**Description Book
for Model Book No. 1**

Model Book No. 1

=====

Our first model book for PASSAP double bed machines consists of an illustrated book without text and a description book. This system enables us to have a large edition of illustrated books printed and to have smaller editions of description books printed in various languages. Thus illustrated books and description books, containing 60 PASSAP models, can be supplied at a very favourable price.

The new way of describing models by means of large patterns and little text facilitates knitting and saves you the trouble of too much reading. It is however important that you remember signs, abbreviations and tips right from the beginning, the meaning of which is explained on pages 1 and 2. Then you will see with one glance how each model is done.

Index : see opposite page.

Patterns: Drawing refers to half width, indication of stitch number to whole width of each part.

- | | | | |
|-------------|----------------|-------------|---------------|
| Figure I | = back part | Figure IX | = pants |
| Figure II | = front part | Figure X | = gusset |
| Figure III | = sleeve | Figure XI | = scarf |
| Figure IV | = collar | Figure XII | = cap, bonnet |
| Figure V | = band, cuff | Figure XIII | = mittens |
| Figure VI | = pocket | Figure XIV | = socks |
| Figure VII | = skirt, front | Figure XV | = straps |
| Figure VIII | = skirt, back | | |

If the central line of the half width is dotted and shows arrows, the other half is done simultaneously with reversed shapings.

If the central line is drawn in one firm line, the other half is done separately with reversed shapings.

Stitch size: These numbers are recommended by us, but must be controlled by means of a test square, knitted on your machine with your wool.

Abbreviations:

- | | | | |
|-----------|-----------------------------|---|----------------------------|
| Col. | = colour of wool | ○ | = tubular |
| M | = central stitch of pattern | ● | = every, (in every row) |
| St.S. | = stitch size | x | = times |
| nd., nds. | = needle, needles | + | = increase |
| st., sts. | = stitch, stitches | - | = decrease, cast off |
| R | = row | ▲ | = graduations (short rows) |
| T | = 2 rows | ■ | = for open work row hang |
| N.P. | = Neutral Position | | st. to the next nd., put |
| W.P. | = Working Position | | empty nd. into N.P. and |
| R.P. | = Rest Position | | knit 2 rows |

Stitches are only given by a number (without accompanying letter). The stitch number always refers to the total of stitches, i.e. to all needles which are in Working Position on front and back bed.

Exception: For tubular, the necessary stitches are only given for one bed, on the other bed, the same number of needles has to be put into Working Position. In these cases, the sign for tubular ○ is set before the relevant stitch number.

Examples for increasing and decreasing:

- +3×2•8.R** means: 3 times incr. 2 stitches in every 8th row (1 stitch at back, 1 stitch at front).
- 19×3•7.R** means: 19 times decr. 3 stitches in every 7th row (2 stitches at back, 1 stitch at front and vice versa).
- 17×1•2./3.R** means: 17 times decr. 1 stitch, alternately after 2 rows and 3 rows.
- ▲-4×8•2.R** means: work with pushers and knit graduations (Lock BX). Gradually after every 2nd row return 8 pushers into Rest Position (for double bed work 4 pushers each on back and front bed). When all graduations are finished, put pushers into Neutral Position and knit normally with all needles and without pushers.

Number of stitches and inches:

- 136 = 8"** means: a total of 136 stitches (for K/K 68 stitches each on front and back) make a width of 8".
- 146 = 17"** means: cast on 146 stitches each on front and back for tubular which makes a width of 17 ins.

Test square and PASSAP chart

If you always knit 100 stitches and 100 rows for your test square, you save the trouble of counting rows and stitches and can read any desired measurement in our PASSAP chart (at the end of this book).

Horizontally: Across the top you will find the measurements in inches of your test square of 100 stitches and 100 rows; range from 4" to 20", split up in two charts.

Vertically: Required measurements in inches for your garment. From top to bottom, on the left and right, you will find the number of inches measured for your garment. These numbers range from 1/2" to 40" on each side.

Example: 100 stitches of your test square measure, say, 10". For your garment, however, you need a width of, say, 8". Look in the horizontal column under 10" and in the vertical column under 8". Where both columns meet you find the number 80, i.e. you have to cast on 80 stitches (40 on each bed).

In the same way you find the desired number of rows on the chart. Numbers for measurements, which you do not find on the chart, you may obtain by a simple addition.

How to divide the work. Knit stitches, which should temporarily rest, like a buttonhole, with contrast yarn. Put the needles into Neutral Position. Thus you obtain long loops, which hold the stitches. Later on you just have to unravel the contrast yarn and the stitches will slip back to their needle heads.

PASSAP 12. Each model can also be done on PASSAP 12, if you choose a PASSAP 12 pattern. - Fairisle patterns can be done on PASSAP 12 with heel deckers, which are available at any PASSAP dealer.

 To make up: Cut out parts according to pattern and press lightly using hot iron over damp cloth. Join parts making hems on the inside. Stitch buttons and cuffs into position and set in waist band as well as zip fastener. Put lining into skirt and jacket.
 The idea to knit one straight piece and to cut out the parts according to a pattern was conceived by PASSAP knitters who are also in possession of a sewing machine. This is why we give you a "tailor's model" exceptionally. Similarly you can make dresses, coats, etc. according to a fashion pattern you buy. The recommended DUOMATIC stitch pattern makes a texture which is quite similar to Rhodier material and much cheaper.
