# IMPORTANT

## • • • About Ordering Yarn • • •

In so many of the garments the weight of yarn in one single pair or piece is so small that we cannot accept an order for yarn for less than 8 ounces ( $\frac{1}{2}$  lb.) of a selected color, excepting where the color is desired for trimming or design knitting.

**WE WILL REFUSE TO FILL ORDERS FOR LESS THAN 8 OUNCES OF A SELECTED COLOR.**

There are 16 ounces in a pound and 12 pieces to a dozen; divide the cost per dozen by 12 to get the cost or weight of yarn per piece or pair. Never order yarn for less than six pieces or pairs.

In the above Table we have mentioned weight and cost for the yarn which is specified in the Manual of Instructions for the size as the instructions state. If larger or smaller sizes are desired, it is necessary to order more or less yarn per dozen accordingly..

Cotton cannot be sold in less than 8 ounces of a color on a cone. You should have one or two colors of cotton on hand for the purpose of dividing knitting, or used in connection with other yarn—such as No. 18 and 22—and for re-enforcing heels and toes.

When selecting yarns for garments it is necessary to specify the size that we carry in stock, on the Sample Card, and send with the order a sample of yarn for color. Proper sized yarn must be ordered that will knit on the size Cylinder you have chosen to use; see page No. 9.

The Company carries small amounts of Novelty yarns which are not sampled on their card. If Novelty yarns in sizes and colors are desired, samples and further information will be given you on special request, stating as near as possible what you desire. There is now a limited stock of size 2-7 in Rayon and Wool, in beautiful Heather colors and Plain colors.

Solid standard colors other than those shown on the Sample Card can be supplied in 3-16, 2-18 and 3-22 for trimming, decoration, and design purposes—in small lots—at 25c an ounce. Special colors are often wanted for Athletic Hose and Golf Hose, and other things.

In the Table we do not specify the cost and weight of decorative or trimming yarn; therefore, you will have to estimate the approximate weight of such yarn you will desire for the garments for trimming purposes, and if it is not a color or kind of yarn on our Sample Card, the price is 25c an ounce.

We offer at least 5 combination colors of Rayon and Wool Floss, as shown on the Sample Card, at 25c an ounce. The use of this yarn will add very much value to your knitting, and we can supply it to you in 1 ounce lots.

Our Pure Wool and Rayon Mix yarns, at \$2.50 a pound, knits beautifully on the No. 72 and No. 80 Cylinder, and anyone who is using their Machine extensively should have a supply of any or all of the colors shown on the Sample Card, to use in some of their knitting.

The Company cannot attempt to sample all of the colors of the Mystic Yarn but any order in which you can give us an idea of colors—whether bright or tinted, will help us make a selection for you. Our Mystic Yarn will develop very beautiful knitting where it is appropriate to use such yarn, and you should have at least a pound each of size 3-16 and 2-7.

The Rayon Silk Thread, on Sample Card, is used by many to re-enforce heels and toes or to knit with solid colors of yarn for pretty knitting effects.

Study our Sample Card, and please do not order and pay in advance for yarns which are not on our Sample Card, unless you correspond with us first to find out if we can supply same.
