Regular readers of KNITKING MAGAZINE will notice that we have added additional figures to the garment charts in this issue. It is done in response to the many requests from very experienced knitters who can knit from a chart without referring to printed instructions . . . We explain how the figures are read in KNITKING NEWS, but if you are not experienced enough to understand how the various shapings are made using the figures, you should ignore them entirely and follow the printed instructions.

It's a strange phenomenon, but we still get letters from readers asking why we do not put measurements on KNITKING patterns . . . We, of course, do just that . . . It may be necessary for you to add several measurements together in order to obtain the length of the dress, but all important measurements are always included in the charts . . . You can easily see what the bust and waist measurements, etc., of your finished garments should be.

We have received several letters from readers who want to either lengthen or shorten our garments to suit their own height and taste . . . So in the KNITKING NEWS in this issue, we give instructions on how to easily vary the length of skirts and dresses . . . We are happy to give you such Practical Knitting Hints and we hope that you will continue writing to us with any questions you have.

Recently, we had a sale of a beautiful boucle yarn called Fatme . . . it was one of our best yarn "Specials" ever and we sold several tons of yarn . . . As a result of the sale, we received many requests for patterns in Fatme, so we have some in this issue including the beautiful two piece outfit on the cover . . . But, because everybody was not able to take advantage of the sale, we also have instructions for the cover garments in Subita 2 x 3 for the dress and 2 x 4 for the jacket . . . You need 7 balls of main color and 5 balls of the second color for the jacket in 2 x 4 plus 14 balls of 2 x 3 for the dress. We will be happy to include instructions and charts with your order for Subita yarn.

Watch for the May-June edition of KNITKING MAGAZINE . . . it will feature beach and summer sportswear for the whole family including a stunning Bikini and Coverup.

It's Spring again . . . and knits were never more in fashion than they are today . . . Dresses, long Vests, Suits, Jumpers . . .

anything's possible . . . and we have planned the best for you . . . and you . . . Knit any one of the bright and beautiful garments. Dust off your machine, give it a dab of oil and begin by knitting our lovely Cover Model outfit.

NO. 1: Material: 1 1/2 oz. (1 ball) KNITKING Sonika Dralon will cover 3 or more hangers. Tension 7 or 8. Gauge: 14 sts. 19 Rows 2".

FINISHING: Pull the 4 needle cord over the wire hook being sure to get the wire inside, then turn the wider space of cord toward the inside of hook. Thread a needle with end of yarn and pull it down over the wood and wind it around end of wire that sticks out at the bottom, then up again to bottom of cord. Do the same thing to the other side and anchor firmly. Close the top end so the hook cannot come through. Using latch tool, begin from the cast-on edge and pick up 2 cross threads, twist them, then pick up 2 cross threads and pull through loop. Continue to pull 2 cross threads through st. on latch tool to the top of cord, pull end through to hold. Pull the tube over one end of wood so that the cast on edge will go up against the wire hook. Do the same to other side. Pull up end of tube tightly and secure. Sew the center pieces together catching tube on each side. Cover the seams with flower of your choice.

HANGER NO. 2: Material: 1 1/2 oz. (1 ball) KNITKING Frigate will cover 2 or more hangers. Tension 7 or 8 OVER EVERY OTHER NEEDLE. Gauge: 10 sts. 12 rows 2".

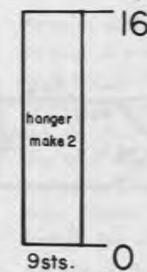

FINISHING: Pull the wire cord over the hook, the larger completed tube over ends of hanger and finish as in directions for hanger No. 1.

No. 1

Make 2. Cast on 9 sts. Set your machine for making a cord. (KNITKING machines, pull up or push in RIGHT Control Button) As you knit, do not pull down hard on the strip, just hold it with your left hand so the strand that forms as you knit from left to right will stay down in place. Knit 164 rows, then take the stitches off on the end of yarn.

For the Wire hook, make a 4 needle cord using Tension 2 or 3 and knit 120 rows. Take off on end of yarn and pull up.

66 (no. 2)
164 (no. 1)

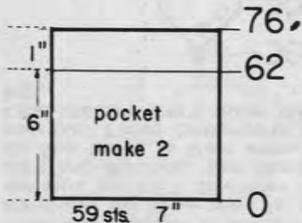

No. 2

Make 2. Cast on 9 sts. over every other needle. Knit to ROW 66, break yarn leaving an end to sew with. Allow the first and last stitches to drop from needle and take off the center 7 sts. onto end of yarn. With a size F crochet hook, crochet from side to side by pulling out 2 rows at a time and pull the two strands through, first from one side and then the other. Secure with end of yarn at the top.

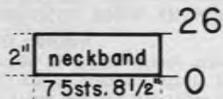

Make a 3 needle cord for wire hook over every other needle, (see directions for cord on first hanger). Use Tension 3 or 4 and knit 68 rows. Take off on end of yarn and pull up.

KNITTING Sonika Dralon: Use EVERY OTHER NEEDLE and Tension 8 to 10.

KNITTING Frigate: Use EVERY 3rd NEEDLE and Tension 9 or 10.

Cast on 31 sts. Put the 1st and every 6th needle into holding position and knit 8 (or 10) rows. The FIRST and LAST needle is ALWAYS a holding position and you must remember to bring the yarn under this needle so that it goes over it when knitting the next row. Put all needles into working position (KNITTING machines can push in left retractor button before knitting last row). Knit the first st. by hand and put this needle into holding position then knit 1 row slowly. Break yarn leaving a long end and tie this end to cast-on end up close against the end st. Thread end of

yarn into transfer needle (or tapestry needle) and take stitches off onto yarn. Pull up and tie. (KNITTING MACHINES, be sure to release sts. from under sinkers, put needles into holding position before removing sts.) Sew a flower to each side of hanger. You may make these in two colors if you wish, by casting on with one color, knitting the 8 to 10 rows, then change to a second color for the last row and take off the sts. onto the second color. Experiment . . . it's fun.

NOTE: Machines other than KNITTING may find it difficult to knit the single row over needles holding so many strands of yarn on the shanks of the needles and if you do, then knit this one row, one stitch at a time by hand, then take the sts. off on end of yarn after tying the ends.

IMPORTANT INFORMATION FOR READING KNITTING MAGAZINE CHARTS

The Charts for KNITTING MAGAZINE Patterns now show the increases and decreases for all shapings. The detailed numbers for darts, armhole, neck and shoulder as well as side shapings are shown on one side only (the right side) and of course you will know when looking at the outline of the Charts, that you must make the identical shapings on the left side of the garment section when the Chart outlines are the same on both sides. If the chart outline goes in, you will decrease and if it goes out, you will increase. Beginners will want to use the printed instructions which give them the actual rows on which to do the shapings on each side. Experienced knitters will perhaps want to use the figures on the charts, but should remember that the printed instructions are there to use as well. The bind-offs for the armhole, the neck and shoulder shapings, when made on every other row, can always be made using short rows, and for this see your Instruction Manual or the KNITTING "Practical Knitting Hints" book.

The letters SR shown in front of sts. on bust darts, collars etc., means: KNIT SHORT ROWS. A number in a box stands for the number of rows to be knitted between shapings. Make shaping first, then knit the necessary number of rows. If for instance it reads: 1 st. 8 x

6

1 st. 10 x

8

As you will be reading the instructions from the bottom up, here is the way you will follow them:.. Decrease or increase (depending on the direction of the garment outline) 1 st. at the row where the shaping begins, then knit 8 rows, make the next decrease, then knit 8 rows, until you have decreased (or increased) 1 st. 10 x and you have knitted 8 rows after each decrease (or increase) (1 st. 10 x + 8 rows 10 x). Now begin the first decrease (or increase) for the shaping (which has to be made 8 x) in every 6th row. Decrease (or increase) 1 st. first, then knit 6 rows until you have decreased 1 st. 6 x and after each decrease (or increase) have knitted 6 rows (1 st. 8 x + 6 rows 8 x).

Where shapings are given without a boxed number as on most armholes, necklines, etc., make the shapings on every second row (on each side of course).

WAISTLINE DARTS

There is more than one way to make waistline darts. When using fine yarns, care has to be taken so that you do not break the yarn...this can happen if the sts. are moved in such a way as to leave 2 empty needles between stitches.... Here is a method that will give you a neat looking dart... We are using DK 7829 for an example. The darts begin at Row 254 and the sts. marked on the diagram are the 54th, 55th and 56th sts. on each side. For the RIGHT dart count from the RIGHT side, for the LEFT dart, count from the LEFT side. The 55th st. is the Dart center st., pull this needle out into holding posi-

tion. Release all the sts. which have to be moved, from under the sinkers. Hang the 54th and 56th sts. onto the Dart center st. (the 55th st.). On each side of the dart sts., there is now 1 empty needle and these needles have to be filled. Insert the 33 needle Transfer Tool into the first adjacent 33 sts. (the 21st -53rd sts.) and slip the sts. onto the tool. Holding the tool with the 33 sts. in your left hand, use the single Transfer Tool in your right hand and transfer the 20th st. 1 needle inward. Still holding the tool with the 33 sts. in your left hand, move the dart sts. 1 needle over, toward the center, filling that empty needle, then hang the 33 sts. from the tool next to this. As you will notice, there is never 2 empty needles between sts. Now insert the 33 needle Transfer Tool into the remaining 19 sts. on the outside, slip the sts. onto the tool, insert the single Transfer Tool into the single st., and move this st. and the 19 sts. on the other tool over to fill the empty spaces. The following decreases for the darts are directly above the first decrease. The center dart st is always your guide. To increase for the dart, reverse the procedure. Pull out the center dart needle to holding position, release the sts. to be moved, from under the sinkers. Move the end sts. in excess of 33 sts. first, then the remaining sts. In this way, you will always have 1 empty needle between sts. Cast on a sufficient number of sts., knit about 50 rows, then practice making the darts, using DK 7829 for an example.....

HOW TO ALTER THE LENGTH OF SKIRTS AND DRESSES

The length of a straight dress or skirt is altered as follows: To shorten: Check your row gauge, then set the Row Counter ahead as many rows as are needed to make up the amount by which the skirt or dress is to be shortened, then follow the instructions as written. To lengthen: knit the number of rows which make up the amount by which the dress or skirt has to be lengthened, then set the Row Counter back to 0 and follow the instructions as written. If the dress or skirt is shaped, as in DK 7837, proceed as follows: To shorten: knit to the Row which denotes the hem and hem allowance, which in this case is Row 48. Now set the Row Counter ahead to Row 72 which will shorten the dress by 2". If less than 2" are desired, set the Row Counter ahead less rows, then follow the instructions as written. If more than 2" is needed to shorten the dress, see how many rows are to be knitted between decreases. On DK 7837, the first decrease is at Row 72, the following decrease at Row 82, then 92, etc. Each additional 10 rows gives you about 1" of length. To be able to follow the instructions and have the same amount of stitches at critical points, proceed as follows: To shorten the dress by 3", cast on 2 less stitches which are the sts. which would have been decreased at Row 72. Now knit to Row 48, then set the Row Counter to 82 and follow the instructions as written. To shorten the dress by 4", cast on 4 less sts., knit to Row 48, then set the Row Counter to 92 and follow the instructions as written, etc... To lengthen a dress or skirt, knit to the Row which denotes the hem and hem allowance, then knit the rows which are needed for the additional length, set the Row Counter back to the hem row and follow the instructions as they are written.

OUR READERS WRITE

One of the most commonly asked questions in correspondence from readers is: "What is the difference between Double bed machines and Single bed machines with Ribbing attachments?"...We always reply to such questions with an excerpt from an article that appeared in KNITKING MAGAZINE several years ago.... So for the benefit of our many thousands of new readers, we are reproducing the Excerpt:.....

DOUBLE BED or SINGLE BED with RIBBER

Many people investigating knitting machines for the first time are confused by the difference between so called double bed machines and single bed machines with ribbers. There is a tendency to believe that the double bed machine must be more versatile than a single bed simply because a double bed has two identical beds. In actual fact quite the reverse is the case. More fancy stitches and pattern designs can be made on a push-button KNITKING with Coordinated Ribber than on any other knitting machine and they can be knitted with ease and simplicity without cumbersome weights and innumerable attachments.

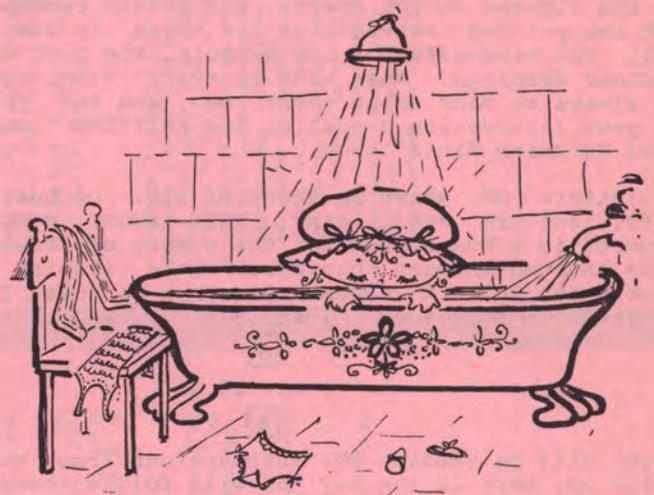

Most Sales Representatives offering double bed machines emphasize the fact that their machines knit tubular but they conveniently neglect to explain that it can only be knitted in stockinette stitch with no mixing of colors or fancy designs. It is not possible to knit tubular ribbing on any home knitting machine but thousands of purchasers of such machines did not discover that fact until after purchasing one.

Double bed machines are patterned after industrial machines used by experts with extensive training. They invariably have to be clamped to a table or a specially constructed steel frame and usually need up to 30 pounds in weight hanging from the bottom edge of the knitting. These weights make it difficult to sit comfortably in front of the knitter and they have to be re-hung every time the knitting reaches the floor. KNITKING machines can be easily put away with knitting hanging from them but the same cannot be said in regard to double bed machines.

We want to emphasize the fact that double bed machines for home use have a place in our industry and for some people they are the right type of machine but we caution anyone buying a machine for the first time and knitters who are considering trading their old machines for later models, to check on the availability of patterns, parts and service for any machine that sounds interesting. Find out if the machine is really versatile and will knit all types of yarns, both plain and fancy. In fact, we recommend that you adopt the advice of the Better Business Bureau and "investigate before you invest."

NOTES TO KNIT BY . . .

STITCH AND ROW GAUGE

KNIT A SAMPLE SWATCH . . . before you begin to knit any garment . . . for this is the **MOST IMPORTANT STEP** toward the correct size and the proper fit of any garment you wish to make. You **MUST** use the **SAME YARN** for your sample swatch that you will use to knit your garment and your sample swatch must be knitted large enough and using several different tension numbers on your machine. When you have done this, then you can determine the number of stitches and the number of rows in a two-inch measure. **KNITTING MAGAZINE PATTERNS** give you 3 tensions to try and one of them should give you the correct stitch and row gauge if you are using the yarn we recommend or a similar weight yarn. Here is the way to make your sample swatch.

Cast on over a sufficient number of needles to produce a swatch at least 4 inches wide. (If the pattern calls for 16 stitches to 2", then $16 \times 2 = 32$ stitches to cast on). Now knit 4 inches of rows at the first suggested tension number. (If the pattern calls for 22 rows to 2", $22 \times 2 = 44$ rows to knit). Knit 2 rows using a contrast color, change to the next higher tension and with garment yarn knit another 4", knit 2 rows with contrast color, change to the 3rd higher tension and knit another 4" and then bind off.

Roll the swatch into a cylinder over its length and pull on both ends, unroll it and stretch it diagonally by pulling on the four corners. Allow the swatch to rest and settle (preferably overnight) and then using a stitch gauge or a ruler, count the number of stitches over a 2" width, then the number of rows over a 2" length in **EACH** of the 3 tensions. Select the tension number that produces the stitches and rows called for in the pattern. If none of them are correct, you are most likely using the wrong weight of yarn.

READING OF CHARTS

You will notice the instructions start at the bottom of the Chart and work UP. Follow the charts exactly as written and providing your sample stitch and row gauge is correct, your garment will come out the right size. Please remember that the section of garment as it is knitted on the machine, faces

the same way as the Charts are in this magazine. Where two front pieces are needed, (or any other part of a garment that needs two sections) only one section is normally shown and the second section is sometimes made with reverse shaping. Set in sleeves are usually identical, but raglan sleeves have to be knitted with reverse shaping for the second sleeve.

READING OF SYMBOLS

Symbols are used on Line Drawings of Pattern stitches to show the position of the needles and the variety of stitches used for Pattern knitting. These Symbols are drawn and are to be read as you look at them while knitting the garment. For instance: if a Purl stitch faces you, the Purl stitch Symbol  is shown; if a knit stitch faces you (as when using the ribber) then this Symbol  is shown. The Line Drawings for pattern stitches are to be read and set up on your machine from **RIGHT to LEFT** unless otherwise stated in the individual instructions.

In **EYELET** design Patterns    specified stitches are transferred to an adjacent needle and the empty needles are returned to the working position. The drawings have row numbers on the **RIGHT** side. Missing Row Numbers are **ALWAYS** knitted straight or plain.

In **HOLDING POSITION DESIGNS**  selected needles are pushed into holding position for the stated number of rows. The numbers of rows appear at the right of the Line Drawings. Example: 1-4 means knit rows 1 to 4; 5-7 means knit rows 5 to 7; 8-12 means knit rows 8 to 12, etc. etc. (See below for more Pattern Stitch Symbols.)

BLOCKING and ASSEMBLING GARMENTS

Block each section of your knitting separately **BEFORE** assembling any garment. This not only makes putting your garment together much easier but gives it that professional look of perfection. For the correct assembly of garments and all other important information regarding machine knitting, refer to our book "Practical Knitting Hints."

PATTERN STITCH SYMBOLS

= knit stitch

= purl stitch

= empty needle (leave in working position)

= needle not used (in the out of work position)

= needle in the holding position

= 2 stitches on 1 needle - either transferred from the right side or the left side, then put the needle into holding position

= needle holding 2 stitches. Stitch has been transferred from the LEFT

= needle holding 2 stitches. Stitch has been transferred from the RIGHT

= 3 stitches on 1 needle. The 1st and 3rd stitch in a group of 3 needles has been hung on the 2nd or center needle.

The diagrams (Line Drawings) for pattern work are followed just as they are shown and are to be read as you look at them while knitting the garment.
