

DUBIED

RESERVE PARTS

**Types N₄ - NF₄
NHF₄**

Catalogue N° 222

Carefully preserve this catalogue

When you are in need of spare or reserve parts, this catalogue will allow you to order same from any Dubied branch or agency.

**EDOUARD DUBIED & CIE S. A.,
Neuchâtel - Switzerland**

DUBIED

IMPORTANT NOTICE

Read this before ordering

In order to ensure the quickest and best service, it is essential to give us precisely the following information when ordering :

- a) TYPE of the machine.
- b) WIDTH AND GAUGE.
- c) CONSTRUCTION NUMBER of the machine, or of the apparatus.
(The three indications *a, b, c* are punched on the needlebeds and bars of the machine).
- d) NUMBER OF THE PLATE on which the part is represented (i. e. the large number printed at the foot of each plate in the catalogue).
- e) THE NUMBER OF THE PART on the plate (i. e. the small number printed in a circle and denoting the part of the plate).

SPECIMEN OF AN ORDER

*for a machine N4, 39" wide, 10 needles,
construction number 599645*

Please do not fail to state your complete address
and how we are to despatch.

Photo of a knitting factory about 1900

If by any chance you own one of the machines shown above, you can still obtain spare parts for it.

Although DUBIED machines are constantly being improved, machines of older construction are never « left behind » as regards spare parts.

Thanks to our spare parts department,

DUBIED machines
have a long life insurance.

Use DUBIED spare parts

on **DUBIED** machines.

DUBIED hand machines

are robust, precise and rich in possibilities. Every facility is provided for easy adjustment of different stitches and light manipulation.

These machines are operated by handles fitted to the carriage. A power drive and motor can be supplied if desired.

The principal types of DUBIED hand machines are as follows :

- N2** with 2 yarn carriers, for all classical effects and garments in rib and plain.
- NHF2** with 2 yarn carriers as N2, but with cardigan cams for the rapid production of cardigan stitch and half cardigan, with high and low butt needles.
- N4 and NHF4** corresponding to N2 and the other to NHF2 but with 4 yarn carriers.
- NHF5** machine with cardigan cams, 5 yarn carriers and motorised. Automatic racking and striper apparatus. This is an ideal machine for the small factory.

Whichever type of machine you choose it must be a

DUBIED

a machine of quality.

Variure française Double tuck	13	13	13	13			Französischer Versatz-Fang Variatura francese

Observation Les positions s'entendent pour une maille moyenne et l'emploi d'un filé de grosseur moyenne.
Bemerkung Die Nadelsenkerstellungen verstehen sich für eine mittlere Maschenlänge mit der Verwendung einer mittleren Garnstärke.
Remark The positions are understood for medium stitch and the use of yarn of medium thickness.
Osservazione Le posizioni dei triangoli di discesa s'intendono per una maglia media, utilizzando un filato di spessore medio.

Important remarks

1. GUARANTEE.

We beg to remind you that the guarantee given with our machines states clearly that « *we decline every responsibility in case one uses on our machines spare parts, needles etc., which are not of Dubied manufacture* ».

2. EXTRACT FROM THE SALE CONDITIONS.

The transport expenses, postages, etc., are always to be paid by our customers. The packing of spare parts is generally included in the prices : in case it is necessary to have a special packing, same may be invoiced separately.

3. ADDRESS AND SHIPMENT MODUS.

We beg to ask our customers to always indicate very clearly their address and to tell us the shipment modus they wish us to apply. Where such indications are missing, we reserve ourselves the right to choose ourselves the route and method of despatch.

4. PRICE

We always invoice at the lowest possible prices and according to the tariff in force on receipt of the order.

5. PLATES INDICATED IN OUR CATALOGUES.

The parts which are shown in our catalogues are understood to be approximate representations and are given only as an indication.
