largeur, soit en longueur, c.-à.-d. qu'on monte soit beaucoup de m. mais qu'on tricote peu de rgs (exemple 1) ou bien, on monte peu de m. et on tricote beaucoup de rangs (exemple 2). Pour les deux systèmes, utilisez le programme ci-contre et insérez sous «x» **la mesure en cm** que votre bordure devra présenter à cet endroit et sous «y» **la mesure en cm** qu'elle devra avoir là.

### Exemple 2

|     |   |
|-----|---|
| 80  |   |
| 100 |   |
|     | A |
|     | B |
| 4   |   |
| 1   |   |
|     | x |
| 38  |   |
| 4   |   |
| 1   |   |
|     | x |
| 6   |   |
| 6   |   |
|     | y |
| 0   |   |

## Que se passe-t-il lorsqu'on transforme les mesures?

**Attention:** Les mesures de tour de poitrine données dans le programme du FORM COMPUTER correspondent à celles prises sur le corps alors que celles du patron sont celles du tricot.

### Agrandissement du tour de hanches lors du montage:

Le pull sera plus large en bas d'autant de cm que vous aurez ajoutés aux mesures prévues. Si vous n'agrandissez pas le tour de poitrine, les mailles ajoutées seront diminuées jusqu'à l'emmanchure.

### Agrandissement du tour de poitrine:

Le pull sera plus large en haut d'autant de cm que vous aurez ajoutés aux mesures prévues. Les mailles ajoutées seront diminuées à l'emmanchure, les épaules gardant toujours la même largeur.

### Allongement ou raccourcissement de la longueur totale:

Le pull sera allongé ou raccourci entre le bord et l'emmanchure du nombre de cm dont vous aurez transformé les mesures prévues. La hauteur de l'emmanchure reste toujours la même.

## Transformation du décolleté en V.

La petite croix sur le programme IIb indique le chiffre qui vous permet de changer la profondeur du décolleté en V. Si vous lui ajoutez 1, le décolleté sera plus profond d' $\frac{1}{2}$  cm, si vous lui enlevez 1, le décolleté sera plus court de  $\frac{1}{2}$ .

**Attention:** Ce nombre ne peut être changé que dans les limites indiquées, p. ex. x = 1-35

## Comment transformer un pulllover en jaquette?

Ajoutez 256 au deuxième chiffre à partir d'en haut dans le programme du devant et insérez le résultat à la place du chiffre original. (Par exemple 417 au lieu de 161.) Selon la manière dont vous pensez porter votre jaquette, il est préférable de tricoter cette dernière dans une taille plus grande que le pullover.

## Abbreviations

|      |                                 |   |  |
|------|---------------------------------|---|--|
| I    | = back                          | A | = mm 40 R  |
| IIa  | = front part with round<br>neck | B | = mm 40 sts  |
| IIb  | = front part with<br>V-neck     | C | = mm 40 R border   |
| IIIa | = long sleeve                   | 1 | = cm hip width at cast on<br>cm sleeve width at cast on                                    |
| IIIb | = short sleeve                  | 2 | = cm bust<br>cm sleeve width (attention, can only be<br>changed when the bust is changed.) |
|      |                                 | 3 | = cm total length  |

## Minimum measurement of test square

On certain pages you will find indication «mm 40 sts > = 144», this means that the measurement in mm for 40 stitches in the pattern you choose for this knitting has to be at least 144 mm.

If you want to enlarge the bust measurements of your sweater, the measurements of the test square have to be larger accordingly.

## Flashing figures

For the meaning of the flashing figures 1–5 see instruction book FORM COMPUTER pages 13 and 14.

Flashing figure 7: knit a bust dart with short rows or by decreasing depending on the pattern you are knitting.

Flashing figure 8: end of the bust dart, i.e. knit again with all needles or cast on as many stitches as you have decreased for the bust dart.

Bust darts occur for ladies' sweaters from size 50 onwards.

## Bands for neck-lines and jacket openings

### Example 1

You can knit bands lengthwise or sidewise, i.e. you cast on many stitches and knit few rows (example 1) or you cast on few stitches and knit many rows (example 2). In both cases you use the programme on the right side. Where it says «x» insert the measurement in cm that your band should have at this place. For «y» insert the measurement in cm that your band should have at that place.

|     |   |
|-----|---|
| 80  | A |
| 100 |   |
|     | B |
| 4   |   |
| 1   |   |
| x   |   |
| 38  |   |
| 4   |   |
| 1   |   |
| x   |   |
| 6   |   |
| 6   |   |
| y   |   |
| 0   |   |

### Example 2

## What happens when you change your measurements?

**Attention:** the bust measurement in the FORM COMPUTER programme is a body measurement. The measurements of the actual knitting can be seen in the pattern drawing.

### Increasing the hip width at the cast on:

The sweater will be by as many cm larger at the bottom as you have added to the given shop measurements. If you do not increase the bust measurement, the added stitches will be decreased between the border and the armhole.

### Increasing the bust measurement:

The sweater will be by as many cm larger at the bust as you have added to the given shop measurements. The added stitches will be decreased in the armhole, the width of the shoulders will always stay the same.

### Increasing or decreasing the total length:

The length of the sweater will be increased or decreased between the border and the armhole by the number of cm by which you have changed the given shop measurement. The height of the armhole will always stay the same.

## Changing the V-neck

The cross at the programme IIb indicates the number where you can change the depth of your V-neck. If you add 1 to that number, the V-neck will be  $\frac{1}{2}$  cm lower, if you deduct 1 from that number, it will be  $\frac{1}{2}$  cm less low.

**Attention:** This number can only be changed in the indicated range, e.g. x = 1–35

## How to change a sweater into a jacket

Add to the second number of your programme for the front part 256 and insert the result at the place of the old number in your programme (e.g. 417 instead of 161). Remember, depending on how you want to wear your jacket, it might be indicated to knit it a size larger than the sweater.

## Afkortingen

|  |  |
|--|--|
| I = rugpand                              | A = mm 40 toeren   |
| IIa = voorpand met ronde halsuitsnijding | B = mm 40 steken   |
| IIb = voorpand met V-hals uitsnijding    | C = mm 40 toeren boord   |
| IIIa = lange mouwen                      | 1 = cm heupwijdte bij de opzet<br>cm mouwwijdte bij de opzet   |
| IIIb = korte mouwen                      | 2 = cm bovenwijdte<br>cm mouwwijdte (let op, mag alleen worden veranderd wanneer ook de bovenwijdte wordt veranderd) |
|  | 3 = cm totale lengte   |

## Minimum afmeting van het proeflapje

Bij veel programma's vindt u de aanwijzing, die er als volgt uitziet:

«mm 40 st > = 144», d.w.z., dat het proeflapje van 40 steken voor dit model minstens 144 mm. moet zijn. Wilt u echter toch de bovenwijdte vergroten, dan moet natuurlijk ook het proeflapje overeenkomstig groter zijn.

## Knippergetallen

Voor de betekenis van de knippergetallen 1 – 5 kunt u de bladzijden 13 en 14 van de handleiding van de FORM COMPUTER raadplegen.

Knippergetal 7: Coupe-naad breien met verkorte toeren of met minderen, al naar gelang het patroon.

Knippergetal 8: Coupe-naad beëindigd, d.w.z. weer met alle naalden breien of weer zoveel steken opzetten als u voor de coupe-naad afgekant heeft.

Coupe-naden komen voor bij dames-pullovers vanaf maat 50.

## Boordjes voor hals-uitsnijdingen en jaskanten

### Voorbeeld 1

U kunt een boord breien dwars of in de lengte, d.w.z. u zet veel steken op en breit weinig toeren (voorbeeld 1) of u zet weinig steken op en breit veel toeren (voorbeeld 2).

### Voorbeeld 2

Voor beiden gebruikt u het hiernaast aangegeven programma en vermeldt overal waar «X» staat **de maat in cm.** dat uw bordje op die plaats moet hebben.  
Bij «Y» vermeldt u **de maat in cm** dat uw bordje daar moet hebben.

|     |   |
|-----|---|
| 80  | A |
| 100 |   |
|     | B |
| 4   |   |
| 1   | x |
| 38  |   |
| 4   |   |
| 1   | x |
| 6   |   |
| 6   | y |
| 0   |   |

## Wat gebeurt er, wanneer u maten verandert?

**Let op:** de maat voor de bovenwijdte in het FORM COMPUTER programma is een lichaamsmaat. Bij het grondpatroon kunt u zien met welke maat van het breiwerk dat overeenkomt.

### Vergroting van de bovenwijdte bij de opzet:

De pullover wordt aan de onderkant net zoveel cm. wijder, als u heeft toegevoegd aan de aangegeven maat. Wanneer u de bovenwijdte niet vergroot, worden de toegevoegde steken tot aan het armsgat weer geminderd.

### Vergroting van de bovenwijdte:

De pullover wordt aan de bovenkant net zoveel cm. wijder, als u heeft toegevoegd aan de aangegeven maat. De toegevoegde steken worden in het armsgat weer gemindert, de schouders blijven dus even breed.

### Vergroting of verkleining van de totale lengte:

De pullover wordt tussen boord en armsgat net zoveel cm. verlengd of verkort, als u heeft toegevoegd óf afgetrokken van de aangegeven maat. De hoogte van het armsgat blijft altijd gelijk.

### Verandering van de V-uitsnijding:

Het kruis bij programma ... geeft het getal aan, waarmee u de diepte van de V-uitsnijding veranderen kunt. Wanneer u 1 bijtelt wordt de uitsnijding ½ cm dieper, wanneer u 1 aftrekt, wordt de uitsnijding ½ cm. minder diep.

**Let op:** dit getal mag alleen binnen de aangegeven marge worden veranderd, bijvoorbeeld x = 1–35

### Hoe maakt u van een pullover een jasje:

Tel 256 op bij het getal dat, van bovenaf gerekend, als tweede getal in het programma staat aangegeven. Het nu verkregen getal tikt u dan in de computer i.p.v. het oorspronkelijk aangegeven getal. (bijvoorbeeld 417 i.p.v. 161).

Denk er aan, dat het, al naar gelang u het jasje wenst te dragen, belangrijk kan zijn om het jasje, qua steekgrootte, 1 nummer groter te breien dan voor de pullover.
