HOUSEHOLD KNITTING MACHINE

ONE-TOUCH AUTOS

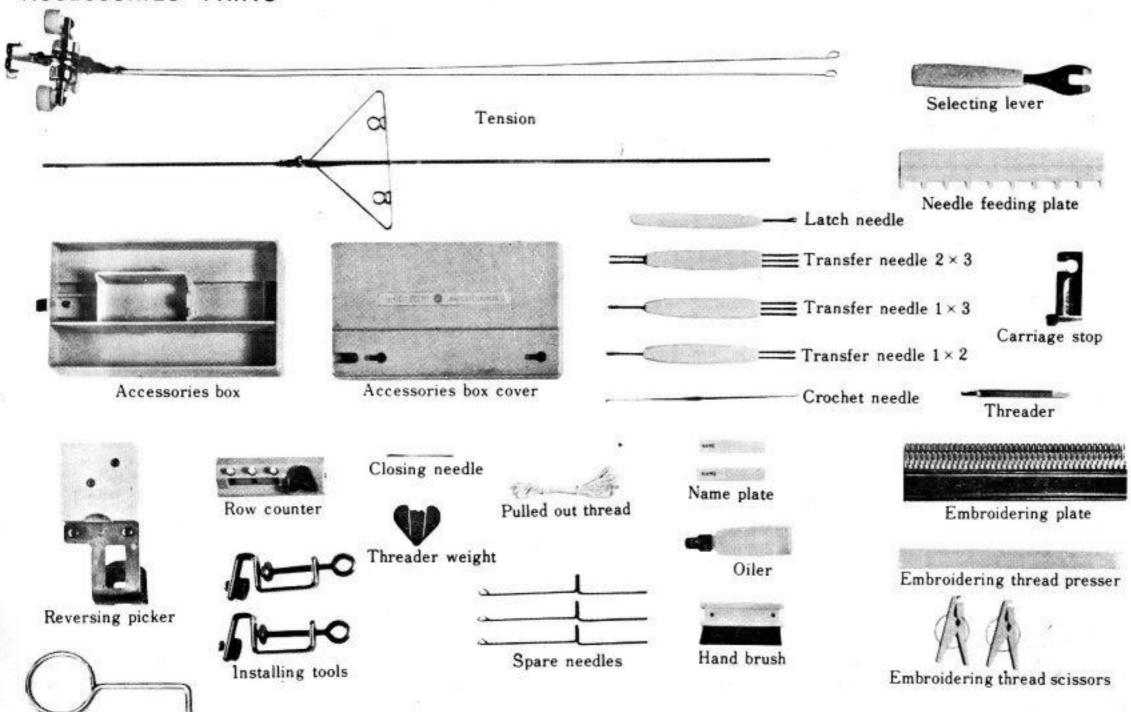

INSTRUCTION BOOK

MODEL K-881

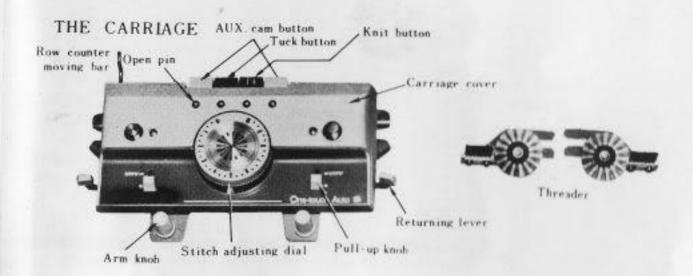

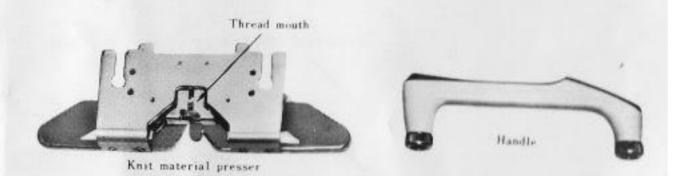

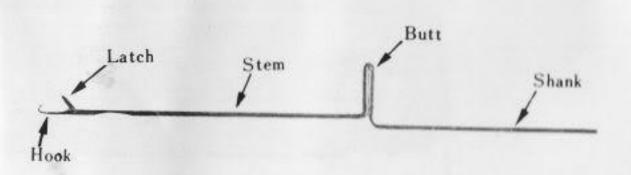

ACCESSORIES PARTS

Needle stopper puller

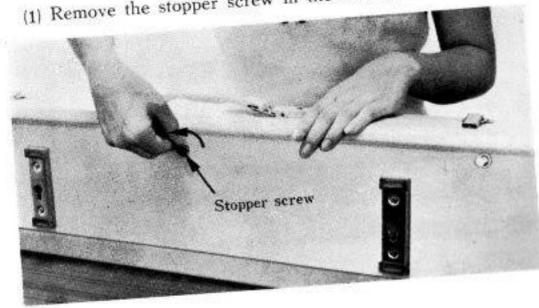

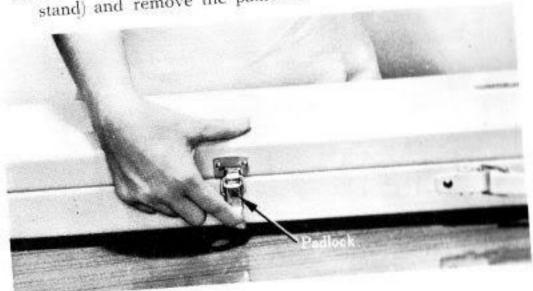

☑ I. HOW TO SET UP THE MACHINE

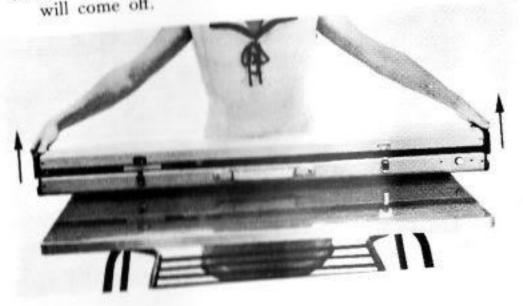

(1) Remove the stopper screw in the rear of the machine.

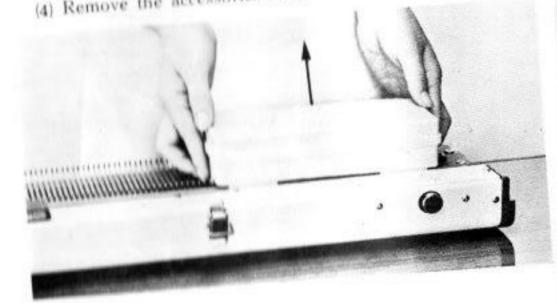

(2) Put the handle on the opposite side of the table (knitting stand) and remove the padlock.

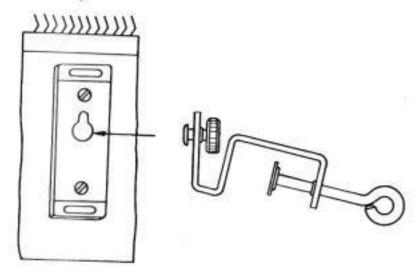

(3) Lift up the cover lightly and pull it towards you and it will come off.

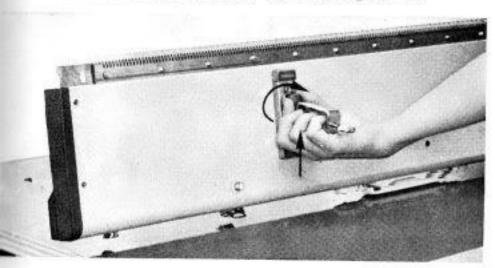

(4) Remove the accessories box.

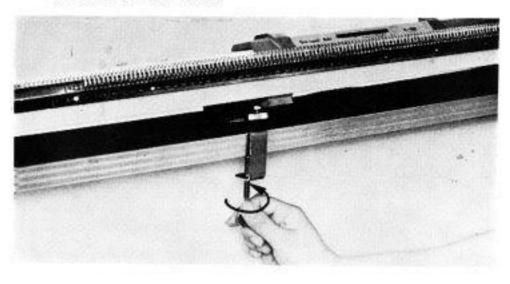

- (5) Take out the installing tools from the accessories box and insert tools into the installing hole in the rear of the machine
 - * Turn the tightening nut of the installing tool to your left fully.

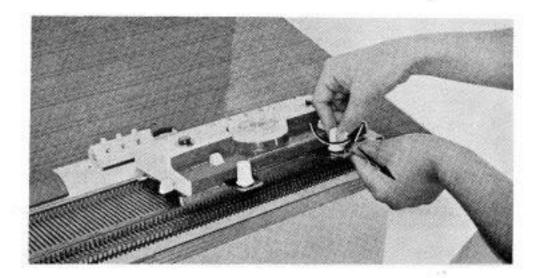

(6) Push up the installing tool to the limit and tighten it and turn the knob to your right and tighten it.

(7) Tighten both sides with the installing tools and set the machine on the table.

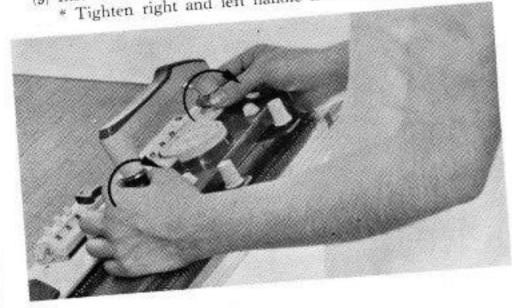

(8) Release the carriage stopper.

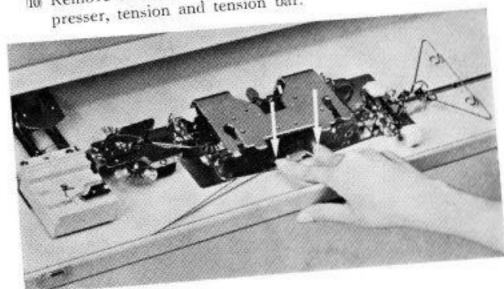

(9) Install the handle.

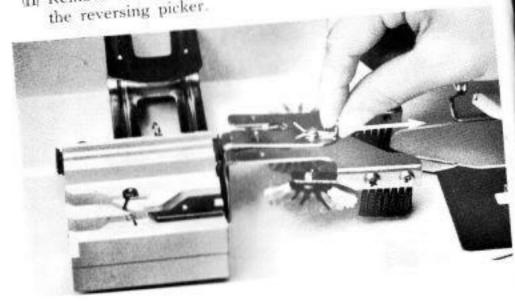

* Tighten right and left handle nuts at the same time.

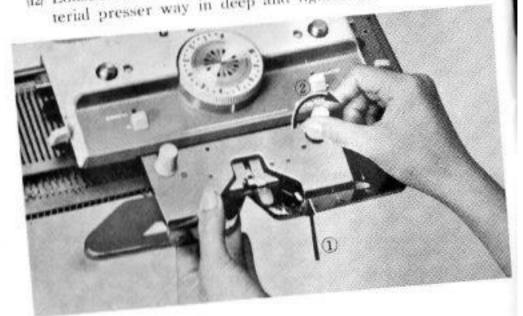

10) Remove the cover pressing spring, take out the material presser, tension and tension bar.

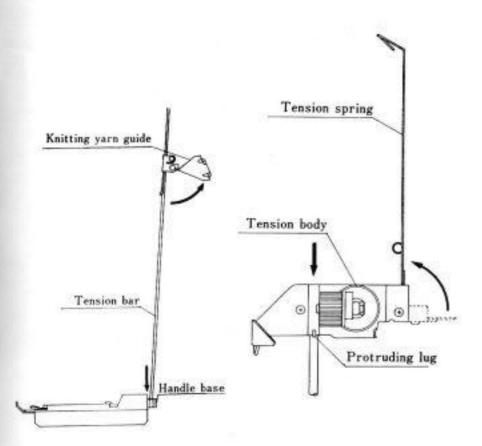

(11) Remove the setting pin and take out the threader and the reversing picker.

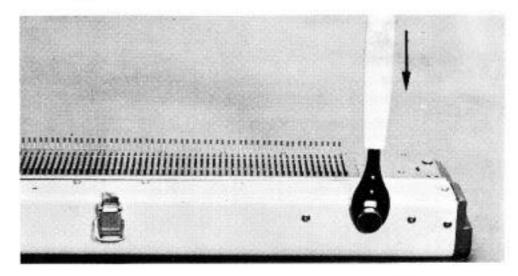

(12) Loosen the arm knob of the carriage, push in the material presser way in deep and tighten it.

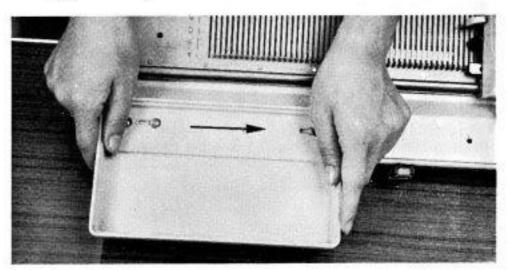

- With the bent side of the tension bar downwards, insert it to the hole of the handle base. Raise up the knitting yarn guide to the opposite side.
- (14) Raise up the tension spring of the tension body and by matching the groove to the protruding part, insert it.

[15] Insert the selecting lever with the name plate JUKI in front.

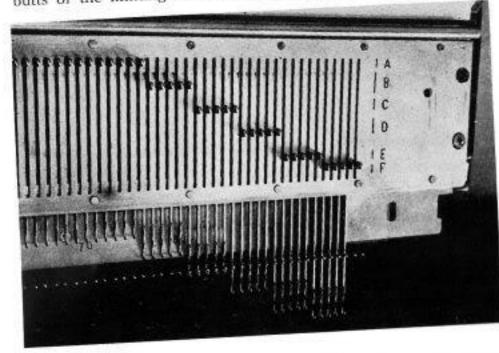

(16) Insert the accessories box cover by matching the hole with the pin on the right side of the machine case, move it towards the left and set it. (To be used to receive latch needles and transfer needles.)

☑ II. BASIC KNOWLEDGE BEFORE KNITTING

1. The positions of the butts of the knitting needles On both sides of the grooved plate, the positions of the butts of the knitting needles are marked as A, B, C, D, E, F.

Position A denotes needles at rest (position of unused need-

Position B denotes position for plain knitting

Position C denotes position for plain knitting

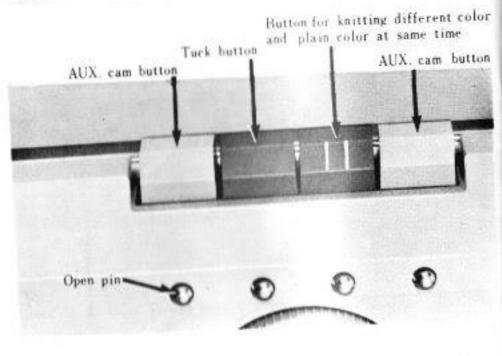

Position D denotes position of selected needles

Position E denotes position of pull-up knitting

Position F denotes position of needles at rest (front side) (used for return knitting)

2. Cam buttons

These button are used for knitting different color and plain color at the same time, tuck knitting or slide knitting. (For returning, just push the open pin from above)

1. Pull-up knob and returning lever

(1) Pull-up knob

There are two positions, one is "pull-up" position and the other is o position.

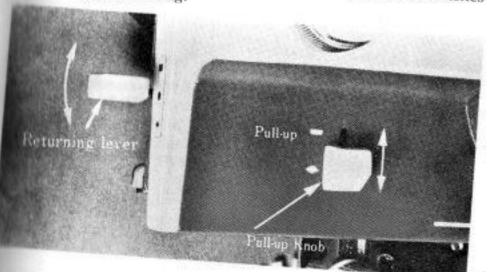

For pull-up knitting, match it with "pull-up" position. For other knitting jobs, match it to the oposition.

(2) Returning lever

For this knitting, there are three positions, \(\subseteq \cdot \cdot \).

- i position is used for pull-up knitting and return knitting.

 i position is used for making the pulled up knitting stitches
- o : position is used for making the returned part of stitches

RELATION BETWEEN THE CAM BUTTONS, PULL-UP KNOB AND RETURN LEVER KNITTING

Kind of knitting	Positions of buttons, Knob and lever	Relation between the car riage direction (arrow) and position of knitting needles
Plain Knitting		← → ○All needles at B, C, D, E, F positions can knit and after carriage is passed, they all return to B position, arranged in order.
g (Slip-stitch) of B, C positions	2 4 O to 3	OB, C needles cannot knit. D, E, F needles can knit and after carriage is passed, they return to B position, arranged in order.
Slide knitting (Slip-stitch) Idle feeding of B, C posi	1 0 do 1 s	B, C needles will not conit. D, E, F needles can knit and after carriage is passed, return to B position, arranged in order.

Kind of knitting	Positions of buttons, Knob and lever	Relation between the riage direction (arroy and position of knitt needles
Diff. pattern knitting (Diff. color at same time)		OB, C, D, E, F needles knit and after carri is passed, return to position, arranged in order.
Tuck knitting		B & C needles cann knit though the thread will be caught by the hook. D, E, F needles can kn and after carriage is pussed, return to B position, arranged in order. Same as plain knitting
Tuck	of the state of th	B, C needles can not conit though the threads will be caught by the book. D, E, F needles can not and after carriage passed, return to B osition in order.

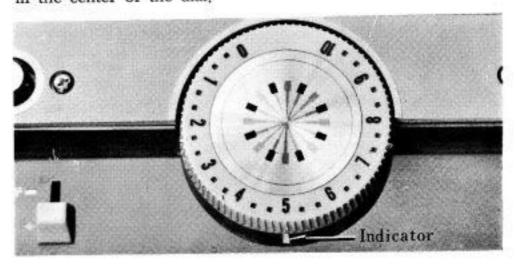

Kind of knitting	Positions of buttons, Knob and lever	Relation between the car- riage direction (arrow) and position of knitting needles
Pull-up knitting		○B, C needles can knit and after carriage is passed, return to B position, all arranged in order. ○D, E needles cannot knit after carriage is passed, return to E position, all arranged in order. ○F needle does not move
Plain knitting of only the pulled-up part by return of pulled-up knitting	404	○B, C, D, E needles can knit and after carriage is passed, return to B position all arranged in order. ○F needle does not move.
Idle feeding during pull-up knitting	P P	OB, C, E, F needles do not move. OD needle does not knit and after carriage is passed, moves to E position.

* In knitting all patterns, when return knitting is to be performed, match both right and left returning levers with the mark.

4. Muit stitch adjusting dial

The knitting stitch length must be adjusted according to the size of the knitting thread.

The knitting figure should be matched with the indicator in the center of the dial,

(EXAMPLE)

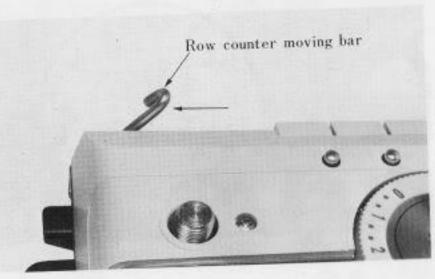

Knitting thread	Graduation
Extremely fine	0 ~ 3
Medium fine	3 ~ 6
Normal thickness	6 ~ 9
Extremely thick	9 ~ 10

5. Row counter moving bar

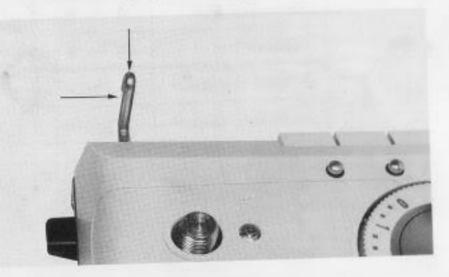

If this bar is raised up to your right, it will come up on the opposite side.

* To store it away, push it forward and tilt it to your left.

To bring it out

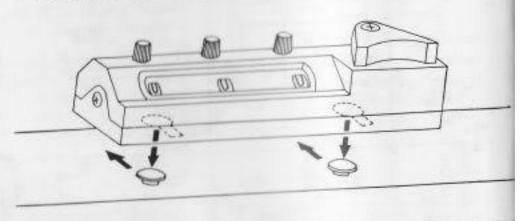

To store it away

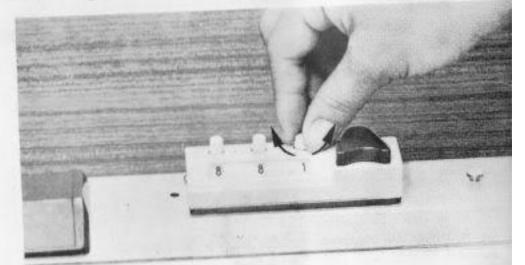

6. Row counter

Row counter shows, in figures, the number of rows knitted. There are two places, left and right, to attach this device but depending upon the position demanded by the knitting needles, attach it to one side.

* To remove the row counter, pull it forward.

To return the figures to "0", rotate the respective knobs either to right or left.

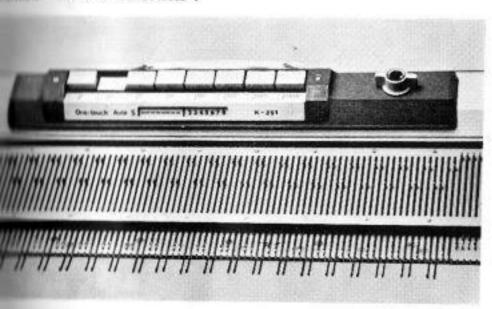

Needle selector

With the pairing of the knitting needles, many patterns can

The picture below shows positions of the selected needles in the B and D positions by the needle selector,

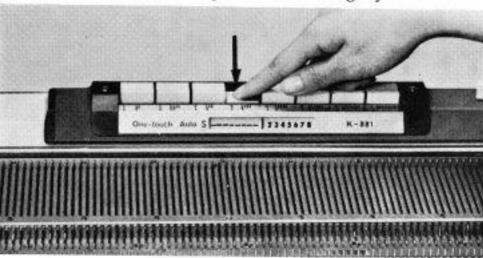

The assembling of the knitting needles in this condition is alled "Needle Selection".

(1) Pattern buttons

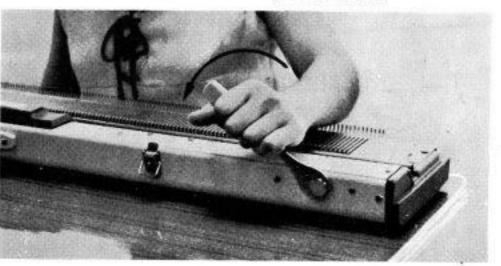

By pushing one button only, the shape of the needle selection as shown by the indicator, is set.

* To return the pattern button to its original position, just push the other pattern buttons lightly.

(2) Needle selection ever

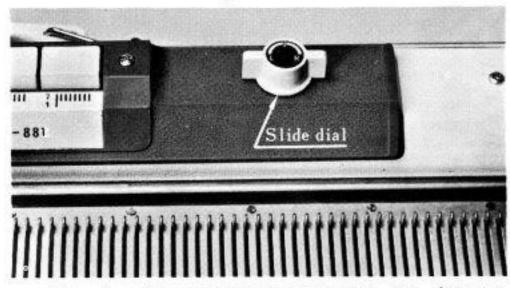

After pushing the pattern button, tilt the needle selection lever to your right, to the limit, and the knitting needles at the B position will be "selected" to the D position in accordance with the indicator of the pattern button.

(3) Slide dial and the slide graduation

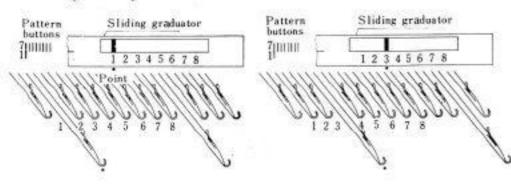

Slide dial is used to move the position of the selecting needles horizontally.

Match the figure of the slide graduation with the red line and fix the position of the knitting needles which becomes the standard for selecting the needles.

When the slide graduation is matched to "1", the standard knitting needles to be selected come to "1" position of the groove plate.

Thus, if the slide graduation is advanced to 2..3..., the standard knitting needles also move to 2...3... positions of the groove plate.

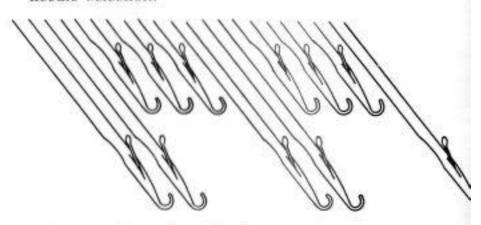

* Do not move the pattern buttons or the slide dial when the selecting lever is in knocked down condition.

8. Selecting units not in pattern buttons

It is possible to select needles not in pattern buttons in t following manner:

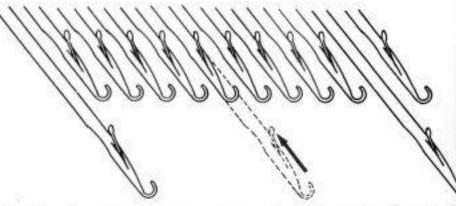

Example 1: 2-3 needles selection

- ① Match the slide graduation to "1" and make 1-4 need selection.
- ② Next, match the slide graduation to "2" and repeat 1 needle selection.

Example 2: 1-9 needles selection

- ① Make 1-4 needle selection.
- ② Next, return the knitting needles at "D" position, whi are placed at alternate units, to B position.

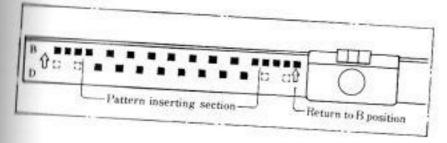

Besides the above, many other selected needle shapes c be made by combination of pairings.

9 Partial selections

When the pattern is to be inserted to one section of the knitting cloth, select the needles and by leaving the required needles only, return all other needles to the B position.

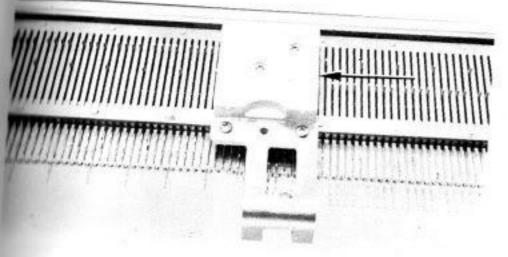

* Note: For tuck knitting and sliding stitch knitting, reverse this process and return the needles at B position to position D.

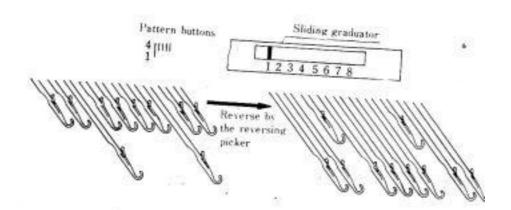

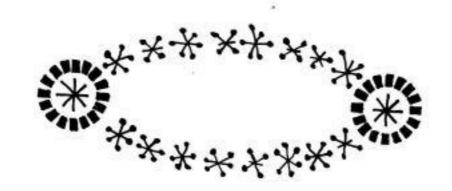

10. The reversing picker

This is used for reversing (opposite direction) the shape of the selecting needles.

For example: When the 4-1 needle selection is required, select the needles 1-4 and pass the reversing picker from tight to left.

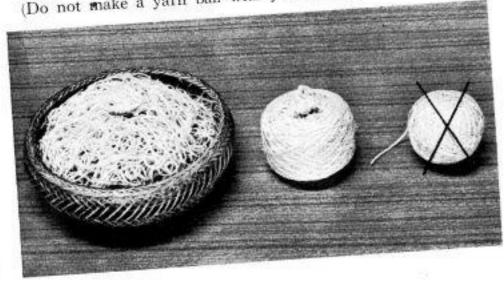

☑ III. HOW TO START KNITTING AND PLAIN KNITTING

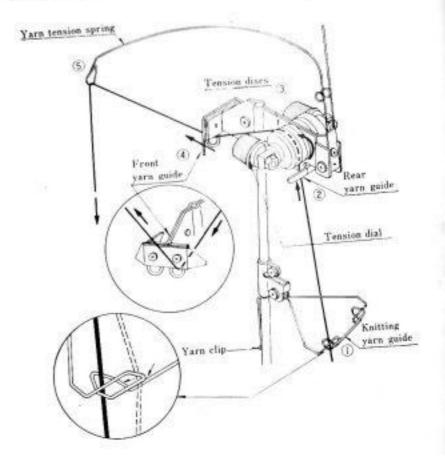

1. Preparation for knitting

Remove all twirls from the yarn and place it fluffly in a (1) The knitting yarn basket or box. JUKI's yarn basket is ideal for this pur-

(Do not make a yarn ball with your hands)

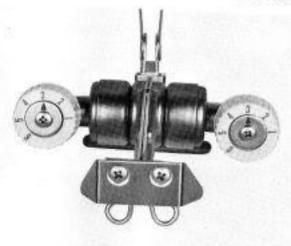

- (2) Pass the knitting yarn to the tension in the following order:
- ① Pass it to the knitting yarn guide.
- 2 In-between the rear yarn guide and the tension disc.
- Clamp it to the tension disc.
- Pass it to the front yarn guide.
- (5) Pass it to the tension spring.
- 6 Clamp the end of the yarn on the yarn hanger.

(3) The yarn adjusting dial of the tension is adjusted by the

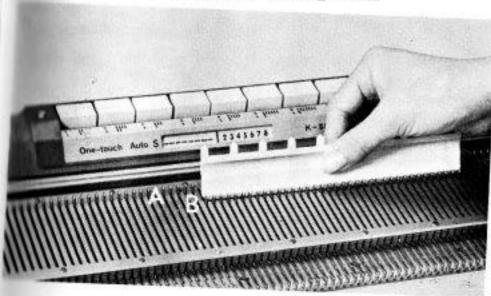

If the figure of the yarn adjusting dial is increased, the tension of the knitting yarn becomes stronger.

For medium fine yarn, match the tension dial to 3-4.

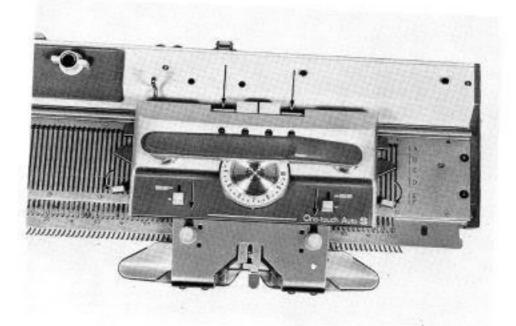

(4) Take out the knitting yarn.

Take out the knitting yarn from A position to the B position in consonance with the knitting width.

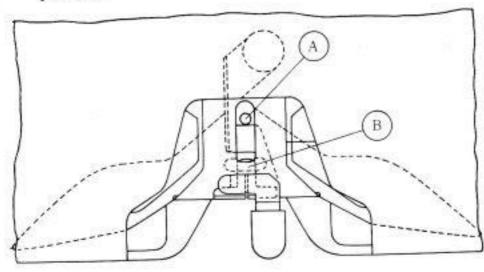

- * Set the carriage, knob, and lever to the plain knitting condition (refer to the chapter on "Relation Between the Cam Button etc".) and after one round-trip, arrange the needles in order.
- (5) Move the carriage to the right side of the machine and set it as follows:

Auxiliary cam button: push both right and left buttons Pull-up knob: match both right and left to the mark. Returning lever: match both right and left to the mark. Stitch length adjusting dial: a little coarser than standard (match to about 7).

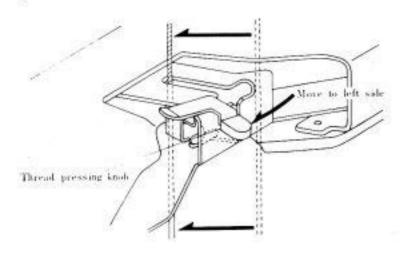

(6) Pass the knitting yarn from the tension to the thread mouth in the following manner:

* The thread mouth B is to be used for different colored patterns.

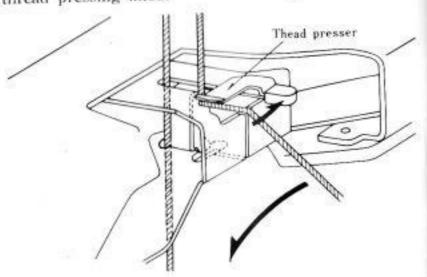

① Move the thread pressing knob to left side and insert the knitting yarn deep into the center groove.

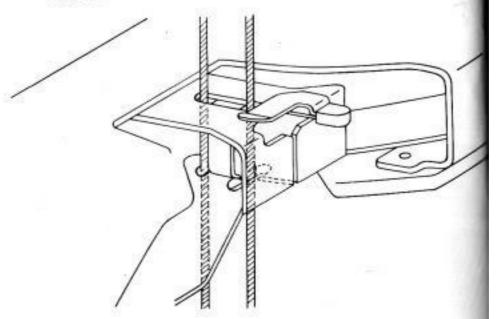

After verifying taht the knitting yarn is positively inserted into the thread mouth A, return the thread pressing knob to right side.

② For different colored patterns, after passing the thread through the thread mouth A, duck the knitting yarn under the thread presser while moving it against the thread pressing knob.

③ Pull the end of the different colored yarn slightly and insert it the thread mouth B.

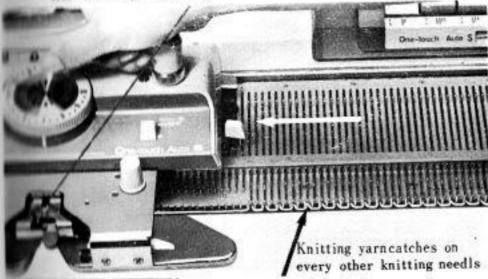

Start of of knitting

(I) Match the slide graduation to "1" and select 1-1 nee-

Pull the end of the knitting yarn lightly with your left hand and move the carriage to left.

 Move the carriage until its end is completely off from the knitting needles.

* The knitting yarn will be caught on every other needles.

(b) Match the slide graduation to "2". Select 1 · 1 needles and knit one row.

(4) Match the slide graduation to "3". Select 1-1 needles and knit one row.

(6) Thereafter, match the slide graduation from "4" to "8" and as you move the slide, keep on knitting the same way.

(6) Return the slide graduation to "1" and return the auxiliary cam buttons, both right and left, to their original positions.

(7) With this position, knit 4-5 rows of plain knitting.

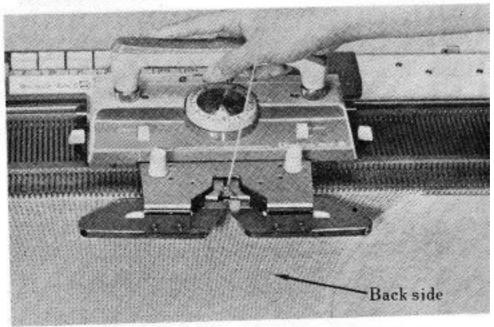

3. Plain knitting ("Meriyasu" knitting)

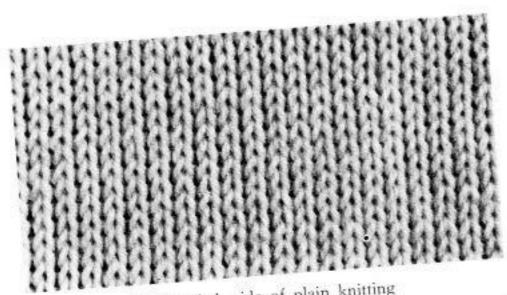

(1) Match the stitch length adjusting dial graduation with the figure most suited for the knitting yarn.

(For example: For medium fine yarn, about "5")

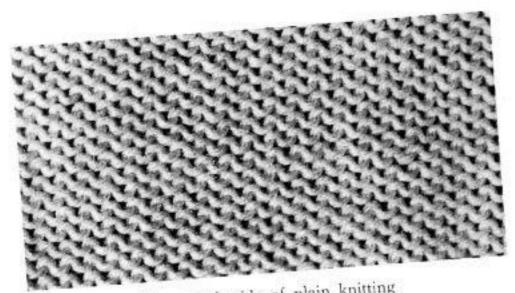

(2) If the carriage is moved to right and left as you keep on knitting, plain knitting job will be produced.

The forward side (operator's side) of the yarn in the machine is called the "rear stitch side" and the opposite side is called the "front stitch side".

Front stitch side of plain knitting

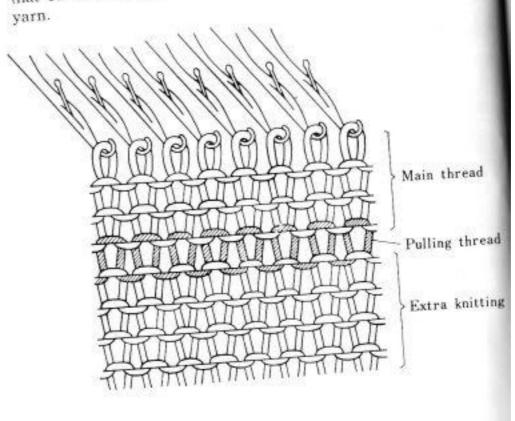

Rear stitch side of plain knitting

Before starting the knitting or when the knitting material is 4. "Extra" knitting to be removed from the machine, the part which is knitted by a different yarn is called "sute" or extra knitting.

To enter into the main knitting work from "sute" knitting, knit one row with the pulling thread and then do the main

If the pulling thread is pulled out, the "sute" knitting and knitting. the main knitting become separate.

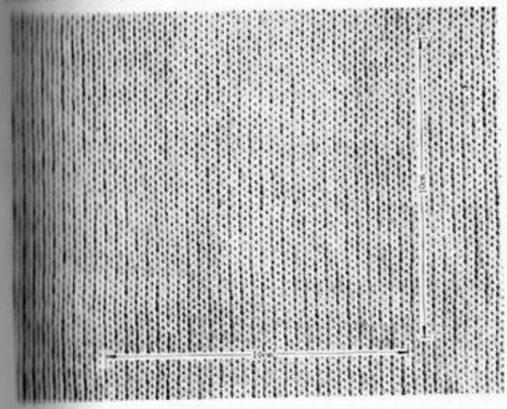

At the end of knitting, "sute" knitting can be continued in that condition and 6-10 rows can be knit with a different

Mnitting gauge

This means a knitting cloth with horizontal length of 10cm and vertical length of 10 cm and the number of knitting mesh and number of rows contained therein.

This knitting gauge is made of 15 cm (6") square knitting that by the same yarn as the knitting yarn and removed from the machine and left there in natural condition for a while and counts the knitting stitch number of 10 cm of homental knitting and 10 cm of vertical number of rows.

The standard gauge of plain knitting is as follows:

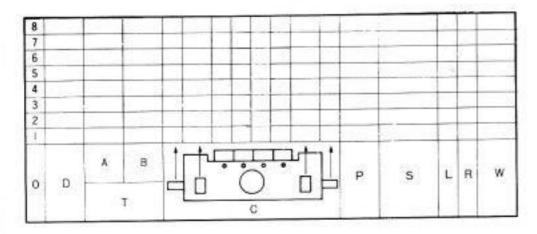

Yarn	No. stitches	No. rows
Extremely fine	40	56
Medium fine	32	44
Normal thickness	26	35

This gauge computes the number of needles used a number of rows by calculating the number of stitche number of rows from the size and dimension of the k cloth. So, select a right knitting gauge to suit your tas

☑ IV. HOW TO KNIT PATTERNS

How to read the Working Table

Working Table

()=Order....Shows the order of operations.

1)=Carriage moving direction.... Move the carriage toward the arrow direction. The sign C means to repeat all operations by making round-trips.

T=Thread mouth.... Of the 2 thread mouths A and B, pass the knitting yarn through mouth indicated.

C=Carriage....Shows the handling of respective buttons, pull-up knob and returning lever.

Buttons: Push the buttons with sign. Match the pull-up knob and returning lever with the respectively indicated positions. (The sign "shows the condition of same set.)

The figures in the center () shows the graduation figure of the stitch adjusting dial.

P=Pattern buttons.....Push the designated buttons.

S=Slide graduator.... Match the red line with the designated figure. When the designated figure is over 2 figures, repeat needle selections by moving the slide graduator.

L=Selection lever. . . . The sign O means to work the selecting lever.

R=Reversing picker.... The sign () means to handle the reversing picker and reverse the selected shape.

W=Weave thread.... This shows the passing of the weave thread to the knitting needles.

P-u=Pull up

YARN COLORS BC.... Blue color GC.....Gray color BRC....Brown color YC.....Yellow color RC.....Red color OC.....Orange color BGC....Beige color GRC....Green color WHC....White color PPC....Purple color PC.....Pink color DRC.... Deep red color

POC....Peony color

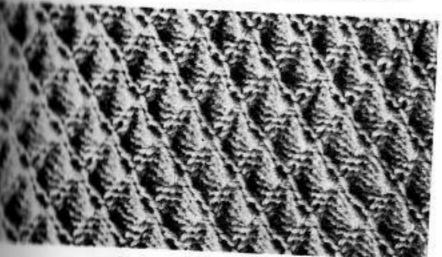

MRC.... Maroon color

YG.....Yellow green color

fullayer (pull-up) knitting

pending upon the space between the stitches and number niws, different kinds of pullover knitting can be produced many different colored yarns.

Example of pullover knitting of the existing pattern

Knitting (rear side)

F		" P-U	Ħ	+	P-U	"	1-3		F		
	II N	N			1.4	0	e e		+		
1	0	0	100	-	1 1/4	0	N		L		
-	0	P-U			0	V.	11.	3	To	1	-
t	in the	"	7	1	0		a i				
	44	0			10	W		-	-	1	
	0	0	1	1 1	1 11	10	7				

Working table

At first, plain knit a while and place the carriage at the right side of the knitting cloth.

① Thread mouth.... Pass the yarn through the mouth A. Pull-up knob. Place both right and left knobs at the "pull-up" position.

Returning lever.... Match both right and left levers with the 🗌 sign.

Pattern buttons....Push the $\frac{3}{1}$

Slide graduation... Match it with "1"

Selecting lever.... Tilt it fully to right and select needles.

- * When the knitting needles come out to the D position, return them to the B position.
- 2 Knit 4 rows in that position.

(The selected needles will return to the E position.)

- 3 Match the left pull-up knob with the \(\rightarrow \) mark and the returning lever to the O mark.
- Knit 2 rows.

(The needles at E position will move over to the B position and become plain knitting).

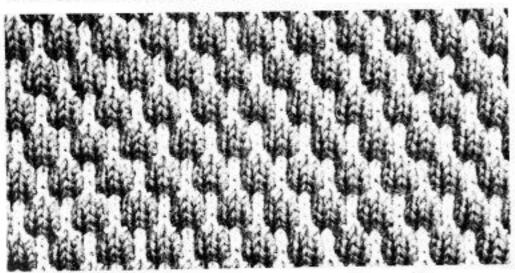

- (5) Match the left pullover knob with the "pull-up" position and the returning lever with the mark.
- (6) Match the slide graduation with "3" and select the needles. 7 Repeat operations 2 - 5
- (8) Match the slide graduation with "1" and select the needles.
- Repeat operations ② ® and keep on knitting.

(2) Color scheme pullover patterns

Pass the white yarn to the right side of the tension and the different color (brown) yarn to the left side.

The brown yarn should be caught on the latch of the tension and let it rest there.

Pass the white yarn to the thread mouth A after plain knitting, place the carriage to the right side of the knitting cloth.

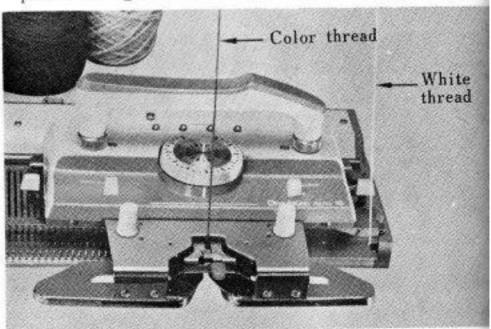

Different color pullover pattern (Front side)

		т				1			1 1
0	D	A	1) - -		Р	s	LRW
1	+	BRC		P-U	P-U		1 - 3	1	0

12	->	34.	"	30			(2)		

Working table 2

① Remove the white thread from the thread mouth, cate it to the right side of the groove plate and by removin the different color thread from the tension thread late pass it through the thread mouth A.

② Pullover knob......Put both left and right knobs at t "pullover" position.

Returning lever.... Match both right and left levers to t

Pattern buttons.... Push the $\frac{3}{1}$

Slide graduation.... Match it with "1".

Selecting lever.... Select by tilting it to right to the lin (Note) When both ends of the knitting needles come of to the "D" position, return them to the "B" position.

3 Knit 4 rows in that position.

Match the left pullover knob with the
 sign and returning lever with ○ sign.

⑤ Exchange the different color thread at thread mouth with that of the original (white) yarn. (Catch the different color yarn on the left edge of groove plate). in half 2 rows in that position.

Abitch the left pullover knob with the "pullover" mark

Exchange the original color (white) yarn with of the different color (brown) yarn.

Match the slide graduation to "3" and select needles.

Hopeat operations 2~8.

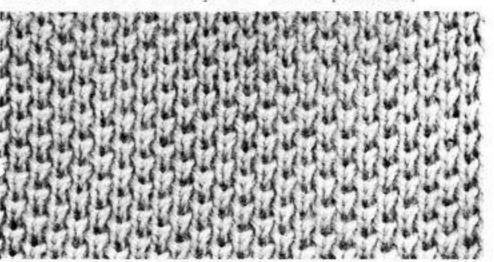

Match the slide graduation to "1" and select needles.

III Hepeat operations 3 ~ 10 and keep on knitting.

2. Tuck knitting

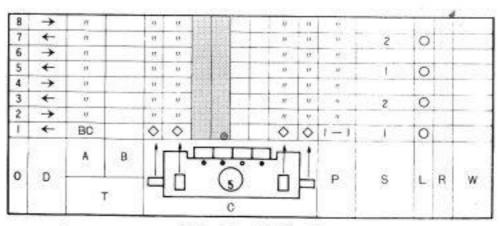

This form of knitting produces soft 3-dimensional appearing stitches due to the ample space produced by the pullover knitting.

If tuck knitting of every other needle is carried out, the so-called "alternate stitch pattern" can be produced.

Tuck Knitting (Front side)

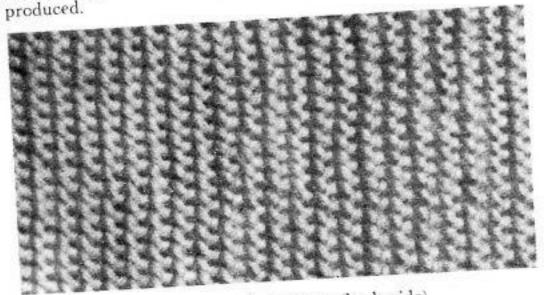

* When selecting the needles, if both ends of the knitting needles remain at the "B" position, take them out to the "D" position.

Working Table 3

3. Continuous tuck knitting

This is one form of tuck knitting by which, by continuing the tuck knitting, a 3-dimensional appearing tuck pattern can be produced.

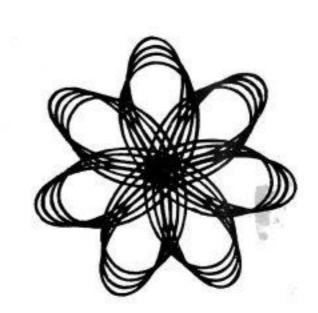

Continuous tuck knitting (back side)

* When selecting the needles, if both ends of the knitting needles remain at the "B" position, take them out to the "D" position.

^{**} Pull up the 3 threader yarns and hang them on the hook of the intermediate knitting needles

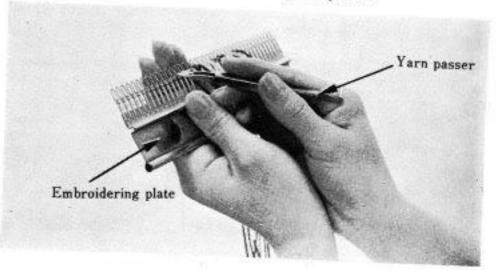

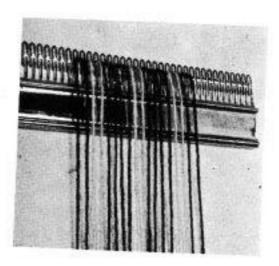

Original yarm yellow

- ① Set the carriage for plain knitting.
- ② Plain knit a while with the original yarn and place the carriage to the right side of the knitting cloth.
- 3 Prepare 3 yarns each of 3 different colors (altogether 9 yarns) which are 5 times longer than the knitting height.
- (4) Pass these yarns through the needle holes of the embroidering plate by means of the yarn passer.

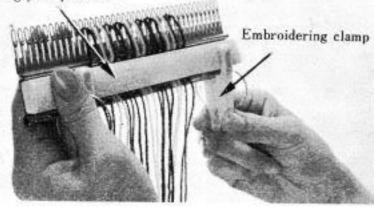

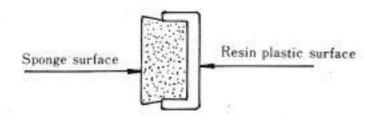

(5) Press down the yarn by the embroidering yarn presser and set both ends with the embroidering clamp.

* When the thread used is wool yarn, press it down with the resin plastic of the embroidering yarn presser and when the thread is slippery lace type, press it down with the sponge surface.

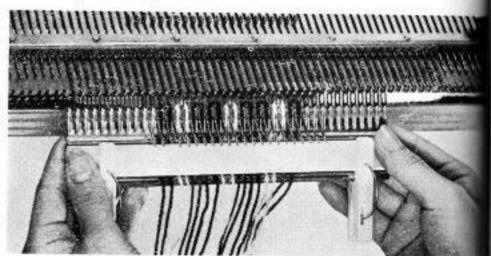

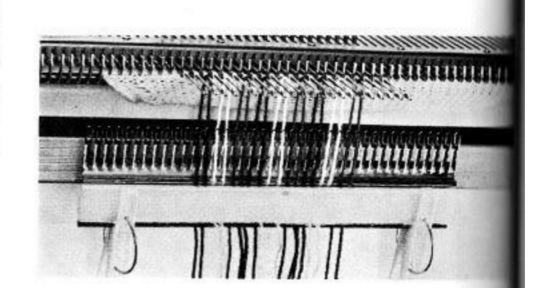

(6) Take out 20-22 knitting needles (little more than the number of threads) of the embroidering part to the F position. The needles of the embroidering plate are passed through the hook of the taken out knitting needles from above, the yarn will be caught by the hook.

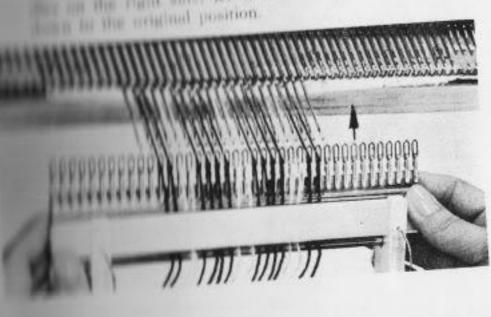

In that position, pull the embroidering plate and le the plate hang down.

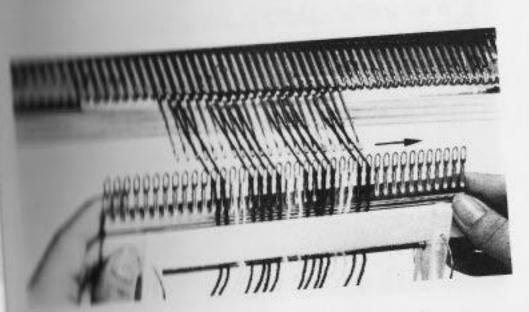

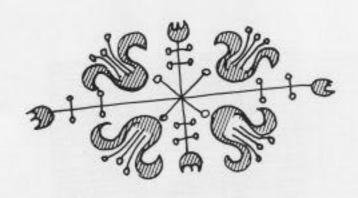

or I thus in that position. to mit the knitting needles a little more than the

landering threads to the F position. the an the embrondering place so that the knitting yarn heat with the knitting needles without sagging. the limiting the yarn to the respective knitting neethe right side, let the embroidering plate hang

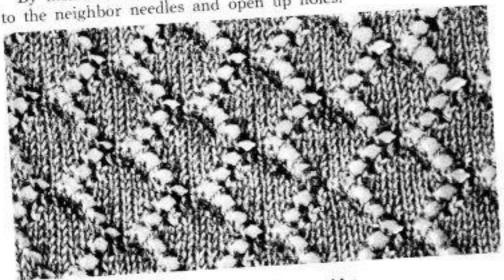

- (i) Repeat operations (8 ~ (ii) twice.
- 12 Repeat operations (8) and (9).
- (3) Lift up the embroidering plate so that the yarn becomes level with the needles, and by hanging the yarn to the respective knitting needles on the left side, let the embroidering plate hand down to the original position.
- (4) Repeat operations (2) and (3) twice more.
- (5) Repeat operations (8)~(1) many times and keep on knitting

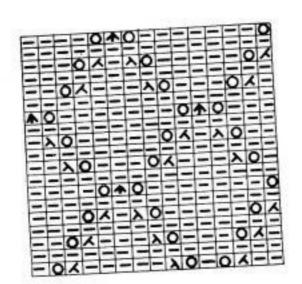

8. Hole pattern (Lace knitting)

This is one form of knitting by which many holes are made in the knitting cloth to produce a hole pattern effect.

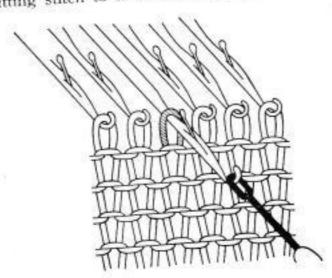

By means of transfer needles, pile up the knitting stitches to the neighbor needles and open up holes.

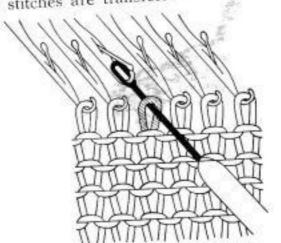

Hole pattern (Front side)

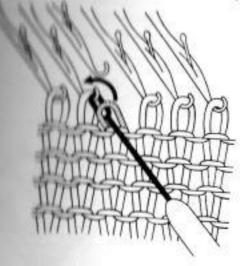

1 Hang the hole of the transfer needle to the hook of the knitting needle, pull it towards you and transfer knitting stitch to the rear of the latch.

② If the knitting needle is pushed in reverse direction, knitting stitches are transferred to the transfer needle

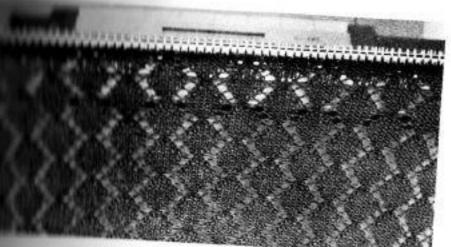

the transfer needle to the hook of the handle and transfer the knitting stitch the till needle, to the B position.

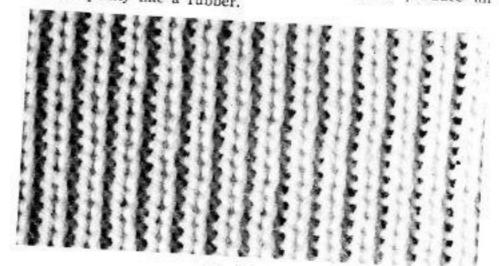

to beatt time row of plain knitting.

A finite will be made where the knitting stitches are immsferred.

9. Rib knitting

This is one form of knitting by which the front side and the back side intersect each other vertically to produce an elastic quality like a rubber.

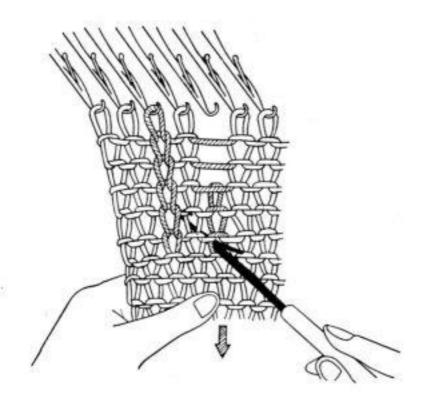

Rib knitting

- Delain knit as many rows as you want to rib knit. Try to knit the stitches rather hard. (When the medium fine yarn is used and the stitch adjusting dial is 5, match it to 4)
- Release the knitting stitches to be ribbed from the needle and change the stitches toward front and loosen about 3 rows toward front.
- 3 Insert a latch needle tool to the lowest row of changed stitches and pull it downwards. The knitting stitches will be loosened to the latch needle tool position.

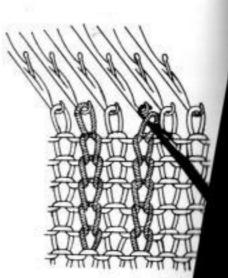

- As you pull the latch needle tool sticking to the of side, hang the horizontal yarn of the upper row to hook.
- (5) Then if the latch tool is pulled forward, you can lone stitch.

Repeat this process over and knit the number of reloosened by the latch needle tool.

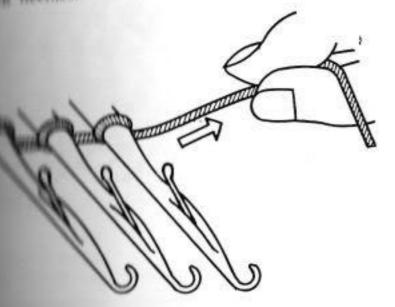

6 Slide the last stitch behind the latch over the latch) and by hanging the hook of the latch needle tool to the hook of the knitting needle, transfer the knitting stitch to the knitting needle.

to the time form of knitting to knit cord for cape, hood,

I be problem on the size of the cord, take out few knitting meeting in the F position.

Want the knitting yarn of the thread mouth around the course needles.

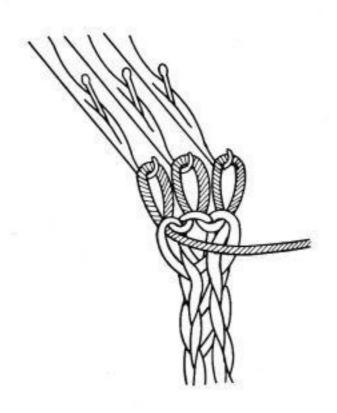

3 Push the auxiliary cam button of the right side.

Push the carriage to right and left.

When the carriage is pushed to left, it will knit but it will not knit when moved to right, thus cord is knitted.

* 1. If the thread tip is pressed down for the first $5\sim6$ rows, it will be simpler.

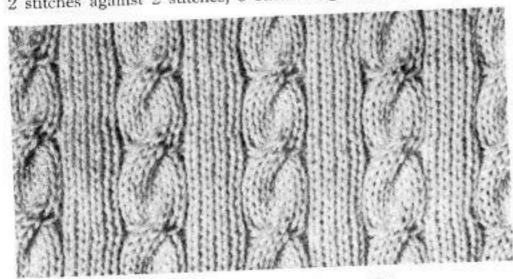

* 2. If the knit adjusting dial graduator figure is lessened than the standard, the knitting job becomes prettier.

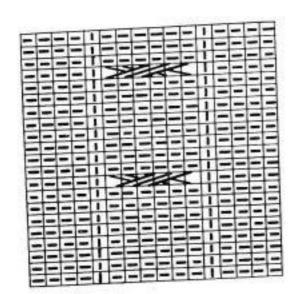

11. Intersecting pattern (rope pattern)

This is one form of knitting by which the knitting stitches are intersected each other.

The stitches to be intersected are 1 stitch against 1 stitch, 2 stitches against 2 stitches, 3 stitches against 3 stitches, etc.

Intersecting pattern (Front side)

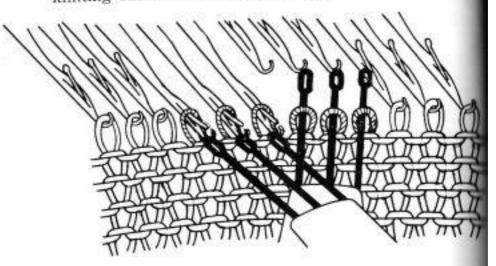

When 3 stitches are to be intersected:

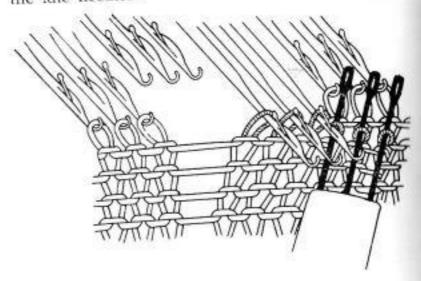

① Use 2 transfer stitches of the 3rd stitch.

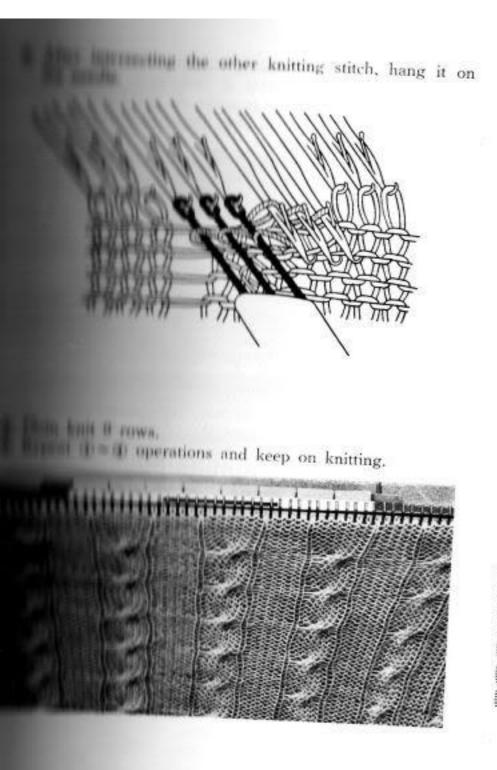

Pick up 3 intersecting stitches to 2 transfer needles.

* Be sure the transfer needles are erect to support t knitting stitches from slipping out.

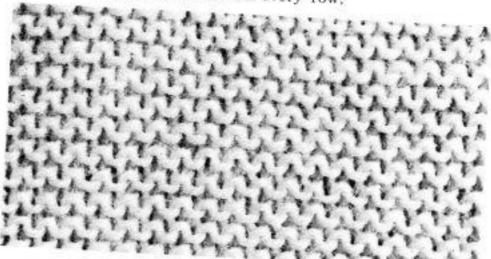

② Intersect the transferred stitches and transfer one side the idle needles.

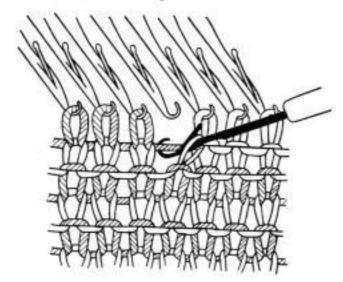

12. Garter knitting
This is one form of knitting by which the front side and the back side is intersected on every row,

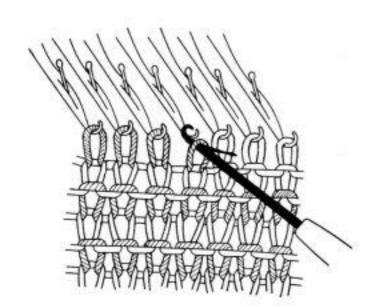

Garter knitting

			-	•	-						

- (1) When latch needle tool is used
- ① Plain knit 2 rows.
- ② Open up all the latches of the knitting needles.
- 3 With the latch tool, change the 2nd row stitches to face
- Repeat operations ①~③.

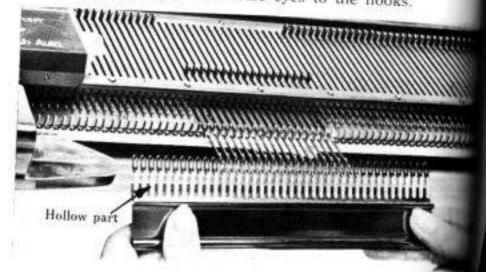

(2) When embroidering plate is used.

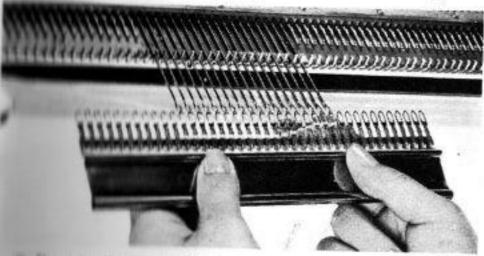

When knitting narrow strip of cloth such as frontal pa etc. use embroidering plate to make the job easier.

- 1) Plain knit a while and place the carriage to the right a of the knitting material.
- (2) Push the left auxiliary cam button and move the carrie idly to the left side.
- ③ Press down the knitting cloth and take out all the kn ing needles to the F position.
- 4 Open up all the latches of the knitting needles and placing the hollow part of the embroidering plate facupwards, hang the needle eyes to the hooks.

Pull the knitting cloth forward and transfer it to the embroidering plate.

The loops of the knitting cloth should be placed to the root of the needle groove of the embroidering plate.

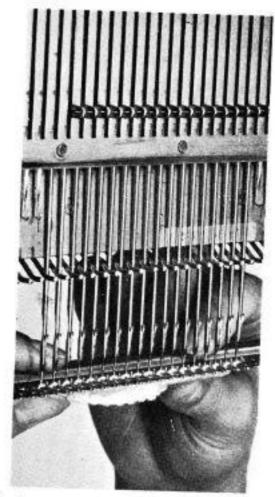

Hemove the embroidering plate from the hook and turn

the hollow part of the needle root will face downwards)
then up all the latches of the knitting needles and by
the up all the embroidering plate horizontally, place the
title even right above the tip of the latch and press it

(8) In that position, pull the embroidering plate towards you. When the pulling gets heavy, tilt the embroidering plate vertically and you can see if the knitting stitches are transferred to the hooks.

When the knitting stitches are all transferred, pull out the embroidering plate diagonally downwards.

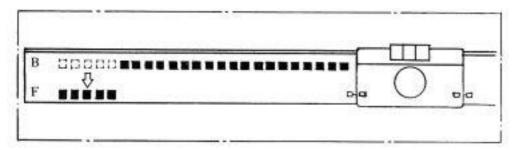

Plain knit 2 rows and repeat operations 3 ~ 8.

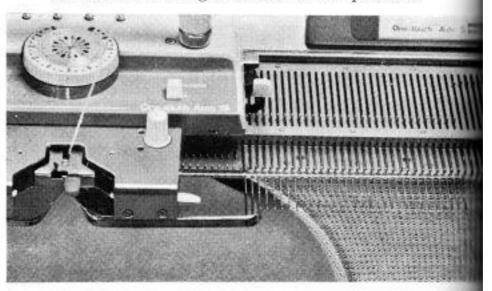

V. RETURNING OF THE PATTERN KNITTING

When knitting curved or slanting parts such as shoulder puffs, sleeve mounds etc. it is necessary to return the pattern knitting.

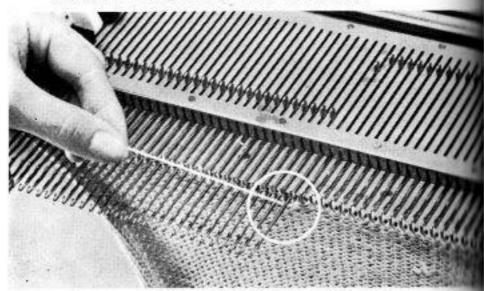

- When decreasing the knitting parts (returning of the unfinished knit part)
 - ① Take out the knitting needles on the idle knitting part opposite the carriage side to the F position.

② Match the returning levers of the carriage, both right and left, with the ☐ mark. (3) Knit one row. Only the needles at the B position w knit and the knitting yarn will go over to the top of the stem of the knitting needles at the F position.

4 Hang the knitting yarn to the knitting needle next the last knitting needle from underside.

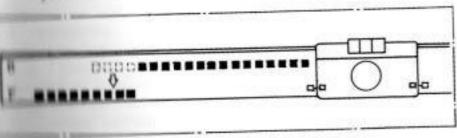

Return the carriage and knit one row.

in Hy increasing the needles of the idle parts (F position),

repeat operations (1~5).

* The number of needles to be taken out to the F position varies according to the curves and slants of the knitting product.

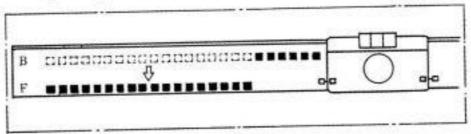

After the returning is ended, match the pull-up knob in the moving direction of the carriage and the returning lever with the O mark and knit one row.

(All the needles at the F position will knit and come

ingether at the B position)

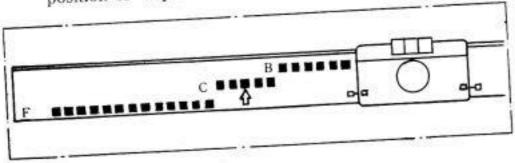

I he merely matching the returning lever with the mark, all returning knittings of pull-up patterns, tuck patterns, different threads patterns or slip-stitch patterns the produced just as in the case of returning of plain knitting.

- 2. Increasing the knitting part (returning of knitting prog-
 - ① Take out all the knitting needles on the idle knitting part opposite the carriage side to the F position.

- 2 Match the returning levers of the carriage, both right and left, with the [] mark,
- ③ Knit one row.
- 4 Hang the knitting yarn to the knitting needle next to the last needle from underside.
- ⑤ Return the carriage and knit one row.

(6) Next, return all the needles on the knitting part from F position to C position.

By repeating the operations ③~⑥, keep on knitting.
 At the last stage, all the knitting needles will line up together at the B position.

* By merely matching the returning lever with the mark, all returning knittings of pull-up patterns, tuck patterns, different threads patterns or slip-stitch patterns can be produced just as in the case of returning of plain knitting.

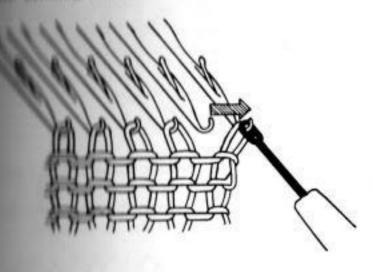

INCREASING AND DECREASING

the process of knitting, it becomes necessary to

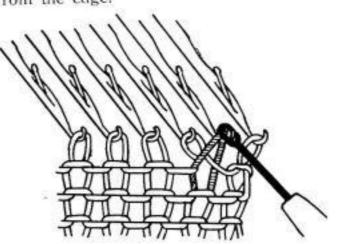

the builting width, increase the stitches and to

A sinch harrense on the side to be increased from A

transfer needle and transfer to the knitting needle

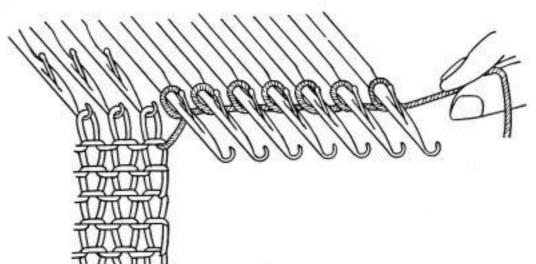

③ Scoop up the rear side of the 3rd needle from the edge with the transfer needle and hang it on the idle needle, 2nd from the edge.

(2) Over 2 stitches increase (increasing by rolling stitch)
Place the carriage on the side to be increased.

 Take out the needles to be increased to the F position and do rolling stitch.

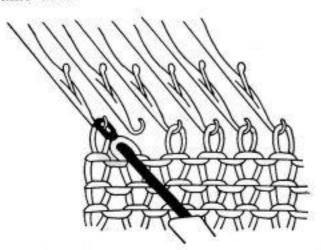

③ Take out the roll stitched needles to the F position, again. Repeat operations ② and ③ and knit 4~5 rows.

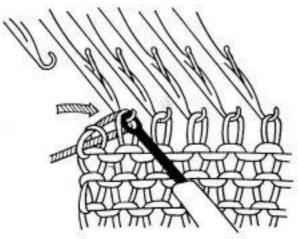

2. Decreasing

(1) One stitch decrease

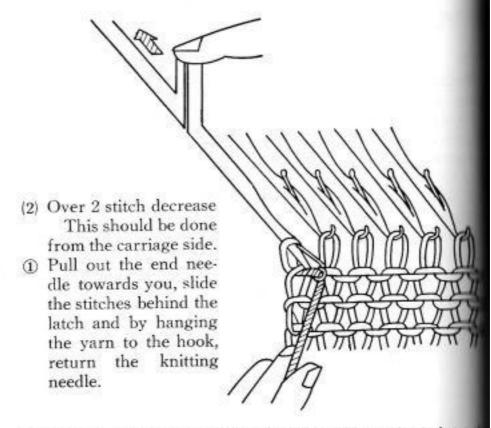

① Use one-stitch transfer needle, pick up the 2nd stitch from the end and in that position, transfer the edge stitch at the same time.

2 Hang the 2 stitches together to the 2nd needle.

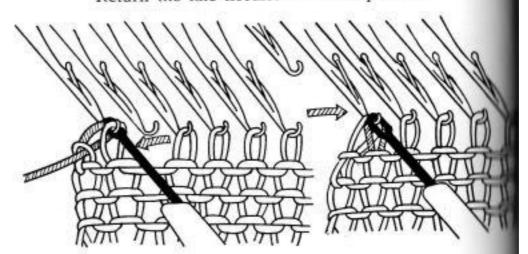

3 Return the idle needle at the end to the A position.

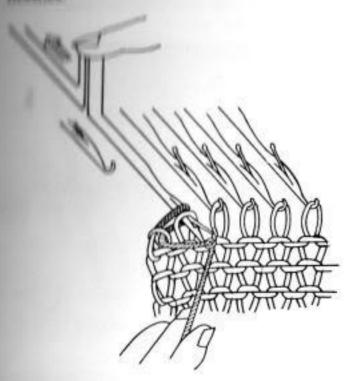

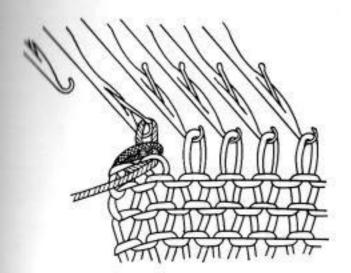

② Use one-stitch transfer needle, move the 2nd stitch to lend stitch and pile them up.

③ Transfer the piled up stitches at the end to the 2nd need Return the idle needles to the A position.

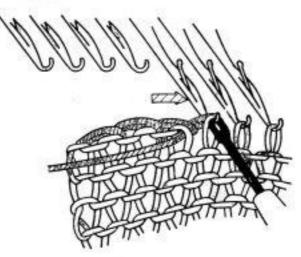

to be not these needles forward, slip the piled up stitches to him the latches, hang the yarn to the book and return

⑤ Repeat this operation until the 2nd stitch from the last stitch to be decreased and pile up the last stitch to the neighbor needle.

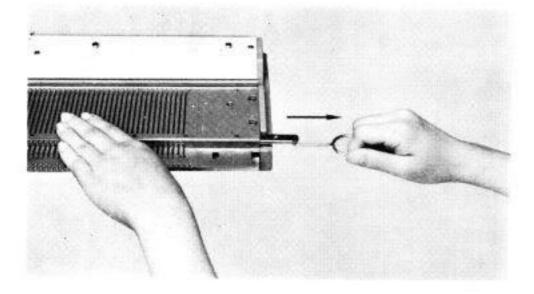

6 Knit one row with the carriage.

☑ VII. WHAT TO DO WHEN FOLLOWING TROUBLES OCCUR

1. When the knitting needles are damaged

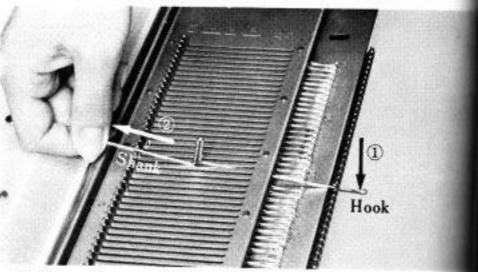

When the knitting needles are curved or the latches are damaged, replace them in the following order:

① Catch the needle stopper puller to the needle stopper, which can be seen at both ends of the groove plate, and pull it to the position where the knitting needle is to be changed,

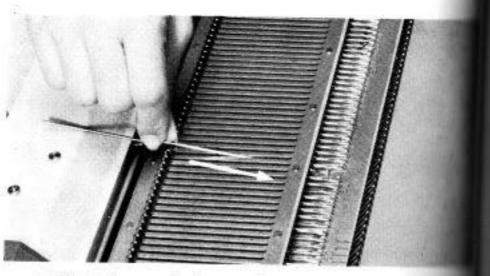

2 Pull the knitting needle forward (toward the operator) to the limit and if the hook is pushed downwards, the real end of the needle comes on top of the groove.

3 Lift up the shank and pull it to the rear and the knitting needle can be pulled out.

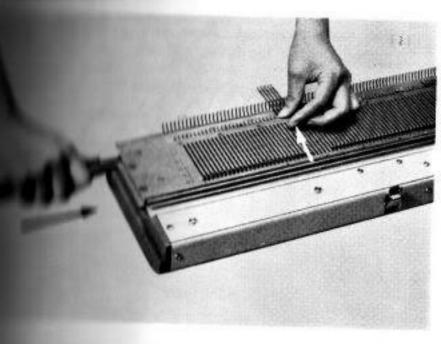

4 Insert the new knitting needle to the groove from II hook side.

* Note Insert all the needles so that there will be open grooves.

the needles are inserted, insert the needle

the needle stopper fully while pulling it forward

2. When the carriage movement is heavy

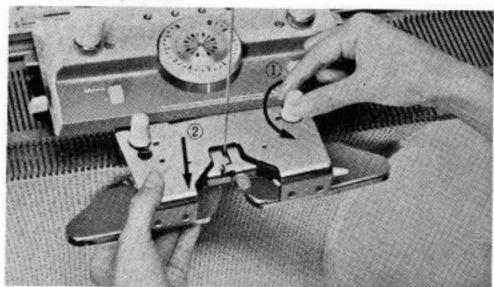

(1) If the stitch adjusting dial graduation is not matched with the knitting yarn, correct the dial graduation in consonance with the yarn.

(2) If the rotating brush or the roller has entangling thread hards to impede their functions, remove all thread hards and make the roller to rotate lightly and smoothly.

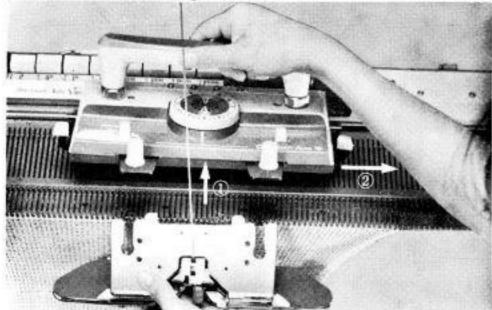

(3) When the lubricating oil is depleted Follow instructions contained in the chapter on CARE AND MAINTENANCE OF THE MACHINE and lubricate the machine thoroughly.

3. When the carriage does not move

① Loosen the knob of the machine arm and release the material presser.

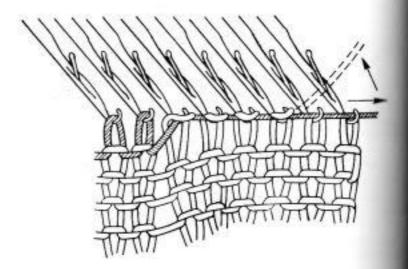

2 Inactivate the row counter bar and by lifting the front side of the carriage a little way, return the carriage to the original knitting position. When the carriage starts to move again, activate the row counter bar by bringing it to the working position.

3 Put back the material presser.

4 Unloosen the knitted stitches which were knitted way.

(When the knitting yarn at the end of knitting is pup and pulled sideways, the stitches will be squeeze look like one thread. Next, pull up the yarn and to release it from the hook, and one row will be loose

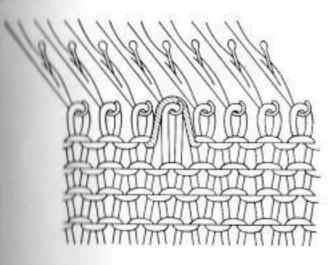

- (5) When the row counter has moved, return it one is
- 6 Then, pull in the loosened yarn under the knitting if guide of the tension.

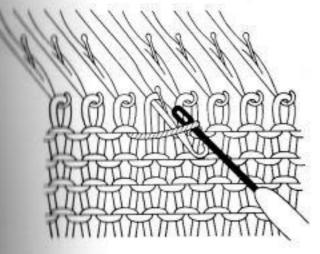

when the stitches slip off

When one row is slipped off

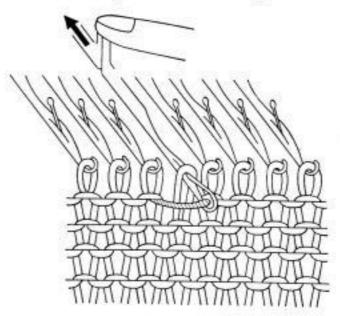

the one stitch transfer needle through the stitch one under the slipped off stitch and hang it to the hook at the knitting needle together with the upper horizontal

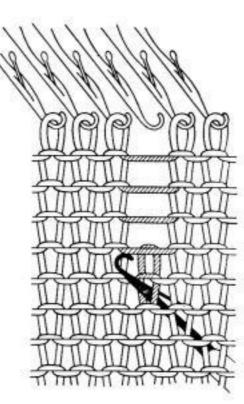

Hum, bring out this knitting needle forward, slip the minth behind the latch and leave the horizontal yarn at the center of the hook.

3 Return the knitting needle to the B position.

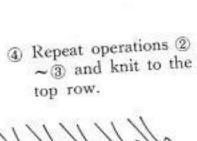

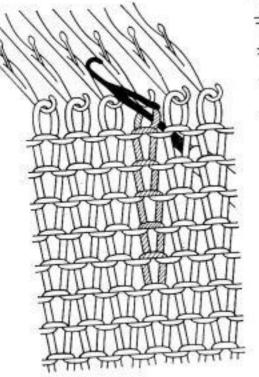

- (2) When more than 2 rows slipped off
- Pass the latch needle tool through the stitch one row under the slipped off stitch from under the knitting material and lightly pull it. (One more row will be slipped off).

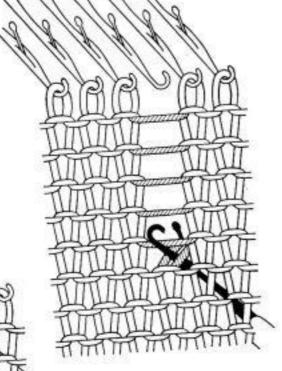

② Take out the latch needle tool forward, slide the scooped up stitch behind the latch and hang the yarn just above it to the hook.

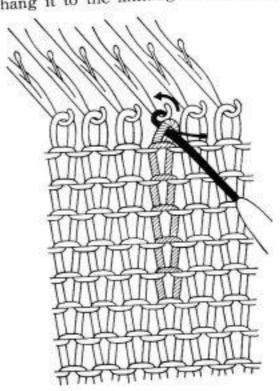

3 Pull in the latch needle tool.

⑤ Pull out the latch needle tool from the last stitch scoop up the stitch from front with the latch nee tool and hang it to the knitting needle hook.

5. When the thread of the threader yarn easily sl Remove the threader and inspect if the thread brusl lightly.

If the brush does not turn lightly, some thread has stuck in it, so remove them and make it turn lightly.

AND MAINTENANCE OF MACHINE

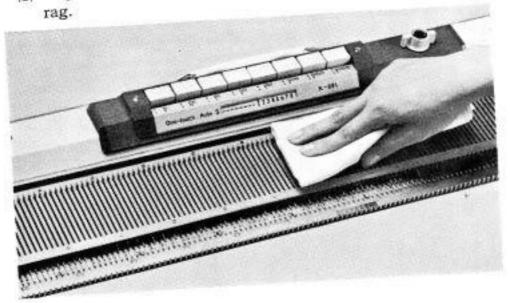

the machine in good condition, the machine must

willy rared for and maintained. thread hards or foreign matter sticks to the machine, the gets heavy and invites malfunctions.

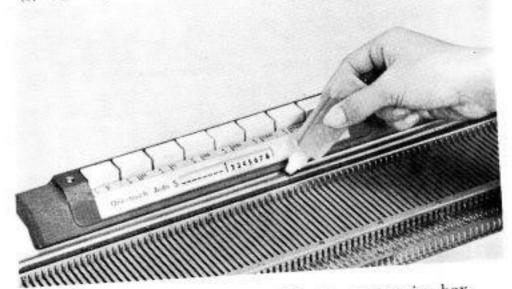

the thrush in the accessories box and remove all dirt

(2) Wipe away all dust and grit from the area with a clean

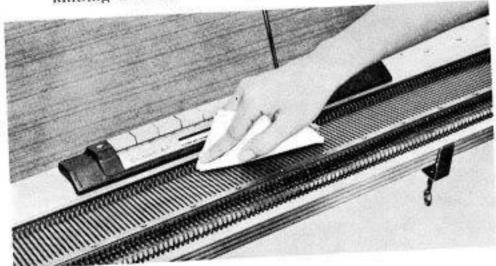

(3) Lightly paint the front and back rail with clean oil.

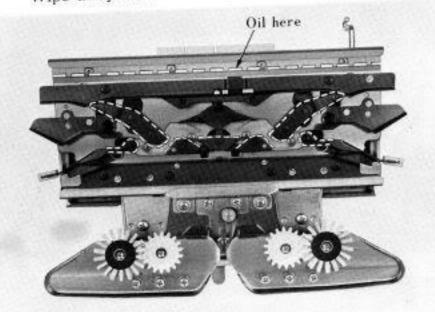

* Be sure to use only the oil in the accessories box. If the oiler is pushed lightly, the oil will ooze out from the brush at its tip.

(4) The groove of the groove plate and the butts of the knitting needles should be thoroughly oiled with oil dripping cloth.

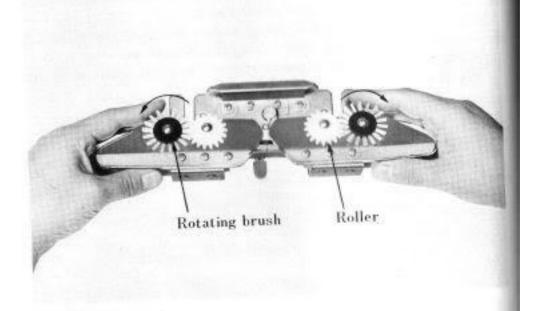

* Do not apply too much oil to the grooved part or the knitting needles.

(5) Back side of the carriage Wipe away all dirt and apply oil to the lined spots.

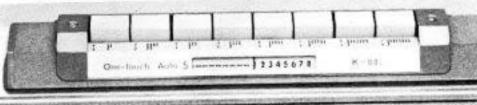

(6) Checking the rotating brush and the roller Remove all thread hards and make the rotating brush and the roller to rotate lightly.

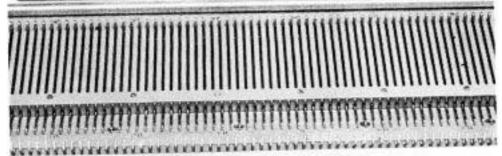

- (7) Maintenance All metal parts should be thoroughly wiped and cleaned with a clean cloth and then with a oil-soaked cloth, wipe
- @ When the case gets dirty, wipe it thoroughly with a cloth soaked with some neutral cleaning agent. (Do not use thinner, benzene or gasoline)
- 3 Store it away in dry, humid-less quarters.

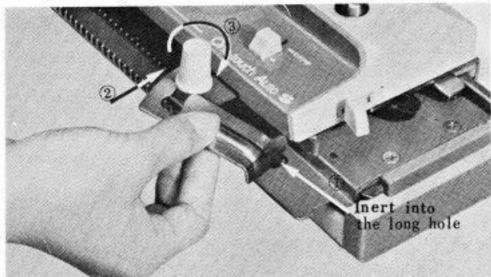

IX. HOW TO STORE AWAY THE MA-CHINE

① Return all the pattern buttons, arrange all the knitting needles together at the A position and match the slide graduation to "1".

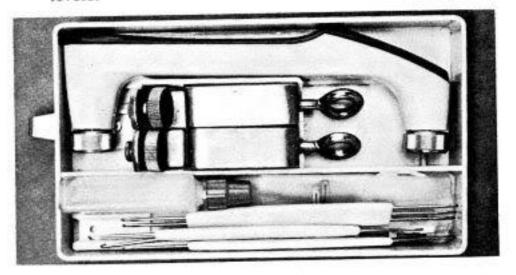

② Remove the carriage handle and the material presser and with the carriage stopper, set it on the right side. (Insert the protruding part of the carriage stopper into the long square hole and tighten the other end with the arm knob.)

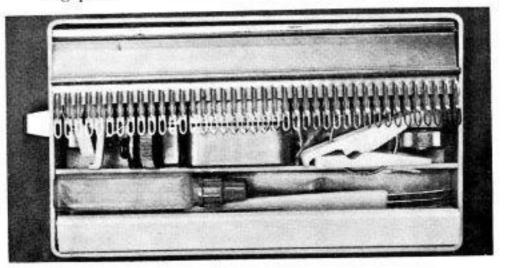

③ Put away the following parts into the accessories box: Carriage handle, installing tools, brush, needle feeding plate, oiler, latch needle tool, transfer needles, selecting levers.

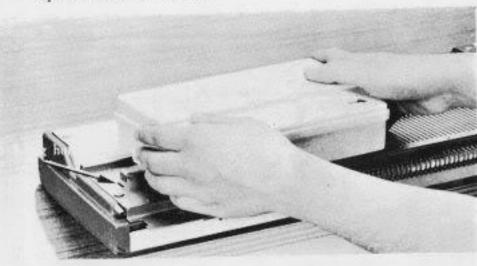

② Put away the following remaining parts neatly in the store case:

Pulled yarn, spare needles, closing needles, threader weight, thread passer, embroidering scissors, embroidering plate.

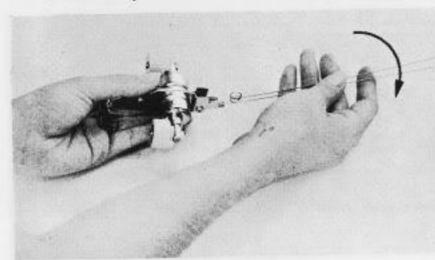

(5) Cover up the parts box.

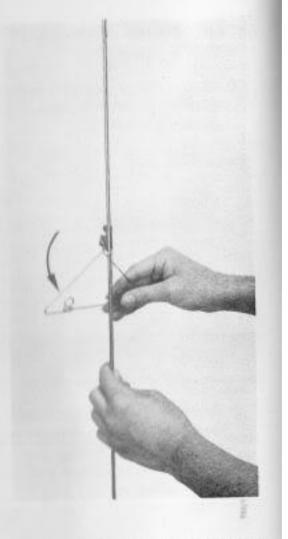

(6) Insert the leg support of the parts box into the long square hole and set it.

 Remove the tension and return the tension spring to the horizontal position.

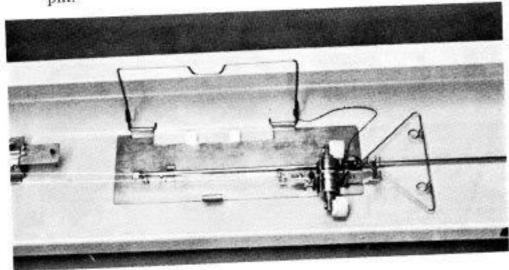

(8) Fold up the knitting thread guide and re move the tension bar.

 Open up the presser spring inside the lid of the machine. With the knitting thread guide on top, store away the tension bar.

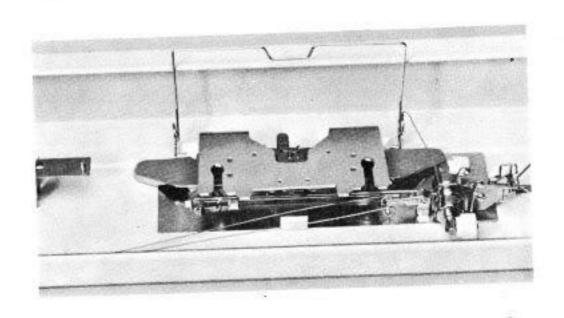

To store away the tension, put the forward thread guide on top, insert the shaft hole into the shaft and insert the pin.

(i) Arrange all the tension springs and duck them under the metal receptacle and hang them on the tools.

12 Store away the material presser as shown in Fig. 117.

Knock down the presser spring and hang it on the metal receptacle.
