Pin out to size and steam carefully. Join remaining shoulder and collar seam. Set in sleeves between marked points. Join side and sleeve seams. Fold collar in half onto the outside. Pin into pos and back-stitch through the open loops of last row knitted in col 1. Overlap ends of collar and sew into pos.

What Next?

I hope that by the time you reach this page, you'll have knitted your way through the Free beginner's patterns, and at least a couple of the tops featured in this book. You should be feeling quite confident and happy with your Knit-master Handknitter, and asking yourself, "Right, what shall I knit next?"

Well, you could have a look at the pattern book which Knitmaster and Emu produced especially for the Handknitter. This contains twelve patterns, which are a good mix of men's, women's and children's tops, and some are knitted in tuck or slip stitch. It's a good idea to knit up quite a few woollies on a new machine, to really get a feel for it, and so you know exactly what you're doing.

Have Fun with Yarn and Punchcards!
Perhaps you're eager to get on to the next stage, and you're not quite sure how to go about it. You might like to concentrate on just one aspect of machine knitting. You could start experimenting with yarn and colour, or with stitch patterns, or with garment shapes. Let's start with yarn first of all. Knitmaster Kone has been developed by the experts for machine knitters, so it really is the ideal yarn to use. Probably all the garments you've knitted so far have been in 4 ply. Why not try something thinner, or even thicker? Knitmaster Kone also comes in 2 ply, and an aran weight. Treat yourself to a couple of Kones — sorry, cones — of each — there are some lovely colours available, and try a Fair Isle pattern in 2 ply and Aran. Or how about a tuck stitch pattern in 2 ply? Use the punch cards which come with the machine. Try card 703. Lock the card on row 7 and knit six rows 2 ply, turn the cam lever back to stockinet and knit two rows Aran. Keep repeating this, or lock the card on a different row for each section of tuck stitch. Mix different textures of yarn together, for example, mohair and Kone 4 ply, like the two ladies sweaters on the back cover.

Be a D.I.Y. Designer
The next step after this could be to try punching out your own designs onto blank cards. Your Knitmaster stockist can supply a handy punch and blank cards specially for your Handknitter. If you're feeling a bit nervous to start with, there is a book full of punchcard designs, just for your machine. It's called Lecle, and is full of designs for Fair Isle, slip and tuck stitch. Why not choose a Fair Isle design, and punch a new card for the child's sweater on the back cover? All you have to do is make sure that you get the same number of stitches and rows with your new card as the original pattern tells you, and the sweater will have a completely new look.

As well as patterns for punchcards, the Lecle pattern book also has ideas for cable and lace patterns. Using these techniques as a starting point, see how many variations you can think of. How about doing cables and lace all in the same piece.

Knit your favourite Stitch Patterns
Now, you've assembled lots of swatches and ideas, which, incidentally have all given you plenty of practice on your Handknitter, so the next stage is to take all these ideas — and turn them into a garment. One way to do this is to find a written pattern with the same number of stitches and rows to 10cm, as you read from your new tension square. Then, if

Knitmaster Kone comes in 2 ply, 4 ply and Aran.

the garment is the shape and size you want, you can start knitting your very own design.

Knit your Favourite shapes
You've probably found out by now that unless you can get exactly the same tension as a pattern says, the garment you knit can be quite disastrous! Fortunately,
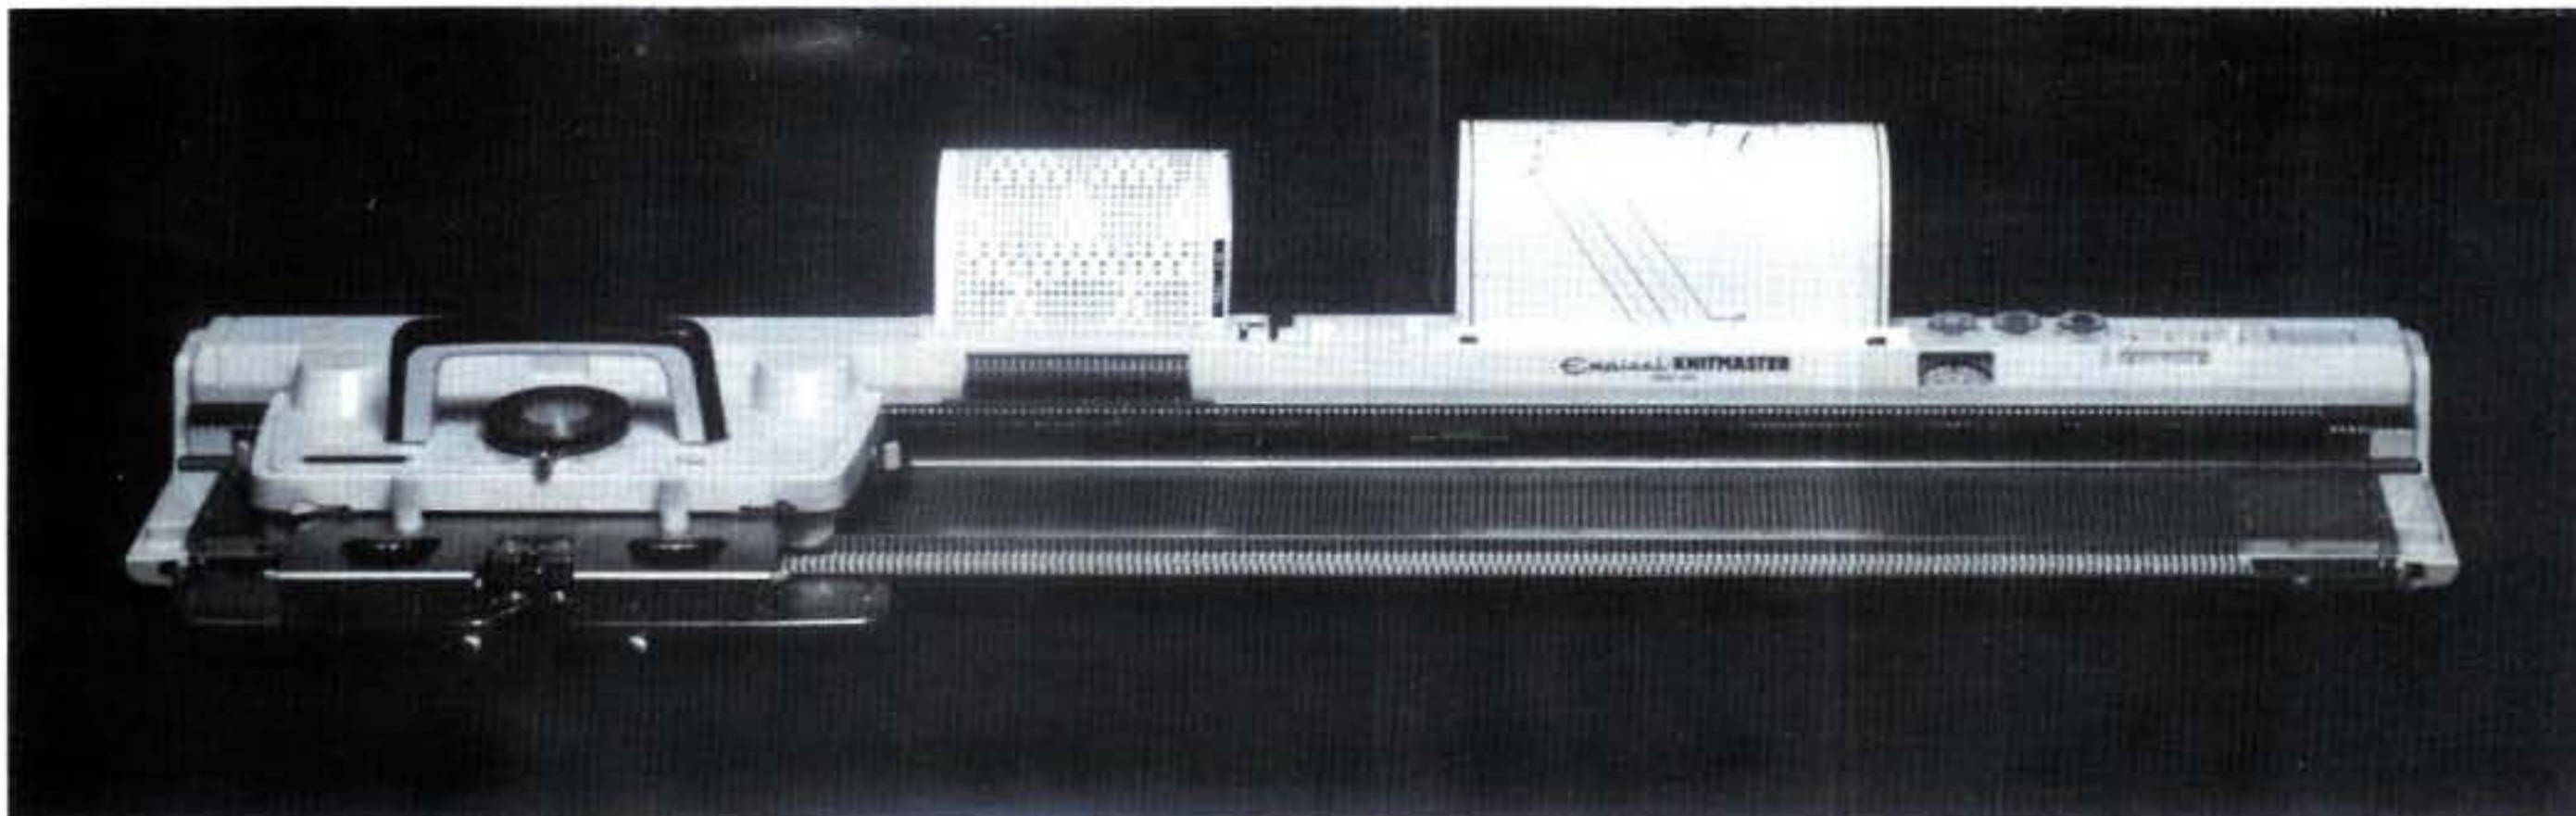

Knitmaster's 360 punchcard machine — your next step.

there is a way round this, which means you can knit any shape you like, in your own choice of yarn and stitch pattern. Knitmaster produce an attachment called a KR6 Knitradar, which is available through your local stockist. This sits on the back of your Handknitter, and a diagram shows you how many stitches to cast on, and exactly where to increase and decrease.

Start by knitting a tension square exactly as your instruction book tells you. Use the green ruler to measure the stitches and rows. Set the Knitradar with this information, choose the garment shape you want from the set supplied free, and off you go! Using the Knitradar means you don't ever have to search around for patterns the size and shape you want to knit. The diagrams supplied with the Knitradar cover men's, women's and children's garments in a range of sizes, and because you can see the shape you're going to knit, it's really easy to alter it.

Your local Knitmaster stockist can supply you with some useful accessories

to help you alter the basic diagrams, and you can even make your own patterns, starting from scratch. Put all these ideas and accessories together, and I can guarantee that you'll never see anyone else in knitwear like yours! Another accessory you'll find really useful is the SC7 linker. This will cast off, and also help you put your garments together quickly, and with a really professional finish. You can also use it to do some really interesting patterns on the surface of your knitting. Use it to turn a plain stockinet sweater into something unique.

So what happens next?

The Handknitter can give you hours of pleasure, and you'll find that new ideas for stitch patterns and garment shapes keep popping into your head. Or perhaps you'd like to knit other types of stitch patterns? The Handknitter is the ideal machine for beginners, because it's easy to use, and with just three types of stitch pattern to choose from, you won't get confused by too much choice!

However, if you keep an eye on the

knitwear in shops (which is a good way of getting ideas!), you'll have seen all the pretty lacy garments which are always so popular. Lace is just one of the stitch patterns that Knitmaster's 260 punchcard machine will knit. You can also knit punch lace, platting and knitweave, so you've more than doubled your choice of stitch patterns. And don't forget about single motifs. If you choose a Knitmaster 260 with lace carriage, you get a total of thirty new punchcards, and the same Knitradar will fit on this machine.

Or you may prefer a Knitmaster 360, which has the Knitradar built in already. Don't forget, you can add a ribbing attachment to either of these machines, so you can not only knit real ribs, but also even more exciting new stitch patterns.
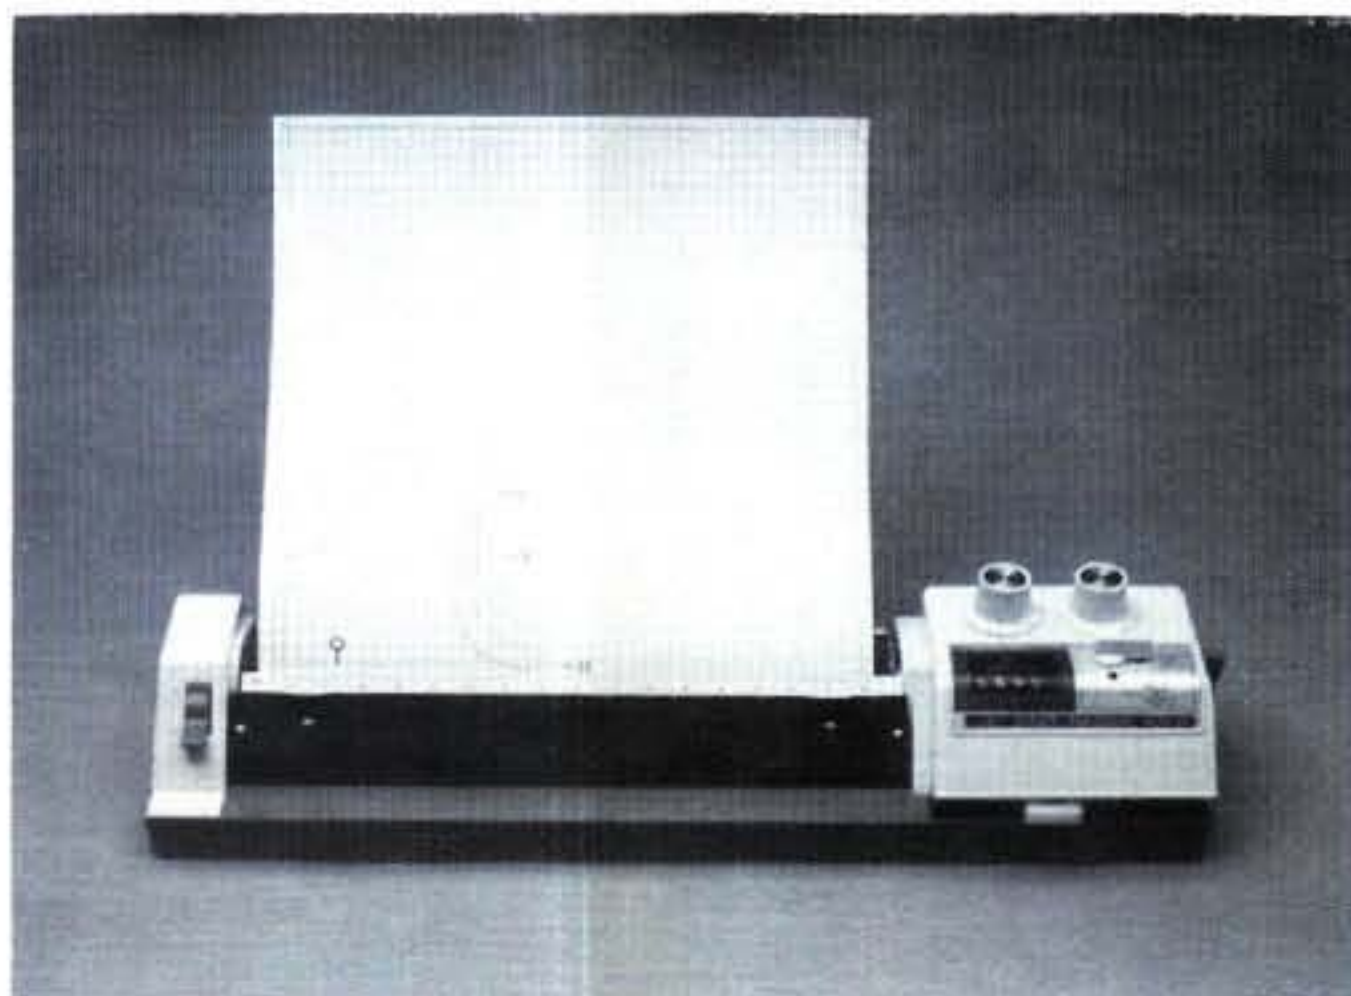

Pass on your Handknitter to a friend or relative, and they too can have an exciting and creative new hobby.

Happy Knitting

Your Editor
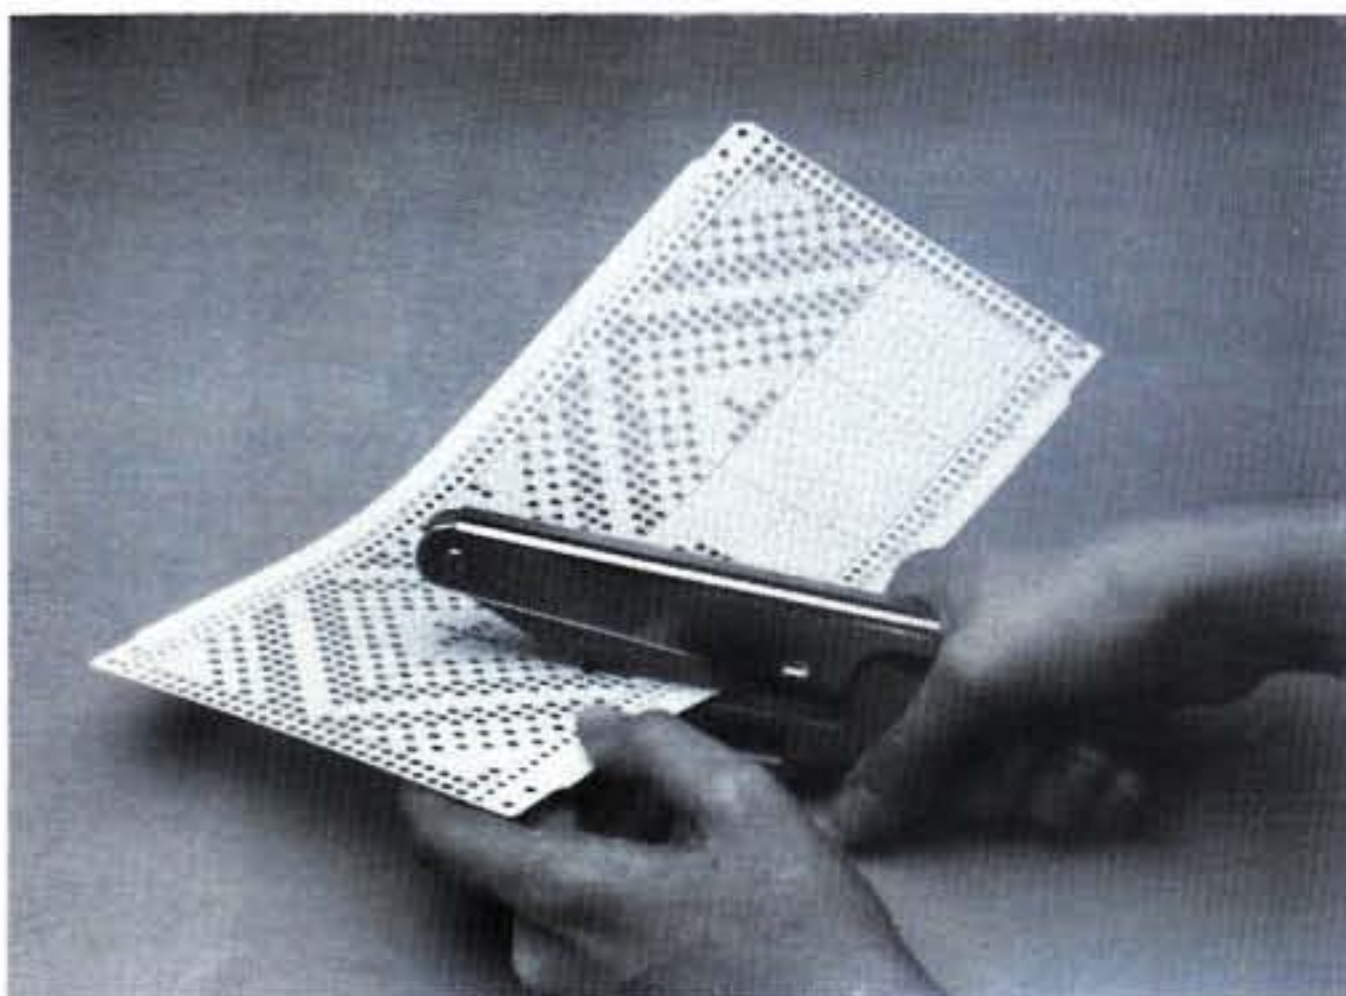

Use the handy punch to design your own stitch patterns.

Knitmaster's Knitradar makes garment knitting easy.
